Sean Monroe, 2011-10-20 Have you ever wondered why we do certain things in mathematics Why do we count decimal points when multiplying with decimals or why do we invert and multiply when multiplying with fractions Or were you frustrated when you asked for a reason why we convert mixed numbers to improper fractions that way and the teacher simply said That is the way I learned how This book attempts to answer these questions along with dozens more If you have ever wondered why we do something in mathematics this is the book for you Here are a few of the mysteries that are unraveled in this book What can't we divide by zero Why do we move the decimal point when dividing by a decimal Why is a negative times a negative a positive Why is any number raised to the zero power equal to one Reading, Writing, and Proving Ulrich

Daepp, Pamela Gorkin, 2011-06-23 This book which is based on Polya's method of problem solving aids students in their transition from calculus or precalculus to higher level mathematics The book begins by providing a great deal of guidance on how to approach definitions examples and theorems in mathematics and ends with suggested projects for independent study Students will follow Polya's four step approach analyzing the problem devising a plan to solve the problem carrying out that plan and then determining the implication of the result In addition to the Polya approach to proofs this book places special emphasis on reading proofs carefully and writing them well The authors have included a wide variety of problems examples illustrations and exercises some with hints and solutions designed specifically to improve the student's ability to read and

write proofs Historical connections are made throughout the text and students are encouraged to use the rather extensive bibliography to begin making connections of their own While standard texts in this area prepare students for future courses in algebra this book also includes chapters on sequences convergence and metric spaces for those wanting to bridge the gap between the standard course in calculus and one in analysis
