Measuring Space In One Two And Three Dimensions Casebook:

Measuring Space in One, Two, and Three Dimensions Deborah Schifter, 2002 Teachers and students examine different aspects of size develop facility in composing and decomposing shapes and examine different sizes to develop a Geometry Deborah Schifter, Virginia Bastable, Susan Jo Russell, Kristine Reed Woleck, 2017 The Measuring Space in One Two and Three Dimensions Casebook was developed as the key resource for participants Developing Mathematical Ideas seminar experience The thirty cases written by teachers describing real situations and actual student thinking in their classrooms provide the basis of each session s investigation of specific mathematical concepts and teaching The Mathematical Education of Teachers Conference Board of the Mathematical Sciences, 2001 A report on the strategies state of current thinking on curriculum and policy issues affecting the mathematical education of teachers with the goal of stimulating campus efforts to improve programs for prospective K 12 teachers Its primary audience is members of the mathematics faculties and administrators at colleges and universities but the report may also be of interest to math supervisors in school districts and state education departments to education policy bodies at the state and national levels and to accreditation and certification organizations c Book News Inc Handbook of Research on Online Pedagogical Models for Mathematics Teacher Education Wachira, Patrick, Keengwe, Jared, 2019-11-29 Online learning has become an important vehicle for teacher and student learning When well designed online environments can be very powerful in a way that is consistent with the goals of inquiry experimentation investigation reasoning and problem solving so learners can develop a deep understanding of a subject Some subjects however are not well suited for this type of learning due to the need for small group collaborating and hands on problem solving The Handbook of Research on Online Pedagogical Models for Mathematics Teacher Education provides innovative insights into technology applications and tools used in teaching mathematics online and provides examples of online learning environments and platforms that are suitable for meeting math education goals of inquiry investigation reasoning and problem solving The content within this publication examines access to education professional development and web based learning It is designed for teachers curriculum developers instructional designers educational software developers IT consultants higher education faculty policymakers administrators researchers academicians and students Teachers' Professional Development and the Elementary Mathematics Classroom Sophia Cohen, 2004-07-13 This book illustrates the experiences of elementary school teachers across one year s time as they participated in a teacher development seminar focused on mathematics and as a result changed their beliefs their knowledge and their practices It explores these experiences as a means of understanding the learning that takes a teacher from a more traditional teaching practice to one that is focused on the ideas and understandings that students and teachers have of the subject matter The work emerges from and reports on a unique data set from a two year study of teacher learning that was funded by the Spencer and MacArthur foundations The teachers whose work is at the center of this study were participants

in the Developing Mathematical Ideas seminar DMI a mathematics teacher development seminar for elementary school teachers This seminar is one example of intensive domain specific professional development In this seminar teachers study elementary mathematics content to deepen their own understanding of it they study the development among children of the ideas central to elementary mathematics and they experience a teaching and learning environment consistent with the pedagogy envisioned by the National Council for Teachers of Mathematics Principles and Standards for School Mathematics The seminar is a nationally available teacher development curriculum thus interested educators can gain access to the resources necessary to offer similar seminars in their own communities Teachers Professional Development and the Elementary Mathematics Classroom Bringing Understandings to Light will be widely interesting to a broad audience including mathematics teacher educators teacher education researchers policymakers and classroom teachers It will serve well as a text in a range of graduate courses dealing with teacher cognition knowledge for teaching mathematics methods psychology of learning and pedagogical theory Handbook of Research on Transforming Teachers' Online Pedagogical Reasoning for Engaging K-12 Students in Virtual Learning Niess, Margaret L., Gillow-Wiles, Henry, 2021-06-25 The COVID 19 pandemic drastically transformed the classroom by keeping students and teachers apart for the sake of safety As schools emptied remote learning rapidly expanded through online services and video chatrooms Unfortunately this disrupted many students and teachers who were not accustomed to remote classrooms This challenge has forced K 12 teachers to think differently about teaching Unexpectedly and with little time to prepare they have been confronted with redesigning their curriculum and instruction from face to face to online virtual classrooms to protect students from the COVID 19 virus while ensuring that these new online initiatives remain sustainable and useful in the post pandemic world As teachers learn to take advantage of the affordances and strengths of the multiple technologies available for virtual classroom instruction their instruction both in online and face to face will impact what and how students learn in the 21st century The Handbook of Research on Transforming Teachers Online Pedagogical Reasoning for Engaging K 12 Students in Virtual Learning examines the best practices and pedagogical reasoning for designing online strategies that work for K 12 virtual learning The initial section provides foundational pedagogical ideas for constructing engaging virtual learning environments that leverage the unique strengths and opportunities while avoiding the weaknesses and threats of the online world The following chapters present instructional strategies for multiple grade levels and content areas best practices that work clearly describing why they work and the teachers pedagogical reasoning that supports online implementations The chapters provide ways to think about teaching in virtual environments that can be used to guide instructional strategy choices and recognizes the fundamental differences between face to face and virtual environments as an essential design component Covering such topics as K 12 classrooms pedagogical reasoning and virtual learning this text is perfect for professors teachers students educational designers and developers instructional technology faculty distance learning faculty and researchers interested in the subject Cases in Mathematics Teacher Education Margaret S. Smith, Susan N. Friel, 2015-10-01 Orginally published in 2008 The goal of AMTE Monograph 4 Cases in Mathematics Teacher Education Tools for Developing Knowledge Needed for Teaching is to provide detailed accounts of case use that will inform the mathematics teacher education community on the range of ways in which cases can be used to foster teacher learning and the capacity to reflect on and learn from teaching The chapters in this monograph describe the use of cases with preservice and practicing teachers at all levels K 12 in content and methods courses as well as professional development settings and focus on developing various aspects of teachers knowledge base i e content pedagogy and students as learners Hence Monograph 4 should prove to be a superb resource for mathematics teacher educators Developing Teachers and Developing Schools in Changing Contexts Zijian Li, Ling-po Shiu, 2008 More than ever schools are regarded as a learning community in which its leaders and therefore the school's primary agents of change are expected to stay abreast of the latest developments in education and instruction This book provides important insights for improving professional development activities school university partnerships and networks educational management as well as teaching and learning in schools and colleges It builds on research conducted in the 1990s during which the pursuit of school improvement and skill development first converged Instruction in Geometry and Measurement Margaret Schwan Smith, Edward A. Silver, Mary Kay Stein, 2005-01-01 Helping students develop an understanding of important mathematical ideas is a persistent challenge for teachers In this book one of a three volume set well known mathematics educators Margaret Smith Edward A Silver and Mary Kay Stein provide teachers of mathematics the support they need to improve their instruction. They focus on ways to engage upper elementary middle school and high school students in thinking reasoning and problem solving to build their mathematics understanding and proficiency The content focus of Volume One is rational numbers and proportionality Using materials that were developed under the NSF funded COMET Cases of Mathematics to Enhance Teaching program each volume in the set features cases from urban middle school classrooms with ethnically racially and linguistically diverse student populations Each case illustrates an instructional episode in the classroom of a teacher who is implementing standards based instruction the teachers perspective including their thoughts and actions as they interact with students and with key aspects of mathematical content cognitively challenging mathematics activities that are built around samples of authentic classroom practice and facilitation chapters to help professional developers teach the cases including specific guidelines for facilitating discussions and suggestions for connecting the ideas presented in the cases to a teacher's own practice As a complete set this resource provides a basis on which to build a comprehensive professional development program to improve mathematics instruction and student learning Mathematics for Elementary School Teachers Tom Bassarear, 2004-03-01 Mathematics for Elementary School Teachers 3 e offers pre service teachers a comprehensive mathematics course designed to foster concept development through examples investigations and explorations Visual icons throughout the main text allow

instructors to easily connect the text to the hands on activities in the corresponding Explorations Manual Classroom Connections in both the exposition and the exercises guide students to connect the mathematics being taught with effective teaching strategies Students must analyze educational mathematics research evaluate common student errors and see alternative solution methods enabling them to better prepare for their future teaching careers Investigations encourage students to think about a topic before discussing the math or viewing examples These can be used as classroom discussion questions for independent reading or as review Multiple Strategies presented throughout the examples and exposition of the text allow students to analyze numerous approaches to solving problems

Learning and Teaching Measurement Douglas H. Clements, 2003 Measurement can develop in the earliest years from children's experience and it readily lends itself to real world application Focusing on research and practise NCTM's 2003 yearbook presents current thinking about the learning and teaching of measurement including students understanding the mathematics of measurement estimation and approximation connections and pedagogy The companion booklet which not only illustrates some of the issues from the yearbook but also contains activities that go beyond the content contains teaching notes and ready to use handouts

Developing Technology-Rich Teacher Education Programs: Key Issues Polly, Drew, Mims, Clif, Persichitte, Kay A., 2012-01-31 This book offers professional teacher educators a rare opportunity to harvest the thinking of pioneering colleagues spanning dozens of universities and to benefit from the creativity scholarship hard work and reflection that led them to the models they describe Provided by publisher Measuring Space in One, Two, and Three Dimensions Deborah Schifter, Virginia Bastable, Susan Jo Russell, 2015-03-05 What are the big ideas in elementary school mathematics How do students understand them How can teachers best offer help and support as their students grapple with these ideas These and other questions about the practice of teaching K 8 mathematics are the focus of Developing Mathematical Ideas DMI a powerful engaging professional development curriculum for current and future teachers At the heart of a DMI seminar is the casebook sets of classroom episodes cases illustrating student thinking as described by their teachers In addition to case discussions the curriculum offers teachers opportunities to explore mathematics in lessons led by facilitators to share and discuss the work of their own students to view and discuss DVD clips of mathematics classrooms to write their own classroom cases and to read overviews of related research
