Elements of Physical Oceanography is a derivative of the Encyclopedia of Ocean Sciences, Second Edition, and serves as an important reference on current physical oceanography knowledge and expertise in one convenient and accessible source. Its selection of articles, all written by experts in their field, focuses on ocean physics: air-sea transfers, waves, mixing, ice, and the processes of transfer of properties such as heat, salinity, momentum, and dissolved gases within and into the ocean. Elements of Physical Oceanography serves as an ideal reference for topical research. References related to articles in physical oceanography to facilitate further research. Richly illustrated with figures and tables that aid in understanding key concepts. Includes an introductory overview and then explores each topic in detail, making it useful to experts and graduate-level researchers. Topical arrangement makes it the perfect desk reference. **Thinning Films and Tribological Interfaces**. D. Dowson, J.M. Georges, M. Priest, C. M. Taylor, P. Ehret, P.R.N. Childs, G. Dalmaz, A.A. Lubrecht, Y. Berthier, L. Flamand, 2000-09-01. This collection of fully peer-reviewed papers were presented at the 26th Leeds-Lyon Tribology Symposium, which was held in Leeds, UK, 14-17 September 1999. The Leeds-Lyon Symposia on Tribology were launched in 1974, and the large number of references to original work published in the Proceedings over many years confirms the quality of the published papers. It also indicates that the volumes have served their purpose and become a recognised feature of the tribological literature. This year's title is Thinning Films and Tribological Interfaces, and the papers cover practical applications of tribological solutions in a wide range of situations. The evolution of a full peer-review process has been evident for a number of years. An important feature of the Leeds-Lyon Symposia is the presentation of current research findings. This remains an essential feature of the meetings, but for the 26th Symposium, authors were invited to submit their papers for review a few weeks in advance of the Symposium. This provided an opportunity to discuss recommendations for modifications with the authors. **Air Force Research Resumés**, Photoelectrochemistry, Fundamental Processes and Measurement Techniques, 1982. *NISTIR*, 2001. **Research and Technology Program Digest**.
