Expanding Approaches to Bible Translation James A. Maxey, 2025-05-22 The assertion in this book included within the BPC series is that translation is as fundamental to biblical material as performance both in its history as well as in its research approaches Translation in this sense is more than a transferal of meaning from one linguistic system to another Bible translation highlights innovative connections and conceptions to biblical texts in their promulgation reception and ever changing nature A predominant theory used throughout this book is social semiotic multimodality This communication theory informs an approach to translation that expands beyond words to other semiotic resources Sign Language embodied performance social media theater materiality and many other types of multimodal communications inform translation It is important to understand that the Bible is a translated experience Translation reflects the various ways in which the Bible has been mediated and appropriated throughout history It follows therefore that Bible translation as a global activity has been and continues to be influenced by the political and economic flows of history Race class ethnicity gender sexual orientation and other elements of our social locations directly influence the enterprise and results of Bible translation

Contextual Frames of Reference in Translation Ernst Wendland, 2014-04-08 Bible translation theory and practice rightly tend to focus on the actual text of Scripture But many diverse yet interrelated contextual factors also play an important part in the implementation of a successful translation program The aim of this coursebook is to explore in varying degrees of detail a wide range of these crucial situational variables and potential influences using a multidisciplinary approach to the task Thus in order to expand and enrich the field of vision a progressive study of this complex process of intercultural interlinguistic communication is carried out according to a set of overlapping sociocultural organizational and situational cognitive orientations These contextual factors provide a broader frame of reference for analyzing interpreting and communicating the original Scriptures in a completely new contemporary setting of transmission and reception The three dimensions are then applied in a practical way to explore the dramatic throne room vision of the Apostle John Revelation 4 5 with reference to both the original Greek text and also a modern dynamic translation in Chewa a southeastern Bantu language of Africa A variety of exercises and assignments to stimulate critical and creative reflection as well as to illustrate the theoretical development of Contextual Frames of Reference is provided every step of the way Not only is translation per se discussed but the teaching and evaluation of translated texts and versions are also considered from several points of view in the final three chapters An Appendix offers a foundational essay by Professor Lourens de Vries on the subject of primary orality and the

Christology in Christian-Muslim Dialogue Rev Fr Dr Robert Afayori,2021-02-11 Understanding the religious beliefs and practices of the other raises hermeneutic questions on the extent to which the dialogical call to openness is related to commitment the meaning of religious identity and whether openness to the beliefs of the other poses a threat to one s religious identity If interreligious learning demands that the interlocutors unite their attitude of commitment and openness how does this occur without the loss of alterity This book addresses these questions within the context of Christian Muslim dialogue on Christology as an exercise in learning a new form of dialogue which leads Christians and Muslims to the discovery of common values such as prayer and submission to God peace and peaceful co existence and solidarity with the poor and marginalised **The Bible Translator** ,2006 Managing Religion: The Management of Christian Religious and Faith-Based Organizations Malcolm Torry,2014-09-09 This two volume work explores the management of religious and faith based organizations Each chapter offers a discussion of the earliest Christian organizations based on New Testament evidence a study of managing faith based organizations and an exploration of secular management theory in relation to the management of faith based organizations Leaving The Fold Edward T.
