Lawrie's Meat Science R. A. Lawrie, David Ledward, 2014-01-23 Lawrie's Meat Science has established itself as a standard work for both students and professionals in the meat industry. Its basic theme remains the central importance of biochemistry in understanding the production, storage, processing, and eating quality of meat. At a time when so much controversy surrounds meat production and nutrition, Lawrie's meat science, written by Lawrie in collaboration with Ledward, provides a clear guide which takes the reader from the growth and development of meat animals through the conversion of muscle to meat to the point of consumption. The seventh edition includes details of significant advances in meat science which have taken place in recent years, especially in areas of eating quality of meat and meat biochemistry. A standard reference for the meat industry. Discusses the importance of biochemistry in production, storage, and processing of meat. Includes significant advances in meat and meat biochemistry.

Islamic Perspectives on Marketing and Consumer Behavior: Planning, Implementation, and Control Rishi, Bikramjit, 2015-02-28 In today's increasingly connected business world, there is new pressure for local brands to go global and a need for already global corporations to cater to new audiences that were previously ignored. *Islamic Perspectives on Marketing and Consumer Behavior: Planning, Implementation, and Control* brings together the best practices for entry and expansion of global brands into Islamic countries. This book is an essential reference source for professionals looking to incorporate the laws and practices of Islam into the global presence of their company and presents a cutting edge look at worldwide retail for marketing researchers and academics.

A View from the Herd Richard W. Redding, 2024-04-15 In this book, the late Richard Redding synthesizes his decades-long work on the ancient agricultural economy of Egypt. Drawing on a diverse range of data, including zooarchaeology, ancient texts, and iconographic sources, he explores the role of cattle, sheep, goats, and pigs in the economic infrastructure of ancient, mainly Pharaonic Egypt and the complexities of decision-making processes that shaped the use and management of these vital livestock resources. The book integrates zooarchaeological and historical data with information on unimproved breeds of cattle, sheep, goats, and pigs from Egypt and the broader Middle East, as well as considers texts and tomb paintings. Redding argues that understanding the interplay between economic forces, environmental factors, and herders' knowledge of animal characteristics is crucial for unraveling the dynamic nature of decision-making. The author explores herd growth rates, meat yields, caloric and nutritional benefits, and optimal herd structures. By employing that data and ecological models, including the annual Nile floods, he provides insights into the adaptive strategies employed by ancient Egyptian herders. In this way, Redding examines the economic rationale behind ancient Egyptian herding communities. His models of Pharaonic herding strategies generate expectations tested using zooarchaeological evidence. Redding long advocated the modeling approach; he demonstrates here understanding zooarchaeological data through a lens of animal biology and environmental context. This work should therefore spark wide interest among archaeologists working in disparate regions.

Emerging Technologies for Food Quality and

Food Safety Evaluation Yong-Jin Cho, Sukwon Kang, 2011-03-09 Even though the perception of food quality may depend on its hedonic and often subjective attributes it is essential to quantitatively evaluate its quality and safety Fortunately the advent of sophisticated systems including nondestructive testing techniques has made it possible to definitively evaluate food quality Reflecting these advances

Electrophoresis Kiumars Ghowsi, 2012-11-07 Electrophoresis is defined as the transport of electrically charged particles in a direct current electric field Electrophoretic separation is based on differential rates of migration in the bulk of the liquid phase and is not concerned with reactions occurring at the electrodes In the early days electrophoresis was carried out either in free solution or in the supporting media such as paper cellulose acetate starch agarose and polyacrylamide gel In between 1950 to 1970 an enumeration of techniques and instrumentation for Electrophoresis were developed The present book contains few fundamentals on capillary electrophoresis and diverse application of electrophoresis in general We hope this collection will entertain the readers who are interested in fundamental as well as applications of electrophoresis in general
