Meaning And Method Essays In Honor Of Hilary Putnam:

Meaning and Method George Boolos, 1990-10-26 This volume is a report on the state of philosophy in a number of significant areas *Meaning and method* Hilary Putnam, 1990 **Jacques Maritain and the Many Ways of Knowing** Douglas A. Ollivant, 2002 Drawing on the writings of Jacques Maritain and by extension those of Thomas Aquinas the essays in this volume examine the effects of theories of knowledge on individuals culture and entire schools of philosophical thought The contributors challenge contemporary epistemologies which are largely based on writings of Descartes Locke and Kant They critique these theories internally and demonstrate their incompatibility with other goods such as liberty human dignity and access to the transcendent In stark contrast to modernity's dubious and fragmented opinions and belief systems Maritain in works like *The Degrees of Knowledge* and *Creative Intuition in Art and Poetry* proposed a theory of knowledge that permits real if limited knowledge of substances wholes Some contributors use these works as a springboard from which to examine aspects or applications of knowledge that Maritain left unexplored Others challenge or question aspects of Maritain's analysis seeking to improve upon his work Still others compare Maritain with other neo Thomistic philosophers most notably Etienne Gilson Alasdair MacIntyre and Pope John Paul II Maritain's works on human knowledge and the implicit critique of modernity contained within provide an alternative for those seeking to engage the various deficiencies of the culture of death These essays demonstrate the continuing relevance and timeliness of Maritain's thought Douglas A Ollivant is assistant professor of politics at the United States Military Academy Contributors George Anastaplo James Arraj Joseph M de Torre Robert Delfino Raymond Dennehy John M Dunaway Robert Fallon Desmond Fitzgerald William J Fossati W Matthews Grant Catherine Green James G Hanink Gregory J Kerr John F X Knasas John F Morris Ralph Nelson Douglas A Ollivant Matthew S Pugh Steven J Schloeder Christopher H Toner John G Trapani Jr Henk E S Woldring and Thomas F Woods This is a valuable collection of articles on an important individual who is still influencing contemporary political thought Lucien J Richard OMI Catholic Library World **The Bloomsbury Encyclopedia of Philosophers in America** John R. Shook, 2016-02-11 For scholars working on almost any aspect of American thought *The Bloomsbury Encyclopedia to Philosophers in America* presents an indispensable reference work Selecting over 700 figures from the *Dictionary of Early American Philosophers* and the *Dictionary of Modern American Philosophers* this condensed edition includes key contributors to philosophical thought From 1600 to the present day entries cover psychology pedagogy sociology anthropology education theology and political science before these disciplines came to be considered distinct from philosophy Clear and accessible each entry contains a short biography of the writer an exposition and analysis of his or her doctrines and ideas a bibliography of writings and suggestions for further reading Featuring a new preface by the editor and a comprehensive introduction *The Bloomsbury Encyclopedia to Philosophers in America* includes 30 new entries on twenty first century thinkers including Martha Nussbaum and Patricia Churchland With in depth overviews of Waldo Emerson Margaret Fuller Noah Porter

Frederick Rauch Benjamin Franklin Thomas Paine and Thomas Jefferson this is an invaluable one stop research volume to understanding leading figures in American thought and the development of American intellectual history **Ontology after Carnap** Stephan Blatti,Sandra Lapointe,2016-03-24 Analytic philosophy is once again in a methodological frame of mind Nowhere is this more evident than in metaphysics whose practitioners and historians are actively reflecting on the nature of ontological questions the status of their answers and the relevance of contributions both from other areas within philosophy e g philosophical logic semantics and beyond notably the natural sciences Such reflections are hardly new the debate between Willard van Orman Quine and Rudolf Carnap about how to understand and resolve ontological questions is widely seen as a turning point in twentieth century analytic philosophy And indeed this volume is occasioned by the fact that the deflationary approach to metaphysics advocated by Carnap in that debate is once again attracting considerable interest and support Containing eleven original essays by many of today s leading voices in metametaphysics *Ontology After Carnap* aims both to deepen our understanding of Carnap s contributions to metaontology and to explore how this legacy might be mined for insights into the contemporary debate This collection will be of interest to scholars and students working in metaphysics semantics philosophical logic metaphilosophy and the history of analytic philosophy *The Powers Metaphysic* Neil E. Williams,2019 Neil E Williams develops a systematic metaphysics centred on the idea of powers as a rival to neo Humeanism the dominant systematic metaphysics in philosophy today Williams takes powers to be inherently causal properties and uses them as the foundation of his explanations of causation persistence laws and modality *Ontology Made Easy* Amie Lynn Thomasson,2015 Existence questions have been topics for heated debates in metaphysics but this book argues that they can often be answered easily by trivial inferences from uncontroversial premises This easy approach to ontology leads to realism about disputed entities and to the view that metaphysical disputes about existence questions are misguided **The Triadic Structure of the Mind** Francesco Belfiore,2014-05-23 In *The Triadic Structure of the Mind* Francesco Belfiore begins from the basic ontological conception of the structure and functioning of the mind or spirit as an evolving conscious triad composed of intellect sensitiveness and power each exerting a selfish or moral activity Based on this concept Belfiore has developed a coherent philosophical system through which he offers fresh solutions in the fields of ontology knowledge language aesthetic ethics politics and law The second edition of the book includes a more extensive treatment of the topics addressed in the first edition the introduction of new concepts and the inclusion of additional thinkers whose views have been discussed and reinterpreted **Context-Dependence, Perspective and Relativity** Francois Recanati,Isidora Stojanovic,Neftali Villanueva,2010-08-31 This volume brings together original papers by linguists and philosophers on the role of context and perspective in language and thought Several contributions are concerned with the contextualism relativism debate which has loomed large in recent philosophical discussions In a substantial introduction the editors survey the field and map out the relevant issues and positions *Knowing Science* Alexander Bird,2022 *Knowing Science* argues

for an epistemology of science that gives a central place to the concept of knowledge Alexander Bird argues that science proceeds by inference to the only explanation and rejects general metascientific realism and antirealism **Plato's**

Problem M. Panza,A. Sereni,2013-01-21 What is mathematics about And how can we have access to the reality it is supposed to describe The book tells the story of this problem first raised by Plato through the views of Aristotle Proclus Kant Frege G del Benacerraf up to the most recent debate on mathematical platonism Free Will and Action Explanation Scott

Sehon,2016-04-29 Do we have free will and moral responsibility Is free will compatible with determinism Scott Sehon argues that we can make progress on these questions by focusing on an underlying issue the nature of action explanation When a person acts or does something on purpose we explain the behavior by citing the agent s reasons The dominant view in philosophy of mind has been to construe such explanations as a species of causal explanation Part I of the book proposes and defends a non causal account of action and agency according to which reason explanation of human behavior is irreducibly teleological rather than causal Part II applies the teleological account of action to free will and responsibility arguing that the free actions the ones for which we are directly responsible are the goal directed actions the actions that are teleologically explicable in terms of our reasons It is then argued that this non causal account of action undermines the appeal of

incompatibilist arguments arguments attempting to show that free will is not compatible with determinism Beyond this Sehon argues that the non causal compatibilist account works well in practice it is in accord with our clear intuitions about cases and it both explains and provides guidance in the cases where our intuitions are murkier Foundations of Speech

Act Theory S.L. Tsohatzidis,2002-09-11 Foundations of Speech Act Theory investigates the importance of speech act theory to the problem of meaning in linguistics and philosophy The papers in this volume written by respected philosophers and linguists significantly advance standards of debate in this area Beginning with a detailed introduction to the individual contributors this collection demonstrates the relevance of speech acts to semantic theory It includes essays unified by the assumption that current pragmatic theories are not well equipped to analyse speech acts satisfactorily and concludes with five studies which assess the relevance of speech act theory to the understanding of philosophical problems outside the area of philosophy of language **Philosophy of Mind: The Key Thinkers** Andrew Bailey,2013-11-21 Exploring what great

philosophers have written about the nature of thought and consciousness Philosophy of Mind The Key Thinkers offers a comprehensive overview of this fascinating field Thirteen specially commissioned essays written by leading experts introduce and explore the contributions of those philosophers who have shaped the subject and the central issues and arguments therein The modern debate about the mind was shaped by Descartes in the seventeenth century and then reshaped in the mid twentieth century and since by exciting developments in science and philosophy This book concentrates on the development of philosophical views on the mind since Descartes offering coverage of the leading thinkers in the field including Husserl Ryle Lewis Putnam Fodor Davidson Dennett and the Churchlands Crucially the book demonstrates how the

ideas and arguments of these key thinkers have contributed to our understanding of the relationship between mind and brain

Ideal for undergraduate students the book lays the necessary foundations for a complete and thorough understanding of this fascinating subject

Abstraction and Infinity Paolo Mancosu, 2016 Mancosu offers an original investigation of key notions in mathematics abstraction and infinity and their interaction He gives a historical analysis of the theorizing of definitions by abstraction and explores a novel approach to measuring the size of infinite sets showing how this leads to deep mathematical and philosophical problems

The Quality of Thought David Pitt, 2024 The Quality of Thought develops and defends the thesis that thinking is a kind of experience characterized by a sui generis phenomenology and draws out the implications of this thesis for dominant views in philosophy of mind philosophy of language and metaphysics The view defended is radically internalist and intensionalist and goes against received doctrines in philosophy of mind externalism and language extensionalism The book offers arguments for the thesis refutations of classic externalism Putnam and Burge arguments that standard motivations for direct reference theories of names indexicals and demonstratives are not inevitable and alternative accounts of their and their conceptual equivalents semantics It also addresses outstanding challenges to the phenomenal intentionalist view of thought content including the existence of unconscious thought the elusiveness of conceptual phenomenology the matching content problem phenomenal compositionality and the determination of conceptual reference

The Philosophy of Mathematics Today Matthias Schirn, 2003 Representing the state of the art in the field of the philosophy of mathematics this collection of 20 essays deals with fundamental issues ranging from the nature of mathematical knowledge to sets and natural number

Gottlob Frege: Frege's philosophy of mathematics Michael Beaney, Erich H. Reck, 2005 This collection brings together recent scholarship on Frege including new translations of German material which is made available to Anglophone scholars for the first time

New Directions in the Philosophy of Mathematics Thomas Tymoczko, 1998-02 The traditional debate among philosophers of mathematics is whether there is an external mathematical reality something out there to be discovered or whether mathematics is the product of the human mind This provocative book now available in a revised and expanded paperback edition goes beyond foundationalist questions to offer what has been called a postmodern assessment of the philosophy of mathematics one that addresses issues of theoretical importance in terms of mathematical experience By bringing together essays of leading philosophers mathematicians logicians and computer scientists Thomas Tymoczko reveals an evolving effort to account for the nature of mathematics in relation to other human activities These accounts include such topics as the history of mathematics as a field of study predictions about how computers will influence the future organization of mathematics and what processes a proof undergoes before it reaches publishable form This expanded edition now contains essays by Penelope Maddy Michael D Resnik and William P Thurston that address the nature of mathematical proofs The editor has provided a new afterword and a supplemental bibliography of recent work

Philosophical Semantics Claudio Ferreira Costa, 2019-01-29 This book offers

an innovative systematic approach to the problems of meaning reference and related issues unifying in promising ways some of the best insights not only of exponential philosophers like Wittgenstein and Frege but also of some influential later theorists like Michael Dummett Ernst Tugendhat John Searle and Donald Williams Moreover it exposes some main errors popularized by clever formalist oriented philosophers from Willard Van Orman Quine to Saul Kripke and Hilary Putnam In this way it shows how some older major approaches could regain their central importance and how the cartography of philosophy of language could be once more redrawn The book is clearly written and will be of interest to anyone with basic training in analytic philosophy
