[Remaking China's Great Cities](#) Samuel Y. Liang, 2014-07-25 China s rapid urbanization has restructured the great socialist cities Beijing Shanghai and Guangzhou into mega cities that embrace global capitalism This book focuses on the urban transformations of these three cities Beijing is the nation s political and cultural capital Shanghai is the economic and financial powerhouse and Guangzhou is the capital of Guangdong Province and the regional center of south China All are historical cities with rich imperial colonial and regional heritages and all have been drastically transformed in the last six decades This book examines the cities continuous urban legacies since 1949 in relation to state governance economic reforms and cultural production By adopting local historical

perspectives it offers more nuanced accounts of the current urban change than the modernization globalization paradigm and conceptualizes the change in the context of the cities socialist colonial and imperial legacies Specifically Samuel Y Liang offers an overview of the urban planning and territorial expansion of the great cities since 1949 explores the production and consumption of urban housing its spatial forms media representations and socio political implications and examines the state led redevelopment of old urban cores and residential neighborhoods and the urban conservation movement Remaking China's Great Cities will be of great interest to students and scholars working across a range of fields including Chinese studies Chinese culture and society urban studies and architecture Confronting Urban Legacy Xiangming Chen,Nick Bacon,2013-10-18 Confronting Urban Legacy fills a critical lacuna in urban scholarship As almost all of the literature focuses on global cities and megacities smaller secondary cities which actually hold the majority of the world's population are either critically misunderstood or unexamined in their entirety This neglect not only biases scholars understanding of social and spatial dynamics toward very large global cities but also maintains a void in students learning This book specifically explores the transformative relationship between globalization and urban transition in Hartford Connecticut while including crucial comparative chapters on other forgotten New England cities Portland Maine along with Lawrence and Springfield Massachusetts Hartford's transformation carries a striking imprint of globalization that has been largely missed from its 17th century roots as New England first inland colonial settlement to its emergence as one of the world's most prosperous manufacturing and insurance metropolises to its present configuration as one of America's poorest post industrial cities which by still retaining a globally lucrative FIRE Sector is nevertheless surrounded by one of the nation's most prosperous metropolitan regions The myriad of dilemmas confronting Hartford calls for this book to take an interdisciplinary approach The editors introduction places Hartford in a global comparative perspective Part I provides rich historical delineations of the many rises and not quite falls of Hartford Part II offers a broad contemporary treatment of Hartford by dissecting recent immigration and examining the demographic and educational dimensions of the city suburban divide and Part III unpacks Hartford's current social economic and political situation and discusses what the city could become Using the lessons from this book on Hartford and other underappreciated secondary cities in New England urban scholars leaders and residents alike can gain a number of essential insights both theoretical and practical Town Planning Nicholas Boyarsky,1982
