Phenomenon Patrick Duffley, 2014-10-15 This monograph is part of a growing research agenda in which semantics and pragmatics not only complement the grammar but replace it The analysis is based on the assumption that human language is not primarily about form but about form meaning pairings This runs counter to the autonomous syntax postulate underlying Landau 2013 s Control in Generative Grammar that form must be hived off from meaning and studied separately Duffley shows control to depend on meaning in combination with inferences based on the nature of the events expressed by the matrix and complement the matrix subject the semantic relation between matrix and complement and a number of other factors The conclusions call for a reconsideration of Ariel 2010 s distinction in Defining Pragmatics between semantics and pragmatics on the basis of cancelability many control readings are not cancelable although they are pragmatically inferred It is proposed that the line be drawn rather between what is linguistically expressed and what is not linguistically expressed but still communicated      Modality in English Raphael Salkie, Pierre Busuttil, Johan van der Auwera, 2009-06-23 This volume presents two kinds of studies on English modality On the one hand there are strongly empirical corpus based studies of individual uses of English modal auxiliaries and modal constructions such as may in interrogatives might in concessive clauses shall and may vs must in legal English the use of surprised if and surprising if constructions the use and history of adhortative constructions or the modal aspectual use of come to in I came to realize that X The book also contains work that presents new views on some of the classical issues like the relations between modality and time modality and commitment modals and inter subjectivity A special place is given to work that approaches the English modals from the perspective of the Theory of Enunciative Operations developed by the French linguist Antoine Culioli and his colleagues Thus the book provides new perspectives and answers on basic questions about modality in general and its expression in English in particular

*English Words and Sentences* Eva Duran Eppler, Gabriel Ozón, 2013 Hands on theory neutral and non technical this textbook is a basic introduction to the structure of English words and sentences Assuming no prior knowledge of linguistic analysis it presents the facts in a straightforward manner and offers a step by step guide from small to large building blocks of language Every chapter contains numerous exercises and discussion questions which provide essential self study material as well as in chapter tasks which lead students to a more comprehensive understanding of linguistic issues The book also features concise chapter summaries suggestions for further reading an inclusive glossary and two consolidation chapters

which encourage students to secure their understanding of the English language The dedicated companion website includes further exercises answers and solutions to the exercises as well as useful links
