## **Pioneering Moral Education Victor Cook And His Foundation:**

Pioneering Moral Education W. A. Gatherer, 2004      Pioneering Moral Education William A. Gatherer, 2019-07-30 This book is a biography of a leader of the campaign for moral education which had been conducted for several decades in Britain and in the USA The campaign has culminated in the establishment of many programmes of education for citizenship values education ethics education character education and education for global citizenship in effect the establishment of moral education in schools throughout the world But the book is also a history of the campaign in the UK since the 1960s when Victor Cook a millionaire engineer and businessman in Aberdeen began to devote his remaining thirty years of life and all his wealth to persuading the educational establishment to give priority to this central area of the work of schools Faced with indifference and even mockery Cook and the small but growing band of professional educationists and philosophers recruited to the cause set up studies of the subject and its problems commissioned research and development projects and sponsored conferences and experimental teaching programmes They also encouraged policy makers and politicians to take seriously the proposition that moral education conducted along with or in addition to cognate subjects such as religious education and social studies can and should be introduced as an important function of educational organisations Set in the context of recent educational developments this narrative and the accompanying expositions of theories and practices provides new insights into a complex but important subject and a comprehensive account of the development of moral education and its role in the world of today      **Pioneering Moral Education** William Alexander Gatherer, 2010      *Towards a Methodology for Comparative Studies in Religious Education* Oddrun M.H. Bråten, 2013 In this book Oddrun M H Br ten set out to utilise and test her methodology for comparative religious education This synthesises two sets of ideas The first includes supranational national and subnational processes Formal supranational processes refer to international educational policymaking in international organisations Informal supranational processes include secularisation pluralisation and globalisation Subnational processes refer to variations between regions within a country The second set of ideas concerns the societal institutional instructional and experiential levels of curriculum They are affected by supranational national and subnational processes In discussing the societal level attention needs to be given to the histories of religion state and school in each country Research at the institutional level involves analysis of relevant policy documents and legislation in each country while research at the instructional level involves analysis of how teachers interpret plan and teach the curriculum while the experiential level researches how students interact with one another and with teachers to develop their understanding A third set of ideas includes Br ten s use of Schiffauer and collaborators concepts of social national imaginary and civil enculturation These concepts help in grasping the historical and sociological depth of national traditions This publication is a groundbreaking study in the methodology of comparative religious education and the author won the award for Outstanding Research Student of 2009 2010 in the field of education at the University of Warwick      The British National Bibliography
