Nikon D3 and D3X Jon Sparks,2009-07-08 The Nikon D3 D3X stand at the pinnacle of the company's digital SLR line up Both cameras are designed for marketed to professional photographers who will appreciate their rugged build blistering speed incredible image quality This practical guide is packed with the author's own inspirational photographs **Nikon Df** Jon Sparks,2015-04 From the front it resembles an oversized Nikon FM the mechanically operated interchangeable lens 35mm SLR that was produced between 1977 and 1982 In addition to the styling and external controls the Df's other reference to Nikon's history is the retractable meter coupling tab which allows the use of pre 1977 non AI lenses Much of what lies beneath the Df's decidedly retro skin however will be quite familiar to current users of modern digital SLRs While the D in the name stands for digital the f stands for fusion referring to the marriage of old and new Despite its pretensions of being a fully manual camera the Df also features front and rear electronic control dials in addition to the physical dials on the top plate The Df is built around the 16MP full frame sensor from the company's flagship D4 and uses the processor and AF system from the cheaper D610 model The optical viewfinder is very large the magnification is 0.70x and the coverage 100% When a DX lens is attached to the Df the viewfinder shows frame lines indicating the DX image area Most notably and unusual for a modern DSLR although the camera is based on a video capable sensor the Df cannot shoot video This according to the developers is because the Nikon Df is intended to be a serious camera for people who want to produce pure photography *Vol. 22: Early DSLR Cameras II: Revisiting the Nikon D70 & D70S* Shawn M. Tomlinson,2018-03-16 The Nikon D70 was Nikon's third revolution just in the digital photography age Never mind the major one in 1959 with the Nikon F that changed professional film photography The first was the Nikon D1 started pro digital photography the end of mainstream film The second was the Nikon D100 the first DSLR to reach the lofty heights of 6.1 megapixels Then there was the D70 It looks and feels like a modern DSLR and Nikon released it in 2002 It was in its own way as revolutionary as the D1 and the D100 I've taken some of my best photos with it The thing is there really is little negative to say about the Nikon D70 D70S You can come up with many reasons to spend more money on a newer DSLR but if you want a great camera for little money the Nikon D70 or D70S is a good bet **Nikon D200 Digital Field Guide** David D. Busch,2006-07-19 You've been waiting for an affordable dSLR with the quality and versatility of the Nikon D200 Packed with great techniques and full color
