Assessing Adolescent and Adult Intelligence Alan S. Kaufman, Elizabeth O. Lichtenberger, 2005-08-05 The classic text now updated with a new interpretive approach to the WAIS III Assessing Adolescent and Adult Intelligence the classic text from Alan Kaufman and Elizabeth Lichtenberger has consistently provided the most comprehensive source of information on cognitive assessment of adults and adolescents The newly updated Third Edition provides important enhancements and additions that highlight the latest research and interpretive methods for the WAIS III Augmenting the traditional sequential and simultaneous WAIS III interpretive methods the authors present a new approach derived from Cattell Horn Carroll CHC theory This approach combines normative assessment performance relative to age peers with ipsative assessment performance relative to the person's own mean level Following Flanagan and Kaufman's work to develop a similar CHC approach for the WISC IV Kaufman and Lichtenberger have applied this system to the WAIS III profile of scores along with integrating recent WAIS III literature Four appendices present the new method in depth In addition to a detailed description the authors provide a blank interpretive worksheet to help examiners make the calculations and decisions needed for applying the additional steps of the new system and norms tables for the new WAIS III subtest combinations added in this approach Assessing Adolescent and Adult Intelligence remains the premier resource for the field covering not only the WAIS III but also the WJ III the KAIT and several brief measures of intelligence as well as laying out a relevant up to date discussion of the discipline The new theory based interpretive approach for the WAIS III makes this a vital resource for practicing psychologists as well as a comprehensive text for graduate students

Clinical Interpretation of the WAIS-III and WMS-III David S. Tulsky, Donald H. Saklofske, Gordon J. Chelune, Robert K. Heaton, Robert J. Ivnik, Robert Bornstein, Aurelio Prifitera, Mark F. Ledbetter, 2003-10-27 This guide to the WAIS III and WMS III tests is written to help clinical practitioners achieve efficient and accurate interpretations of test results The only interpretive guide to be based on data obtained while standardizing the tests this reference source provides new models for interpreting results as well as practical information on the diagnostic validity demographically corrected norms and accuracy of the tests in measuring intelligence and memory The focus of information is to allow clinicians to reduce variance in the interpretations of scores indicating how best to factor in socio economic status of respondents interpreting meaningful change in serial assessments and scoring with alternate or omitted sub tests Also included in the book are chapters on accommodating clients with disabilities The final chapter discusses frequently asked questions with answers on the use and interpretation of the tests as well as practical issues to help make scoring time efficient and accurate Only guide to be based on data obtained in the standardization of the tests Practical examples given to help guide interpretation of scores Focuses on information to make faster more accurate scoring interpretations

WAIS-IV Clinical Use and Interpretation Lawrence G. Weiss, Donald H. Saklofske, Diane Coalson, Susan Engi Raiford, 2010-06-22 Published in August of 2008 WAIS IV is the most widely used intelligence test for adults in the world

Substantive changes were made to the WAIS IV from the WAIS III leaving clinicians with questions as to how to use and interpret the measure effectively. Written by the creators of the new test, this book serves as the ultimate insider's guide to the new test, providing users with the kind of access to norms and data that would be unavailable to any subsequent book on clinical use of this measure. The book discusses the changes made between 3rd and 4th editions along with an FAQ and answers about use and interpretation. The reader is instructed how to interpret composite scores and everything needed to use and interpret two entirely new composite scores: the General Ability Index (GAI) and the Cognitive Proficiency Index (CPI). This information does NOT appear in the manual accompanying the test. The second section of the book focuses on WAIS IV use and interpretation with special clinical applications and populations, including multicultural clients in neuropsychological settings with individuals experiencing psychological disorders and with older adults. The editors and chapter authors have exclusive access to proprietary WAIS IV data to run advanced analyses and provide information beyond what is offered in the WAIS IV manual. Provides practical advice on scoring and administration. Facilitates understanding WAIS IV use with special populations. Describes use of the WAIS IV with WMS II.
