Media And Entertainment Industries Readings In Mass Communications:

The Media and Entertainment Industries Albert N. Greco, 2000 Mass media formats from books to the Internet have had a revolutionary effect on political social economic intellectual educational and religious life This text provides an objective overview of the topic **Mass Media** James B. Martin, 2002 Mass media has become an integral part of the human

experience News travels around the world in a split second affecting people in other countries in untold ways Although being on top of the news may be good at least for news junkies mass media also transmits values or the lack thereof condenses complex events and thoughts to simplified sound bites and often ignores the essence of an event or story The selective bibliography gathers the books and magazine literature over the previous ten years while providing access through author title and subject indexes **Arguing for a General Framework for Mass Media Scholarship** W. James

Potter, 2008-12-11 Arguing for a General Framework for Mass Media Scholarship challenges scholars and students to consider and reconsider what we know about media and how we think about media As such the book provides an important framework for thinking about knowledge regardless of the discipline The text provides all of the necessary tools to move the field forward in a way that will increase the rigor of the work being done and augment the overall profile of the discipline Dana Mastro University of Arizona In this groundbreaking book W James Potter presents an innovative perspective to media scholars and students who are frustrated with the fragmentation of research findings across so many journals books and fields Arguing for a General Framework for Mass Media Scholarship presents a clear plan for a more efficient way to build knowledge about the mass media so that it can be better organized and made more useful Key Features Conducts an in depth analysis of mass media scholarship s four major facets of effects content audiences and organizations Presents a significant shift in conceptualizing media effects and ways research can be conducted to generate more useful knowledge about media influence Develops narrative line as a tool to guide analyses about how content decisions are made by producers Synthesizes a system of explanation about why audiences attend to certain messages and how individuals construct meaning from those messages Incorporates an analysis of mass media organizations to provide greater context of understanding messages and their effects on individuals and macro units in society The book will play an important role in providing structure to a broad fragmented discipline I believe it will at the very least create important dialogues about what we now know understand about areas of mass media and where we should move as a discipline This book is clearly a call to arms for mass media scholars to ratchet up the quality of research and what we know to see the interconnections within and among strands of scholarship and to move forward in a more efficient organized manner Professor Potter should be commended for this Roger Cooper Ohio University This book is that call to action that comes forward every few years to wake us up and challenge our ways of doing things not by being radical but via synthesis I ve been waiting for several years for a book like this Sahara Byrne Cornell University **Global Entertainment Media** Tanner Mirrlees, 2013-04-02 A critical cultural materialist introduction to the

study of global entertainment media In Global Entertainment Media Tanner Mirrlees undertakes an analysis of the ownership production distribution marketing exhibition and consumption of global films and television shows with an eye to political economy and cultural studies Among other topics Mirrlees examines Paradigms of global entertainment media such as cultural imperialism and cultural globalization The business of entertainment media the structure of capitalist culture creative industries financiers producers distributors and exhibitors and trends in the global political economy of entertainment media The governance of global entertainment media state and inter state media and cultural policies and regulations that govern the production distribution and exhibition of entertainment media and enable or impede its cross border flow The new international division of cultural labor NICL the cross border production of entertainment by cultural workers in asymmetrically interdependent media capitals and economic and cultural concerns surrounding runaway productions and co productions The economic motivations and textual design features of globally popular entertainment forms such as blockbuster event films TV formats glocalised lifestyle brands and synergistic media The cross cultural reception and effects of TV shows and films The World Wide Web digitization and convergence culture
