Cancer and Nutrition Kedar N. Prasad, William C. Cole, 1998 This book discusses the role of nutrients and vitamins in cancer prevention and treatment Basic and clinical scientists from different regions of the world have contributed to this volume The incidence of cancer is on the rise internationally and many of these cancers appear to be attributable to diet lifestyle and environmentally related factors In recent years many cancer causing

substances and cancer protective agents which are associated with these factors have been identified and extensively tested in experimental models This work also focuses on newer conceptual ideas that have emerged regarding the functions of nutrients on cellular and molecular levels

Nutritional Toxicity: Physiology, Nutrition, and Human Health Tingting Ju, Siddika Yalcin, Misha Vrolijk, 2025-08-20 Food is a basic human need Our diet provides the human body with nutrients and other elements that are necessary for maintaining a good health Sufficient intake of nutrients is therefore considered vital However in the past years the environmental impact on our food and an increased adherence to the Westernized diet which consists of ultra processed foods have negatively impacted the quality of our food and thus also our nutrition In addition to these influences today s food is produced differently and food patterns change and shift towards more sustainable diets A major change from animal meat to more plant based foods is occurring whilst new protein sources are introduced such as insects seaweed and artificial protein sources Food additives such as artificial sweeteners are also becoming increasingly popular These environmental and sustainable developments have led to the introduction of new foods different proportions of nutrients in our foods and new elements to our food that altogether are potentially harmful for our health Growing interest in the use of nutrient supplements also introduces potential risks with consuming levels of nutrients above those deemed tolerable or safe Therefore having a better understanding of nutritional toxicity in the context of the modern food industry becomes fundamental

Cancer, Nutrition, and Eating Behavior Thomas G. Burish, Sandra M. Levy, Beth E. Meyerowitz, 2021-06-23 The majority of cancer related deaths are associated with nutritional problems The major role that nutrition and diet play in the development and course of cancer had only been recently appreciated and relatively little had been written on the topic in general A critical component of nutrition and diet is eating behavior Originally published in 1985 the purpose of this book was to meet the

needs of both the clinician and the researcher by bringing together data and theory about nutrition and cancer from several disciplines as considered from a biobehavioral perspective The first chapter of the book provides an overview of the purposes and organization of the volume The rest is divided into 3 parts Part 1 focuses on basic research concerned with the nature and development of taste aversions and taste preferences in human and animals Part 2 applies the basic processes reviews in the first part to the cancer area focusing on eating and nutritional problems related to both tumor development and to learned processes that develop as a result of being exposed to radiotherapy and chemotherapy treatments Part 3 focuses on identifying and evaluating intervention strategies for improving the nutritional status of people with cancer or at high risk for developing cancer
