Loftus, E. F. Loftus, 2019-01-15 Over the past 20 years the study of human memory has become an increasingly popular topic of study for psychologists and since the late 1960s a new framework for studying memory has begun to take shape. It is the purpose of this book to present a broad overview of this framework including descriptions of 1 the major theoretical components of the framework and 2 the critical research findings that justify the establishment of these components and illuminate the mechanisms by which they operate. The book is not meant to constitute an exhaustive review of the enormous research literature that has accrued over the years. The authors deliberately avoid wading into masses of detail on any given topic area and we deliberately sidestep a number of current theoretical controversies. Instead, this book has been planned to be a guide and an introduction for the student or interested layman with little or no background in the area of memory as a field of psychological inquiry.

Inhabiting Memory in Canadian Literature / Habiter la mémoire dans la littérature canadienne Benjamin Authers, Maïté Snauwaert, Daniel Laforest, 2017-11-30 This book examines the cultural work of space and memory in Canada and Canadian literature and encourages readers to investigate Canada within its regional, national, and global contexts. It features seven chapters in English and five in French with a bilingual introduction. The contributors invite us to recognize local intersections that are so easily overlooked yet are so important. They reveal the unities and fractures in national understanding, telling stories of otherness and marginality and of dislocation and unbelonging. Ce livre examine l'importance culturelle de l'espace et de la mémoire en contexte canadien et plus spécifiquement dans les littératures du pays afin d'inviter des lectures neuves des questions régionales, nationales et globales. Il rassemble sept chapitres en anglais et cinq en français en plus d'une introduction bilingue. Les contributions favorisant des approches thématiques et théoriques variées sont réunies par leur désir de mettre en lumière des croisements indits entre la mémoire et l'espace en tant qu'ils définissent certains des problèmes les plus brûlants de notre époque au Canada. S'y trouve le libre équilibre fort instable entre unités unitaires et fractures communautaires entre altérité et marginalité ou entre dislocation et désappartenance.

From Loss to Memory Anna Huttenlocher, 2023-07-06 How do the billions of connections between neurons in our brain change as we learn and remember? This is the story of the discovery and the discoverer of synaptic pruning, the process of synapse elimination central to making us who we are. Taking the reader from Professor Peter Huttenlocher's childhood in wartime and post-war Germany to his emigration to the US to reunite with his mother and the launch and progress of a career in medicine and research, we uncover the motivations and process of scientific discovery that led to an unexpected leap in our understanding of the human brain. Decades after the discovery, the importance of synaptic pruning to early learning, autism, schizophrenia, Alzheimer's disease, and other conditions are now in the process of being uncovered.

Dayton Duncan, Ken Burns, 2023-10-10 The epic story of the buffalo in America from prehistoric times to today a moving and beautifully illustrated work of natural history inspired by the PBS series American Buffalo The American buffalo our nation's official mammal is an improbable shaggy beast that has found itself at the center of many of our most mythic and sometimes heartbreaking tales The largest land animals in the Western Hemisphere they are survivors of a mass extinction that erased ancient species that were even larger For nearly 10 000 years they evolved alongside Native people who weaved them into every aspect of daily life relied on them for food clothing and shelter and revered them as equals Newcomers to the continent found the buffalo fascinating at first but in time they came to consider them a hindrance to a young nation's expansion And in the space of only a decade they were slaughtered by the millions for their hides with their carcasses left to rot on the prairies Then teetering on the brink of disappearing from the face of the earth they would be rescued by a motley collection of Americans each of them driven by different and sometimes competing impulses This is the rich and complicated story of a young republic's heedless rush to conquer a continent but also of the dawn of the conservation era a story of America at its very best and worst
