References and Notes 1 It can be argued that the open source community has produced really only two essential products Apache undeniably the most popular web server and Linux although both are essentially reincarnations of prior systems Both are also somewhat products of their times Apache filled a hole in the then emerging Web at a time no platform vendor really knew how to step in and Linux filled a hole in the fragmented Unix market colored by the community's general anger against Microsoft 2 Evans Marketing Services Linux Developers Survey Volume 1 March 2000
