Measuring Eternity Martin Gorst, 2002-03-26 The untold story of the religious figures philosophers astronomers geologists physicists and mathematicians who for more than four hundred years have pursued the answer to a fundamental question at the intersection of science and religion When did the universe begin The moment of the universe s conception is one of science s Holy Grails investigated by some of the most brilliant and inquisitive minds across the ages Few were more committed than Bishop James Ussher who lost his sight during the fifty years it took him to compose his Annals of all known history now famous only for one date 4004 b c Ussher s date for the creation of the world was spectacularly inaccurate but that didn t stop it from being so widely accepted that it was printed in early twentieth century Bibles As writer and documentary filmmaker Martin Gorst vividly illustrates in this captivating character driven narrative theology let Ussher down just as it had thwarted Theophilus of Antioch and many before him Geology was next to fail the test of time In the eighteenth century naturalist Comte de Buffon working out the rate at which the earth was supposed to have cooled came up with an age of 74 832 years even though he suspected this was far too low Biology then had a go in the hands of fossil hunter Johann Scheuchzer who alleged to have found a specimen of a man drowned at the time of Noah s flood Regrettably it was only the imprint of a large salamander And so science inched forward via Darwinism thermodynamics radioactivity and most recently the astronomers at the controls of the Hubble space telescope who put the beginning of time at 13.4 billion years ago give or take a billion Taking the reader into the laboratories and salons of scholars and scientists visionaries and eccentrics Measuring Eternity is an engagingly written account of an epic often quixotic quest of how individuals who dedicated their lives to solving an enduring mystery advanced our knowledge of the universe

Chronometres Krista Lysack,2019-09-20 What does it mean to feel time to sense its passing along the sinews and nerves of the body as much as the synapses of the mind And how do books as material arrangements of print and paper mediate such temporal experiences Chronometres Devotional Literature Duration and Victorian Reading Culture is a study of the time inflected reading practices of religious literature the single largest market for print in Victorian Britain It examines poetic cycles by John Keble Alfred Tennyson Christina Rossetti and Frances Ridley Havergal family prayer manuals Sunday reading books and periodicals and devotional gift books and daily textbooks Designed for diurnal and weekly reading chronometrical literature tuned its readers attentions to the idea of eternity and the everlasting peace of spiritual transcendence but only in so far as it parcelled out reading into discrete increments that resembled the new industrial time scales of factories and railway schedules Chronometres thus takes up print culture affect theory and the religious turn in literary studies in order to explore the intersections between devotional practice and the condition of modernity It argues that what defines Victorian devotional literature is the experience of its time signatures those structures of feeling associated with its reading durations For many Victorians reading devotionally increasingly meant reading in regular portions and often according to the calendar and work day in contrast to the liturgical year Keeping pace with the temporal measures of modernity devotion became a routinized practice a way of synchronizing the interior life of spirit with the exigencies of clock time Chronometres considers how the deliverances afforded through time scaled reading are persistently materialised in the body both that of the book and of the reader Recognizing that literature and devotion are not timeless abstractions it asks how the materiality of books conceived as horological relationships through reading might bring about the felt experience of time Even as Victorian devotion invites us to tarry over the page it also prompts the question what if it is eternity that keeps time with the clock

Pranger, 2010-10-05 Augustine articulates temporality as focus rather than duration It encompasses the shift from the future through the present to the past Yet this a causal free floating concept of time has never been applied to the shape of Augustine's own narrative in the Confessions or to that other vintage Augustinian problem predestination This book examines Augustinian temporality by experimentally projecting it onto modernist authors Kleist Henry James Kafka Beckett who are less dependent on sequential narrative and more concerned with the fragility and sustainability of voice in time Processed through this mill of unfamiliar readings the poignant problem of Augustinian time is how focus can account for digression How can one deal with an unfathomably brief notion of time while eternity's longueurs hovers over it **Freedom of the Will** Daniel Whedon, 2009-01-01 Is the human will in bondage to sinful motives to the point that people cannot make truly free decisions Daniel D Whedon a prominent nineteenth century Wesleyan theologian takes aim at this central thesis of the

famed theologian Jonathan Edwards In this new edition of his widely admired 1864 work Whedon offers a step by step examination of Edwards s positions and finds them lacking in Biblical and logical support Within his position against Edwards he argues that the difference between natural ability and moral ability is meaningless that Edwards s deterministic necessitarian argument makes God the author of sin and that people frequently act against their strongest motives He concludes that without a free will there can be no justice no satisfying the moral sense no moral Government of which the creature can be the rightful subject and no God the righteous administrator *Human Nature, in Its Fourfold State ... in Several Practical Discourses* Thomas Boston,1807
