**Meaning in Life and Why It Matters** Susan Wolf,2010-03-01 A fresh reflection on what makes life meaningful Most people including philosophers tend to classify human motives as falling into one of two categories the egoistic or the altruistic the self interested or the moral According to Susan Wolf however much of what motivates us does not comfortably fit into this scheme Often we act neither for our own sake nor out of duty or an impersonal concern for the world Rather we act out of love for objects that we rightly perceive as worthy of love and it is these actions that give meaning to our lives Wolf makes a compelling case that along with happiness and morality this kind of meaningfulness constitutes a distinctive dimension of a good life Written in a lively and engaging style and full of provocative examples *Meaning in Life and Why It Matters* is a profound and original reflection on a subject of permanent human concern      **William James: Essays and Lectures** William James,2016-05-23 Part of the Longman Library of Primary Sources in Philosophy this edition of the William James Selected Essays is framed by a pedagogical structure designed to make this important work of philosophy more accessible and meaningful for undergraduates      *Philosophy of Life and Death* M.V. Embodiment and the Meaning of Life Jeff Noonan, 2018-03-21 The long tradition of pessimism in philosophy and poetry notoriously laments suffering caused by vulnerabilities of the human body The most familiar and contemporary version is antinatalism the view that it is wrong to bring sentient life into existence because birth inevitably produces suffering Technotopianism which stems from a similarly negative view of embodied limitations claims that we should escape sickness and death through radical human enhancement technologies In Embodiment and the Meaning of Life Jeff Noonan presents pessimism and technotopianism as two sides of the same coin as both begin from the premise that the limitations of embodied life are inherently negative He argues that rather than rendering life pointless the tragic failures that mark life are fundamental to the good of human existence The necessary limitations of embodied being are challenges for each person to live well not only for their own sake but for the sake of the future of the human project Meaning is not a given Noonan suggests but rather the product of labour upon ourselves others and the world Meaningful labour is threatened equally by unjust social systems and runaway technological development that aims to replace human action rather than liberate it Calling on us to draw conceptual connections between finitude embodiment and the meaning of life this book shows that seeking the common good is our most viable and materially realistic source of optimism about the future

God and the Meanings of Life T. J. Mawson, 2016-10-20 Some philosophers have thought that life could only be meaningful if there is no God For Sartre and Nagel for example a God of the traditional classical theistic sort would constrain our powers of self creative autonomy in ways that would severely detract from the meaning of our lives possibly even evacuate our lives of all meaning Some philosophers by contrast have thought that life could only be meaningful if there is a God *God and the Meanings of Life* is interested in exploring the truth in both these schools of thought seeking to discover what God could and couldn't do to make life meaningful as well as what he would and wouldn't do Mawson espouses a version of the amalgam or pluralism thesis about the issue of life's meaning in essence that there are a number of different legitimate meanings of meaning and indeed life in the question of life's meaning According to Mawson God were he to exist would help make life meaningful in some of these senses and hinder in some others He argues that whilst there could be meaning in a Godless universe there could be other sorts of meaning in a Godly one and that these would be deeper
