Williamson,2006-01-01 The purpose of this text is to act as a source of information and a reference for the busy pharmacist at work when confronted by a query regarding complementary and alternative medicine CAM Practices in Children's Nursing E-Book Ethel Trigg,Toby Mohammed,Louise Ford,Hermione Montgomery,Vicky Vidler,2010-06-17 The skills required by children s nurses are many and varied and are undertaken in a variety of settings Sick children are cared for at home in children s units and hospitals and sometimes in adult wards In addition children with disabilities may need nursing care while at special schools or in residential settings This book provides a clinical manual of common practices Each practice is research based and presented in a common format which covers Objectives Rationale Factors to note Guidelines Positioning Equipment Method Special observations and possible complications References and further reading The guidelines have been written specifically for children s nursing by contributors from well known children s units They are not simply adaptations from adult practices and therefore recognise the unique differences between adult and children s nursing The introductory section covers common concepts and infection control There is also a chapter on complementary therapies and an appendix on the use of play as a distraction All hospital and community nurses dealing with children whether at home in specialised units or in community settings will find the book of great practical help The common format of each practice makes the book easy to use and refer to in a clinical setting Each practice is based on the latest research to ensure it is evidence based and up to date Introductory chapters cover issues common to all practices to make the book easier to use The appendix on play reinforces its common usage as a distraction technique A chapter on complementary therapies explains these as they are becoming more widespread All practices have been reviewed by regional centres to avoid parochialism Content reorganised to reflect the Essential Skills Clusters from the NMC New chapter on communicating with children All chapters updated to reflect the current evidence base *An Ethical Framework for Complementary and Alternative Therapists* Julie Stone,2005-06-29 As growing numbers of patients turn to complementary and alternative medicine CAM the focus of attention has largely been on whether these therapies work and whether they are safe These questions are central to further integration of CAM with orthodox medicine But in the absence of formal regulation it is equally critical to consider the ethical dimensions of the CAM therapeutic encounter In this book Julie Stone demonstrates that ethical issues are no less

relevant to CAM therapists than they are to doctors or any other group of health professionals She provides CAM therapists with a detailed framework of the specific ethical issues which affect CAM practice to help practitioners think constructively about how ethics underpin their therapeutic work An Ethical Framework for Complementary and Alternative Therapists encourages critical and reflective practice suggests practical problems to common problems includes illustrative scenarios of ethical dilemmas faced by therapists and summarises key points This timely book offers a comprehensive guide to this important area Its challenging conclusions are as relevant to experienced practitioners as to students and newly qualified therapists This book will also interest policy makers and professional bodies interested in strengthening and enhancing CAM's potential

The Re-Enchantment of the West, Vol 2 Christopher Partridge, 2006-04-20 The Re Enchantment of the West challenges those theories that predict widespread secularization beyond traditional institutional religiosity Spiritualities are emerging that are not only quite different from the those forms of religion that are in decline but are often defined over against them and articulated and passed on in ways quite different from those of traditional religion In particular it is argued that such contemporary Western spirituality is fed by a constantly replenished reservoir of ideas practices and methodologies which is here termed occulture Moreover such occultural ideas both feed into and are resourced by popular culture Indeed popular occulture is a key feature of the re enchantment of the West Demonstrating the significance and ubiquity of these ideas this book examines for example healthcare and nursing contemporary environmentalism psychedelia and drug use the Internet and cyberspirituality belief in UFOs and extraterrestrial life demonology and the contemporary fascination with the figure of Satan the heavy metal subculture popular apocalypticism and millennial violence

Adverse Drug Effects Jennifer Kelly, 2006-02-03 This practical guide to pharmacology is unusual in its approach Instead of examining the normal effects of drugs this book looks at the adverse effects With the advent of nurse

prescribing it is essential that nurses are familiar with the common adverse effects how to recognise them and how to deal with them The book is divided into three sections The first examines the pharmacology of drugs i e what the body does to drugs pharmacokinetics what the drugs do to the body pharmacodynamics and how adverse reactions can result from these two processes Section two looks at putting the scientific knowledge into action through an examination of nurse administration and prescribing drug development and the issue of patient compliance and empowerment Section three consists of twelve case studies which describe various scenarios in which there have been adverse drug effects Throughout the book concepts are explained using examples so that the nurse can relate the concept of adverse effect to the drugs she is familiar with

The Re-Enchantment of the West Christopher Partridge, 2005-03-04 As a book about emergent spirituality in the contemporary West it focuses on the nature evolution and significance of new forms of religion and alternative spiritualities Part One of the book provides the theoretical background and guides the reader through some of the principal debates After an overview of the secularization thesis which argues that the West is becoming increasingly disenchanted the second chapter turns to the sociological analysis of new religions and alternative spiritualities Particular attention is given to the ideas of the sociologist of religion Ernst Troeltsch especially his enigmatic analysis of the emergence mystical religion which presciently provides helpful insights into understanding the contemporary alternative religious milieu Against sociologists such as Bryan Wilson and Steve Bruce this and the subsequent chapter argues that rather than being insignificant new forms of spirituality are actually proving to be a significant part of Western re enchantment Chapter 3 constructs a general theory of the re enchantment of the West Chris Partridge argues that Western Society is permeated by a broad occulture by which he means a reservoir of ideas beliefs theories and practices to which new religions unorthodox spiritualities film and popular music all draw attention This re enchantment of the West should not be seen as a superficial secondary development in the shadow of Christianity In many ways it is a religious phenomenon in its own right Partridge s arguments in this regard are well put and
