major publications and other available resources We will address Survey of the languages of the area organized along genetic lines with discussion of relevant political and cultural background issues Theoretical descriptive and typological issues Genetic classification and historical linguistics Areal and contact linguistics Other areas of interest such as sociolinguistics semantics writing systems etc Resources major monographs and monograph series dictionaries journals electronic data bases etc Grammar sketches of languages representative of the genetic and structural diversity of the region

Numbers as Cognitive Tools César Frederico dos Santos, 2025-08-19 This book offers a novel account of the nature of numbers firmly grounded in results from numerical cognition and the philosophy of mathematics Drawing on empirical data on the human experience of what we call numbers the author shows that numbers do not exist as abstract objects but that the idea that they do is a useful cognitive tool Contrary to the platonist view according to which arithmetic is true of a realm of abstract entities the nominalistic account presented in this book shows arithmetic to be true of descriptions of structural properties of techniques such as counting and calculating procedures This book is of interest to both philosophers and cognitive scientists who want to have a deeper understanding of what numbers are **Language in Time and Space**

Brigitte L.M. Bauer, Georges-Jean Pinault, 2011-03-01 The honoree of this Festschrift has for many years now marked modern trends in diachronic and synchronic linguistics by his own publications and by stimulating those of numerous others This collection of articles presents data oriented studies that integrate modern and traditional approaches in the field thus reflecting the honoree's contribution to contemporary linguistics The articles relate to comparative data from early Indo European languages and a variety of other languages and discuss the theoretical implications of phenomena such as linguistic universals reconstruction and language classification *Tocharian Studies* Václav Blažek, 2014-01-01 Kniha je

souborem studi v novém tocharském etymologii a gramatice a obsahuje i dva životopisy a bibliografický portrét dvou osobností tocharistiky Wenera Wintera a Pavla Pouchy **Classifier Structures in Mandarin Chinese** Niina Ning Zhang, 2013-05-28 This monograph addresses fundamental syntactic issues of classifier constructions based on a thorough study of a typical classifier language Mandarin Chinese It shows that the contrast between count and mass is not binary Instead there are two independently attested features Numerability the ability of a noun to combine with a numeral directly and Delimitability the ability of a noun to be modified by a delimitive modifier such as size shape or boundary modifier Although all nouns in Chinese are non count nouns there is still a mass non mass contrast with mass nouns selected by individuating classifiers and non mass nouns selected by individual classifiers Some languages have the counterparts of Chinese individuating classifiers only some languages have the counterparts of Chinese individual classifiers only and some other languages have no counterpart of either individual or individuating classifiers of Chinese The book also reports that unit plurality can be expressed by reduplicative classifiers in the language Moreover for the constituency of a numeral expression an individual individuating or kind classifier combines with the noun first and then the numeral is integrated but a

partitive or collective classifier like a measure word combines with the numeral first before the noun is integrated into the whole nominal structure Furthermore the book identifies the syntactic positions of various uses of classifiers in the language A classifier is at a functional head position that has a dependency with a numeral or a position that has a dependency with a generic or existential quantifier or a position that represents the singular plural contrast or a position that licenses a delimitive modifier when the classifier occurs in a compound

A Grammar of Nuosu Matthias Gerner, 2013-10-14 This is the first modern grammar of Nuosu written in English Nuosu belongs to a little known section of Tibeto Burman The 25 Million ethnic Nuosu are part of the Yi nationality and live in Sichuan China This grammar informs Tibeto Burman linguists typologists scholars of language contact and foreign learners of Nuosu

The Oxford Handbook of Word Classes Eva van Lier, 2023 This handbook explores multiple facets of the study of word classes also known as parts of speech or lexical categories The contributions showcase the importance of word classes for the whole discipline of linguistics while also highlighting the many ongoing debates in the areas and outlining fruitful avenues for future research

A Typological Approach to Grammaticalization and Lexicalization Janet Zhiqun Xing, 2020-01-20 Based on comparative analyses of diachronic data the articles in this volume address both theoretical and methodological issues in the study of grammaticalization and lexicalization in both Eastern and Western languages The central question raised and discussed in this volume is how if any typological properties of the two genetically unrelated language families interact with the processes of grammaticalization and lexicalization

Studies of Chinese Linguistics Janet Zhiqun Xing, 2009-02-01 The nine essays in this volume present the most recent developments in the study of Chinese linguistic research using functional approaches Topics discussed in the volume include Chinese typology word order variation word formation semantic change cognition discourse analysis interface among syntax semantics and pragmatics and grammaticalization *Studies of Chinese Linguistics* will be a valuable and stimulating reference for graduate students and researchers interested in functional linguistics Readers in general and applied linguistics will also appreciate the insights it offers into the interaction of Chinese form and function

The History of English in a Social Context Dieter Kastovsky, Arthur Mettinger, 2011-07-20 *TRENDS IN LINGUISTICS* is a series of books that open new perspectives in our understanding of language The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science *TRENDS IN LINGUISTICS* considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language *TRENDS IN LINGUISTICS* publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints High quality

The Diachrony of Classification Systems William B.

McGregor, Søren Wichmann, 2018-05-14 Classification is a popular topic in typological descriptive and theoretical linguistics. This volume is the first to deal specifically with the diachrony of linguistic systems of classification. It comprises original papers that examine the ways in which linguistic classification systems arise, change, and dissipate in both natural circumstances and in circumstances of attrition. The role of diffusion in such processes is explored, as well as the question of what can be diffused. The volume is not restricted to nominal systems of classification but also includes papers dealing with the less well-known phenomenon of verbal classification. Languages from a wide spread of world regions are examined, including Africa, Amazonia, Australia, Eurasia, Oceania, and Mesoamerica. The volume will be of interest to linguistic typologists, descriptive linguists, historical linguists, and grammaticalization theorists.

Historical Linguistics 2011 Ritsuko

Kikusawa, Lawrence A. Reid, 2013-11-14 This volume of selected papers from the 20th International Conference on Historical Linguistics, Osaka, Japan, July 2011, presents a set of stimulating and ground-breaking studies on a wide range of languages and language families. As the scope of studies that can be characterized as Historical Linguistics has expanded, ICHL conferences have likewise seen a broadening of topics presented, and this conference was no exception, reflected by the inclusion in this volume of a plenary presentation on the grammaticalization of expressions of negation and gendered kinship in American Sign Language. Three other papers propose new views of the role of grammaticalization in English, Chinese, and Niger-Congo languages. Four of the papers discuss specific problems that arise in the comparison and reconstruction of linguistic features in a range of languages from Asia, Europe, and South America. The last six studies deal with innovative approaches to the historical development of suppletion in Romance languages, possessive classifiers in Austronesian, universal quantifiers in Germanic, adjectival sequences in English, exaptation in Celtic and Early English, and drift in Ancient Egyptian.

Nominal Classification in Asia and Oceania Marc Allasonnière-Tang, Marcin Kilarski, 2023-12-01 Linguists have long been interested in systems of nominal classification due to their diverse functions as well as cognitive and cultural correlates. Among others, ongoing research has focused on semantic, functional, and morphosyntactic properties of complex systems such as co-occurring gender and numeral classifiers. Such approaches have typically focused on the languages of north-western South America and Papua New Guinea. This volume proposes to fill in a gap in existing research by focusing on Asia, based on case studies from languages belonging to a wide range of families, i.e. Austroasiatic, Austronesian, Dravidian, Hmong-Mien, Indo-European, Mongolic, Sino-Tibetan, and Tai-Kadai, as well as the language isolate Nivkh. Gender and classifiers in these languages are approached within several different perspectives, i.e. functional, typological, and diachronic, thus revealing complex patterns in their lexical and pragmatic functions as well as origin, development, and loss. Describing and analysing such properties is a unique and innovative contribution of the volume.
