brings together a variety of elements of socialism as enacted by planners on a competitive urban stage such as scientific debate the crafting of symbolic landscapes and state campaigns for the development of cultured cities and people By examining how planners and other urban inhabitants experienced lived and struggled with socialism and Stalinism DeHaan offers readers a much broader more complex picture of planning and planners than has been revealed to date *Montage and the Metropolis* Martino Stierli, 2018-01-01 Montage has been hailed as one of the key structural principles of modernity yet its importance to the history of modern thought about cities and their architecture has never been adequately explored In this groundbreaking new work Martino Stierli charts the history of montage in late 19th century urban and architectural contexts its application by the early 20th century avant gardes and its eventual appropriation in the postmodern period With chapters focusing on photomontage the film theories of Sergei Eisenstein Mies van der Rohe's spatial experiments and Rem Koolhaas's use of literary montage in his seminal manifesto *Delirious New York* 1978 Stierli demonstrates the centrality of montage in modern explorations of space and in conceiving and representing the contemporary city Beautifully illustrated this interdisciplinary book looks at architecture photography film literature and visual culture featuring works by artists and architects including Mies Koolhaas Paul Citroen George Grosz Hannah Höch El Lissitzky and Le Corbusier **Modern Times** Robert P Morgan, 1993-11-02 This volume covers the development of modern music from World War I to the present Specific musical responses can be identified from the prevailing social economic and political circumstances Since World War II musical languages have tended to converge with developments in technology and communications Robert P Morgan is the author of *Twentieth Century Music* and co editor of *Alban Berg Historical and Analytical Perspectives* **Models of Management** Mauro F. Guillén, 1994-10-15 This work explores differing historical patterns in the adoption of the three major models of organizational management scientific management human relations and structural analysis The author takes a fresh look at how managers have used these models in four countries during the 20th century **Russia** Richard Anderson, 2015-11-15 This book offers a comprehensive account of Russia's architectural production from the late nineteenth century to the present explaining how its architecture was both shaped by and came to embody Russia's rapid cultural economic and social revolutions over the past century Richard Anderson looks at Russia's complex relationship to global architectural culture exploring the country's central presence in the Rationalism and Constructivism movements of the 1920s as well as its role as a key protagonist during the Cold War Looking deeply at Soviet Russia he brings the relationship between architecture and socialism into focus through detailed case studies that situate buildings and architectural concepts within the socialist milieu of Soviet society He tracks the way Russian architectural institutions departed from the course of modernism being developed in capitalist countries and he reappraises the architecture of the Stalin era and the final decades of the USSR Finally he traces the influence of Soviet conventions on contemporary Russian architecture which is now a more heterogeneous mix of approaches and styles and how it made a lasting and little known impact on territories extending from

the Middle East to Central Asia and into China A bold new assessment of Russia s architectural legacy and contemporary contributions this book is a fascinating exploration of a tumultuous place and the creativity that has come from it *Time and Material Culture* Julie Deschepper, Antony Kalashnikov, Federica Rossi, 2024-07-05 This edited volume offers an original exploration into the ways in which Soviet culture and experience of time were unique examining the temporalities expressed in the world of socialist things from the objects of everyday life to urban architecture Grounding the analysis of Soviet temporalities in their material incarnations not only lends concreteness to discussions of temporal culture but also draws out ways in which the specificities of Soviet things and their planning design manufacture and consumption mediated and produced particular ways of experiencing perceiving and representing time As such *Time and Material Culture* turns a new page in the study of the temporal and material culture of Soviet socialism and in doing so contributes to broader debates on the changing experiences of time in the global twentieth century The book integrates interdisciplinary perspectives as well as regional approaches sensitive to the multinational nature of the Soviet project *Time and Material Culture* will be useful to academics upper level undergraduates and graduate students interested in twentieth century cultures of time
