Dick,2019-03-21 Since the invention of the telescope 400 years ago astronomers have rapidly discovered countless celestial objects But how does one make sense of it all Astronomer and former NASA Chief Historian Steven J Dick brings order to this menagerie by defining 82 classes of astronomical objects which he places in a beginner friendly system known as Astronomy's Three Kingdoms Rather than concentrating on technicalities this system focuses on the history of each object the nature of its discovery and our current knowledge about it The ensuing book can therefore be read on at least two levels On one level it is an illustrated guide to various types of astronomical wonders On another level it is considerably more the first comprehensive classification system to cover all celestial objects in a consistent manner Accompanying each spread are spectacular historical and modern images The result is a pedagogical tour de force whereby readers can easily master astronomy's three realms of planets stars and galaxies *Real-World Python* Lee Vaughan,2020-11-10 A project based approach to learning Python programming for beginners Intriguing projects teach you how to tackle challenging problems with code You've mastered the basics Now you're ready to explore some of Python's more powerful tools Real World Python will show you how Through a series of hands on projects you'll investigate and solve real world problems using sophisticated computer vision machine learning data analysis and language processing tools You'll be introduced to important modules like OpenCV NumPy Pandas NLTK Bokeh Beautiful Soup Requests HoloViews Tkinter turtle matplotlib and more You'll create complete working programs and think through intriguing projects that show you how to Save shipwrecked sailors with an algorithm designed to prove the existence of God Detect asteroids and comets moving against a starfield Program a sentry gun to shoot your enemies and spare your friends Select landing sites for a Mars probe using real NASA maps Send unbreakable messages based on a book code Survive a zombie outbreak using data science Discover exoplanets and alien megastructures orbiting distant stars Test the hypothesis that we're all living in a computer simulation And more If you're tired of learning the bare essentials of Python Programming with isolated snippets of code you'll relish the relevant and geeky fun of Real World Python **It Came From Outer Space Wearing an RAF Blazer!** Martin Mobberley,2013-07-23 To British television viewers the name Patrick Moore has been synonymous with Astronomy and Space Travel since he first appeared on The Sky at Night in 1957 To amateur astronomers he has been a source of inspiration joy humour and even an eccentric role model since that time Most people know that his 55 years of presenting The Sky at Night is a world record but what was he really like in person What did he do away from the TV cameras in his observatory and within the British Astronomical Association the organisation that inspired him as a youngster Also precisely what did he do during the War Years a subject that has always been shrouded in mystery Martin Mobberley a friend of

Patrick Moore's for 30 years and a former President of the British Astronomical Association has spent ten years exhaustively researching Patrick's real life away from the TV cameras His childhood RAF service tireless voluntary work for astronomy and charity and his endless book writing are all examined in detail His astronomical observations are also examined in unprecedented detail along with the battles he fought along the way and his hatred of bureaucracy and political correctness No fan of Sir Patrick Moore can possibly live without this work on their bookshelf *Exploring the Solar System* Peter Bond,2020-03-03 An Exciting and Authoritative Account of the Second Golden Age of Solar System Exploration Award winning author Peter Bond provides an up to date in depth account of the sun and its family in the 2nd edition of *Exploring the Solar System* This new edition brings together the discoveries and advances in scientific understanding made during the last 60 years of solar and planetary exploration using research conducted by the world's leading geoscientists astronomers and physicists *Exploring the Solar System* 2nd Edition is an ideal introduction for non science undergraduates and anyone interested in learning about our small corner of the Milky Way galaxy *Patrick Moore* Sir Patrick Moore,2011-10-24 Throughout his distinguished career Patrick Moore has without a doubt done more to raise the profile of astronomy among the British public than any other figure in the scientific world As the presenter of *The Sky at Night* on BBC television for nearly 50 years he was honoured with an OBE in 1968 and a CBE in 1988 In 2001 he was knighted for services to the popularisation of science and to broadcasting The BBC first aired *The Sky at Night* in April 1957 and it is now in the record books as the world's longest running TV series with the same presenter He is also the author of over 60 books on astronomy all of which including his autobiography have been written on his 1908 typewriter Partly thanks to his larger than life personality Sir Patrick's own fame extends far beyond astronomical circles A self taught musician and talented composer he has displayed his xylophone playing skills at the Royal Variety Performance and as a passionate supporter of cricket he has played for the Lord's Taverners charity cricket team *History of Astronomy* John Lankford,2013-03-07 This Encyclopedia traces the history of the oldest science from the ancient world to the space age in over 300 entries by leading experts
