Feist, 2008-10-01 In this book Gregory Feist reviews and consolidates the scattered literatures on the psychology of science then calls for the establishment of the field as a unique discipline He offers the most comprehensive perspective yet on how science came to be possible in our species and on the important role of psychological forces in an individual's development of scientific interest talent and creativity Without a psychological perspective Feist argues we cannot fully understand the development of scientific thinking or scientific genius The author explores the major subdisciplines within psychology as well as allied areas including biological neuroscience and developmental cognitive personality and social psychology to show how each sheds light on how scientific thinking interest and talent arise He assesses which elements of scientific thinking have their origin in evolved mental mechanisms and considers how humans may have developed the highly sophisticated scientific fields we know today In his fascinating and authoritative book Feist deals thoughtfully with the mysteries of the human mind and convincingly argues that the creation of the psychology of science as a distinct discipline is essential to deeper understanding of human thought processes **The History and Heritage of Scientific and Technological Information Systems** W. Boyd Rayward, Mary Ellen Bowden, 2004 Emphasis for the second conference on the history of information science systems was on scientific and technical information systems in the period from the Second World War up through the early 1990s These proceedings present the papers of historians of science and technology information scientists and scientists in other fields on a wide range of topics informatics in chemistry biology and medicine information developments in multinational industrial and military settings biographical studies of pioneering individuals and the transformation of information systems and formats in the twentieth century **PIONEERS OF SCIENCE AND THE DEVELOPMENT OF THEIR SCIENTIFIC THEORIES. 1926(O , **Pioneers of Science and the Development of Their Scientific Theories** Sir Oliver Lodge, 1926 An Introduction to the Historiography of Science Helge Kragh, 1987 This book introduces the methodological and philosophical problems with which modern history of science**

is concerned offering a comprehensive and critical review through description and evaluation of significant historiographical viewpoints Incorporating discussion of key problems in general historical writing with examples drawn from a range of disciplines this non elementary introduction bridges the gap between general history and history of science Following a review of the early development of the history of science the theory of history as applied to science history is introduced examining the basic problems which this generates including problems of periodisation ideological functions and the conflict between diachronical and anachronical historiography Finally the book considers the critical use and analysis of historical sources and the possibility of the experiential reconstruction of history Aimed primarily at students the book s broad scope and integration of historical philosophical and scientific matters will interest philosophers sociologists and general historians for whom there is no alternative introduction to the subject at this level

A History of Anthropology as a Holistic Science Glynn Custred,2016-04-27 A History of Anthropology as a Holistic Science defends the holistic scientific approach by

examining its history which is in part a story of adventure and its sound philosophical foundation It shows that activism and the holistic scientific approach need not compete with one another This book discusses how anthropology developed in the nineteenth century during what has been called the Second Scientific Revolution It emerged in the United States in its holistic four field form from the confluence of four lines of inquiry the British the French the German and the American As the discipline grew and became more specialized a tendency of divergence set in that weakened its holistic appeal Beginning in the 1960s a new movement arose within the discipline which called for abandoning science as anthropology's mission in order to convert into an instrument of social change a redefinition which weakens its effectiveness as a way of understanding humankind and which threatens to discredit the discipline **American Book Publishing Record** ,1970 Bibliography of the History of Medicine ,1984 **Cumulative List of Organizations Described in Section 170 (c) of the Internal Revenue Code of 1986** ,1996 **National Science Foundation Legislation, 1975** United States.
