Global Expectations for Korean Unification Kyuryoon Kim et al., 2014-12-31 The current research aims to provide analytical understandings on the costs and benefits of Korean unification from political social and economic aspects Upon the two years of earlier works we constructed an analytical model encompassing both spatial and temporal dimensions of the unification process and built comprehensive architecture the Guiding Type of Unification Based on this model we have broadened the scope of the research by collecting diverse perspectives from the worldwide experts of the leading countries We expect to observe the global trends of world governance Indeed the increasing importance of Group of Twenty G 20 countries in managing global problems reflects both political and social aspects of the changes occurring in global governance Another reason for this would be South Korea's diversified international relations in the recent years Hence it seems necessary to take a closer look on the international dimensions of Korean unification In this vein we requested thirteen experts of the leading countries to express their opinions on Korean unification In order to collect international perspectives in a coordinated manner scholars were provided with a guideline to include their perspectives on

the expected effects of Korean Unification and the potential roles of their countries during and after the process. Participants were also asked to present candid implications for Korean unification. Argentina, whose food supply is abundant, laid stress on providing assistance in terms of food security during the unification. Australia, who has special concerns in Asian security, suggested a comprehensive support not only as a mediator but also as one of the U.S. alliance. Due to remote distance to Asia, Brazil is relatively less affected by the unification. Brazil, however, expressed that it has a keen interest in transmission of its experience regarding nuclear issues with Argentina. Similar to Brazil's stance, the effects of the unification influence is indirect to Canada. Nevertheless, Canada could play a role in providing humanitarian assistance and could be a potential destination for North Korean refugee resettlement. France, one of the most influential members in the European Union and the United Nations, made a suggestion to promote institution building in East Asia that can promote stability in the region. Germany, the only country who had experienced unification, presented its interest in participating actively in the process of Korean unification through public and private sectors. India assumed that the unification of Korea leads to the denuclearization of the peninsula and would see this as a positive sign for stability of the region since it would limit or end North Korea's nuclear weapon transmits with Pakistan. Indonesia could contribute to regional peace and stability through ASEAN and its extensions as South Korea can call upon Indonesia to engage in the peace process. Italy, who especially pointed out the role of European Union as a whole is well poised to contribute to economic and social development with North Korea through technical assistance. Mexico can and expressed its willingness to play an active role in the unification process through international organizations. South Africa, who had been successful in national reconciliation and denuclearization, is very likely to provide its experience and can be a strong voice for the NPT and arms control in the international society. Advocating South Korea's policy in Korean unification, Turkey explicitly mentioned that it will side with Seoul if there is a possible conflict in the peninsula. The author emphasized that the international community must be well informed on how Korean unification will take place. Last but not least, the United Kingdom author suggested that Koreans will have to resolve emotional conflicts for reconciliation. Considering how both Koreas have dealt educational matters concerning the division of the peninsula, this may face a major challenge in the future generation. Thirteen countries diversely manifested positions on the unifying process are indicative of perceptual change that the issue of Korean unification is no longer a regional issue but an international one in which multiple actors have their own stakes within. Upon the previously suggested implications, we categorized the countries into three groups: bystanders, supporters, and interveners. This categorization reflects the assertiveness of each country or coercive level of each country's assistance instrumented towards the two Koreas during the unifying process. In the conclusion, based on our final analysis, we provided recommendations for the policy makers. First, diversified diplomacy creates an amicable international environment for unification policies beyond the power politics of the Four Powers. Second, activation of leading countries' roles is strategically advantageous to activate the meaningful roles of

these leading countries to minimize the Four Powers concerns Third emphasizing the formation of multilateral system would provide leading countries with an additional motivation to actively participate in the unification process Furthermore multilateral efforts to achieve Korean unification are also expected to contribute to the furtherance of democratic elements in the dynamics of international relations as a whole Fourth it is now high time for us to conduct more public diplomacy by devising new and creative methodologies The global research project of this kind could be one of the most effective public diplomatic tools Lastly the unification between two Koreas can no longer be considered as a regional issue within Northeast Asia since others including the leading countries conceive their national interests along the process of unification on the Korean peninsula in diverse ways Overall thirteen countries recommendations underline the significance of collective efforts in addressing the unification process and suggest South Korea to learn lessons from the experience that they have undergone in the past

This title was first published in 2003 After the inter Korean Summit in 2000 the Korean peace process gained a new momentum and the two Koreas increased mutual contacts and exchanges However in 2001 the peace process stalled and was further hindered by Bush s hard line policy towards Pyongyang and North Korea s inflexible attitudes towards Seoul Interest in the Korean peninsula by the US Russia Japan and China for geo strategic and geo economic reasons means that peace and unification will inevitably become an international problem Against this backdrop this original volume deals with the

problems and prospects of the inter Korean peace process and the interests attitudes and policies of these major powers
