Transforming Leadership, Improving the Patient Experience Alan T. Belasen, Ph.D., Barry Eisenberg, Ph.D., Jill Borgos, Ph.D., 2024-02-27

This book focuses on the patient experience as a leadership strategy It explores the relationships between coordinated care expert leadership provider patient communications and the patient experience When clinical and nonclinical staff collaborate effectively healthcare teams can improve patient outcomes prevent medical errors improve efficiency and increase patient satisfaction Surprisingly however healthcare leaders tend to prioritize specific metrics to improve hospital performance and patient satisfaction even though patient experience and provider patient communications are intertwined Determining the most effective strategy for achieving higher levels of service quality and patient satisfaction can prove elusive for providers Consider the evidence a survey in 2012 of more than 17 000 healthcare leaders in North America for example found that leaders perceptions did not always match the data and many hospital leaders overestimated the performance of their hospitals Over 75% of the hospital leaders reported quality of care was something their hospital did well while their patients on average rated them lower on perceived service quality Ten years later in 2022 only a few providers integrated best practices to achieve high patient satisfaction which severely impacted CMS Hospital Star Rating This has significant effects on profit margins since patients consider the star rating differentials in their choices of hospitals and are willing to pay upward of 17% extra for treatments in 5 star hospitals a revenue generating source of income at times when hospitals have

seen falling revenues down 4.8% and rising labor up 37% from pre COVID 19 pandemic levels To reduce the gap between perception and reality hospital leaders can consider the link between communication goals e.g. responsiveness of hospital staff pain management communication about medicines and outcomes e.g. increased adherence and compliance readmission healthcare delivery costs hospital overall ratings as well as improve the patient experience When intentions and outcomes are aligned they create a powerful medium by which healthcare leaders can evaluate the gaps that exist between patient care measures and best practices and mitigate organizational or technological factors relevant to improving the patient experience When the alignment is optimal care teams develop a better sense of shared purpose become more committed and accountable and work together to improve the patient experience When accomplished patients participate more fully and actively in the exchange and are discharged with an enhanced commitment to carry out care management requirements Key topics in this practical guide include provider patient communications demonstrating the value of patient focused care how physician and nurse executives use synergy as a strategy engaging board members in promoting quality and safety goals and in developing hospital community partnerships building bridges between physicians administrators trustees and hospital staff and developing a leadership pipeline
