Measuring National Power In The Post Industrial Age Analysts Handbook:

Measuring National Power in the Postindustrial Age Ashley J. Tellis, 2001 The arrival of postindustrial society has transformed the traditional bases of national power and thus the methods used to measure the relative power of nations should be reassessed as well Appreciating the true basis of national power requires not merely a meticulous detailing of visible military assets but also a scrutiny of larger capabilities embodied in such variables as the aptitude for innovation the soundness of social institutions and the quality of the knowledge base all of which may bear upon a country's capacity to produce the one element still fundamental to international politics effective military power The authors reconfigure the notion of national power to accommodate a wider understanding of capability advancing a conceptual framework that measures three distinct areas national resources national performance and military capability to help the intelligence community develop a better evaluation of a country's national power The analysis elaborates the rationale for assessing each of these areas and offers ideas on how to measure them in tangible ways An analyst's handbook RAND MR 1110 1 A is also available

Measuring National Power in the Postindustrial Age Ashley J. Tellis, Arroyo Center, 2000 The arrival of post industrial society has transformed the traditional bases of national power and thus the methods used to measure the relative power requires not merely a meticulous detailing of visible military assets but also a scrutiny of larger capabilities embodied in such variables as the aptitude for innovation the soundness of social institutions and the quality of the knowledge base all of which may bear upon a country's capacity to produce the one element still fundamental to international politics effective military power The authors reconfigure the notion of national power to accommodate a wider understanding of capability advancing a conceptual framework that measures three distinct areas national resources national performance and military capability to help the intelligence community develop a better evaluation of a country's national power The analysis elaborates the rationale for assessing each of these and offers ideas on how to measure them in tangible ways

Measuring National Power in the Post-industrial Age, 2000 This handbook is designed to complement the main report RAND MR 1110 A It is intended to provide the analyst the substance of the concepts and metrics for assessing national power without presenting extensive background or the analytic underpinning contained in the main document

Measuring Space Power Marco Aliberti, Matteo Cappella, Tomas Hrozensky, 2019-08-02 This book provides an in depth investigation of the concept of space power and devises a novel conceptual framework for empirically measuring and comparing different typologies of space actors on the basis of clearly defined criteria In turn the book identifies a comprehensive set of conditions required to achieve and maintain the status of space power and explores the main political security and socio economic stakes involved Building on this basis the book conducts a comparative assessment of the major space actors the underlying aim of which is to examine Europe's relative position in the space arena and put into perspective its proclaimed goal to assert itself as a space power with all of the means and resources this would entail Given its scope the

book represents a valuable and versatile tool to support European decision making and offers key insights for executives space professionals and scholars alike

Power in the 21st Century Enrico Fels, Jan-Frederik Kremer, Katharina Kronenberg, 2012-04-10 The study of power is the nucleus of political science and international relations As a shift of power from traditional industrial countries to emerging powers has been perceived since the turn of the century this book aims to present innovative theoretical and empirical approaches that can increase our understanding of this transition Scholars from the fields of international relations international political economy economics and security studies not only explore current theoretical debates on power and power shifts among entities but also provide fresh insights into relevant aspects of international power in the 21st century With a particular focus on aspects of international security trade and production new methods of identifying power and its sources are presented and their potential implications and challenges are discussed

The Future of Power Joseph S. Nye, 2011 Examines the changing nature of power since the Cold War the new ways in which it is exercised and how those changes impact America's role in the world

National Security in a Globalised World Anthony C. Ukaegbu, In the pre modern and modern eras a government could easily subdue its enemy win wars and police its border unilaterally through hard military might This is not the same in the current age of globalization Globalization complicates national security Hence the power model suitable for national security in the age of globalization should address the enormous security challenges of globalization This book argues that only smart power and diplomacy can address the security challenges of the globalized world

Power Politics in Africa Olusola Ogunnubi, Samuel Oyewole, 2020-11-09 This collection of essays examines the subject of power politics in Africa paying special attention to the interests of African regional powers as well as their capabilities and strategies in the international arena It provides a theoretical bridge between concerns for militarised national interest perpetual distrust and insecurity struggles for power and hegemony in power politics and the spirit of pan African solidarity brotherhood consensus cooperation and integration It is on these bases that this volume offers rich empirical insight into leading regional powers in Africa with special attention given to Nigeria and South Africa It serves to contribute African perspectives to the field of International Relations

particularly regarding power politics which is important in terms of Africanising the narratives of a subject matter that is largely considered as Eurocentric in African and other non Western societies Essays on Evolutions in the Study of Political Power Giulio M. Gallarotti,2021-11-24 This book deals with the most important developments in the study of political power over the last four decades From the writings of the great Greek philosophers of antiquity to the present the idea of power has been the major subject in the study of politics Indeed some would say it defines the very field of politics itself as a social science Penned by the leading scholars in the field this collection gives a broad overview of the most important issues in the study of political power tracing the evolution of scholarly thinking about them and in doing so revealing crucial innovations therein This will be a major contribution in the understanding of the concepts and practices of how power manifests itself across social and political contexts This book will be of great interest to scholars students and individuals who wish to understand the very foundations of social and political life The chapters in this book were originally published as a special issue of the Journal of Political Power volume 14 issue 1 2021 *The Architecture of Security in the Asia-Pacific* Ronald Huisken,2009-10-01 We cannot expect in East Asia over the foreseeable future to see the sort of conflation of sovereign states that has occurred in Europe We must anticipate that for the foreseeable future the requirement will be for the sensible management and containment of competitive instincts The establishment of a multilateral security body in East Asia that includes all the key players and which the major powers invest with the authority to tackle the shaping of the regional security order remains a critical piece of unfinished business **National Security: Breakthroughs in Research and Practice** Management Association, Information Resources,2019-02-01 The tactical organization and protection of resources is a vital component for any governmental entity Effectively managing national security through various networks ensures the highest level of protection and defense for citizens and classified information National Security Breakthroughs in Research and Practice is an authoritative resource for the latest research on the multiple dimensions of national security including the political physical economic ecological and computational dimensions Highlighting a range of pertinent topics such as data breaches surveillance and threat detection this publication is an ideal reference source for government officials law enforcement professionals researchers IT professionals academicians and graduate level students seeking current research on the various aspects of national security **Courting Science** Damon V. Coletta,2016-05-25 In Courting Science Damon Coletta offers a novel explanation for the decline of American leadership in world affairs Whether the American Century ends sooner rather than later may depend on America s capacity for self reflection and ultimately self restraint when it comes to science technology and engineering Democracy s affinity for advanced technology has to be balanced against scientific research and progress as a global enterprise In an era of rising challengers to America s lead in the international order and an increasingly globalized civil society a Scientific State has a better chance of extending its dominance In order to draw closer to this ideal though the United States will have to reconsider its grand strategy It must have a strategy that

scrutinizes how tightly it constrains how narrowly it directs and how far it trusts American scientists If given the opportunity scientists have the potential to lead a second American Century through domestic science and technology policy international diplomacy and transnational networks for global governance *Planning for Protraction* Iskander Rehman,2023-11-09 As Sino US relations have deteriorated concerns have grown in Washington over its ability to defeat China in a major conflict A conflict between such peer competitors would likely become a protracted war of attrition drawing on all dimensions of national power but this reality has yet to receive a sufficient degree of analytical attention In this Adelphi book Iskander Rehman provides a historically informed and empirically grounded study of protracted great power war its core drivers and characteristics and an examination of the elements that have most often determined a competitor's long term strategic performance Final victory in a protracted conflict this book argues rests on a combination of three core factors a state's military effectiveness and adaptability its socio economic power and resiliency and the soundness of its alliance management and grand strategy A detailed analysis of the contemporary Sino US rivalry assesses how both parties might fare in the event of a protracted war while highlighting some of its key differentiating aspects most notably its nuclear and cyber dimensions

Regional Leadership in the Global System Daniel Flesmes,2016-04-08 We assume that the ideas interests and strategies of regional powers are highly significant variables with the power to influence foreign policy Yet while comparative research projects involving OECD countries are fairly common comparative research integrating developing regions is still rare despite the fact that these countries are among the key actors of the twenty first century This collection emphasizes the role of regional powers in intra regional interregional and global contexts analyzing the rise of regional powers from a comparative perspective In so doing the book explains how these powers have power to shape regional and global politics

Chinese Assertiveness in the South China Sea Richard Q. Turcsányi,2017-10-27 This book offers an assessment of China's assertive foreign policy behavior with a special focus on Chinese policies in the South China Sea SCS By providing a detailed account of the events in the SCS and by analyzing power dynamics in the region it identifies the driving forces behind China's assertive foreign policy Considering China's power on a domestic as well as an international level it examines a number of different sources of hard and soft power including military economics geopolitics and domestic legitimacy The author demonstrates that Chinese assertiveness in the SCS can be explained not only by increases in China's power but also by effective reactions to other actors foreign policy changes The book will appeal to scholars in international relations especially those interested in a better understanding of South China Sea developments China's political power and foreign policy and East Asian international affairs *Handbook of Military and Defense Operations Research* Natalie M. Scala,James P. Howard, II,2020-02-10 Operations research OR is a core discipline in military and defense management Coming to the forefront initially during World War II OR provided critical contributions to logistics supply chains and strategic simulation while enabling superior decision making for Allied forces OR has grown to include analytics and many applications including

Containing Tehran Seth G. Jones, 2020-02-28 Following the U S killing of Qasem Soleimani head of the Islamic Revolutionary Guard Corps Quds Force IRGC QF the United States and Iran are involved in an escalating conflict What is badly needed now is a coherent long term U S strategy to deal with Iran in ways that protect U S national security and leverage U S partners The United States maximum pressure campaign has not led to a change in Iran s behavior at least not yet though U S sanctions have severely damaged Iran s economy As this CSIS report highlights with new data and analysis the IRGC QF has supported a growing number of non state fighters in Yemen Syria Iraq Lebanon Afghanistan and Pakistan including nearly a 50 percent increase since 2016 Thanks to Iran these forces are better equipped with more sophisticated weapons and systems This report also uses satellite imagery to identify an expansion of IRGC QF linked bases in countries like Iran and Lebanon to train non state fighters Iran has constructed more sophisticated and longer range ballistic and cruise missiles and conducted missile attacks against countries like Saudi Arabia In addition Iran has developed offensive cyber capabilities and used them against the United States and its partners In the nuclear arena Iran has ended commitments it made to limit uranium enrichment production research and expansion raising the prospect of Iranian nuclear weapons Moving forward the United States should implement a containment strategy against Iran that attempts to de escalate the current military situation and work toward achieving several goals Prevent Iran from becoming a regional hegemon capable of dominating other states in the Middle East Stop nuclear proliferation in the region and prevent Iran from developing nuclear weapons including thwarting Iran from pursuing weapons grade uranium enrichment warhead development and plutonium reprocessing Curb significant Iranian military political and ideological expansion in the region including the export of Iran s revolutionary ideology Encourage a process of change inside Iran toward a more pluralistic political and economic system in which the power of the clerical establishment is gradually reduced This report highlights a range of weaknesses that make Iran vulnerable to containment and lays out the political military economic and informational components of such a strategy The United States needs to credibly demonstrate that its policy toward Iran is not a blueprint for an endless struggle but instead an effort to encourage Iran to be more democratic and open as political and economic change must be driven by Iranians themselves

Measuring National Power in the Postindustrial Age ,2000 The arrival of postindustrial society has given rise to the suspicion that the traditional bases of national power have been

fundamentally transformed and as such that the indices used to measure the relative power of national should be reassessed as well This suspicion has special resonance given the fact that countries like the Soviet Union and Iraq classified as relatively significant powers by some aggregate indicators of capability either collapsed through internal enervation or proved utterly ineffectual when their capabilities were put to the test in war Economic Developments In India : Monthly Update, Volume -86 Analysis, Reports, Policy Documents Editors : Raj Kapila & Uma Kapila,2005
