Media Front:

An Introduction to Fronts in Random Media Jack Xin, 2009-06-17 This book aims to give a user friendly tutorial of an interdisciplinary research topic fronts or interfaces in random media to senior undergraduates and beginning graduate students with basic knowledge of partial differential equations PDE and probability The approach taken is semiformal using elementary methods to introduce ideas and motivate results as much as possible then outlining how to pursue rigorous theorems with details to be found in the references section Since the topic concerns both differential equations and probability and probability is traditionally a quite technical subject with a heavy measure theoretic component the book strives to develop a simplistic approach so that students can grasp the essentials of fronts and random media and their applications in a self contained tutorial The book introduces three fundamental PDEs the Burgers equation Hamilton Jacobi equations and reaction diffusion equations analysis of their formulas and front solutions and related stochastic processes It builds up tools gradually so that students are brought to the frontiers of research at a steady pace A moderate number of exercises are provided to consolidate the concepts and ideas The main methods are representation formulas of solutions Laplace methods homogenization ergodic theory central limit theorems large deviation principles variational principles maximum principles and Harnack inequalities among others These methods are normally covered in separate books on either differential equations or probability It is my hope that this tutorial will help to illustrate how to combine these tools in solving concrete problems

Islamic State's Online Activity and Responses Maura Conway, Stuart Macdonald, 2020-06-09 Islamic State's Online Activity and Responses provides a unique examination of Islamic State's online activity at the peak of its golden age between 2014 and 2017 and evaluates some of the principal responses to this phenomenon. Featuring contributions from experts across a range of disciplines, the volume examines a variety of aspects of IS's online activity, including their strategic objectives, the content and nature of their magazines and videos, and their online targeting of females and depiction of children. It also details and analyses responses to IS's online activity, from content moderation and account suspensions to informal counter-messaging and disrupting terrorist financing, and explores the possible impact of technological developments such as decentralised and peer-to-peer networks going forward. Platforms discussed include dedicated jihadi forums, major social media sites such as Facebook, Twitter, and YouTube, and newer services including Twister. Islamic State's Online Activity and Responses is essential reading for researchers, students, policymakers, and all those interested in the contemporary challenges posed by online terrorist propaganda and radicalisation. The chapters were originally published as a special issue of *Studies in Conflict & Terrorism: Media Discourse*. Mary Talbot, 2007-09-15 This lively and accessible study of media and discourse combines theoretical reflection with empirical engagement and brings together insights from a range of disciplines. Within media and cultural studies, the study of media texts is dominated by an exclusive focus on representation. This book adds long overdue attention to social interaction. The book is divided into two sections. The first outlines key theoretical issues and concepts, including informalisation, genre hybridisation, positioning, dialogism, and discourse. The second is a sustained interrogation of social interaction in and around media. Re-examining issues of representation and interaction, it critically assesses work on the para-social and broadcast sociability, then explores distinct sites of interaction: production communities, audience communities, and interactivity with audiences. The Al-Qaeda Doctrine Donald Holbrook, 2014-07-31 Ever since it was first established, the senior leadership of Al-Qaeda has sought to communicate its core values, rationalizations, and principles to the world. Altogether, these statements convey Al-Qaeda's doctrine and the beliefs for which the leadership claims to be fighting. This volume in the *New Directions in Terrorism Studies* series analyzes over 250 statements made by the organization's two key leaders, Ayman al-Zawahiri and Usama Bin Ladin, over the last two decades. It provides an in-depth and systematic analysis of these communications, showing which key issues emphasized by the two leaders evolved over time and highlighting their core principles. It explores Al-Qaeda's problem diagnosis, the solutions offered by its two leaders, their escalating (although often contradictory) approach towards violence, and their chosen communication strategy for different types of audiences. The book shows how Al-Qaeda's leadership began to develop an increasingly critical approach towards Islam in the wake of the 9/11 attacks and discusses tensions that may undermine the resilience of its doctrine. This unique evidence-based analysis of Al-Qaeda will attract academics specializing in terrorism and counterterrorism, as well as the policy community.
