

Sewers and Manholes with Polymer Concrete

Thomas D. Bloomfield, Dipl.-Ing.¹

Abstract

This paper describes recent developments in the trenchless construction industry using polymer concrete pipe. These developments include the first microtunneling installations in the United States, Canada and Kuwait; two curved microtunneling projects in Germany; and the development of a polymer concrete liner pipe to slipline deteriorated circular and semi-elliptical pipes.

Background

Polymer concrete pipe was developed in Germany in the 1960's. This pipe was developed to meet the growing needs of industrial and municipal clients for a strong corrosion resistant pipe. Several pipe manufacturing companies in Europe and the United States also began developing corrosion resistant pipe products during this period. One of these pipe products is a centrifugally cast fiberglass reinforced plastic mortar pipe. This pipe called Hobas was first manufactured in Switzerland in 1960. It was first introduced in the United States in 1984. This pipe currently has widespread use in the trenchless market where it is used in microtunneling and large diameter sliplining projects.

A reinforced plastic mortar pipe was developed in the United States in the 1960's and 1970's. This pipe made of sand, polyester resin and fiberglass was designed primarily for pressure applications such as water supply and irrigation systems. This pipe was used extensively in the United States in the 1960's and 1970's. Problems developed on several major projects in the 1970's and 1980's. These problems were traced to inadequate design, poor quality control and other deficiencies.

In Germany, non-reinforced polymer concrete pipe was designed for use in industrial plants. It was resistant to chemical attack from both acidic and caustic effluents inside the pipe and from chemical attack on the outside of the pipe. It also had high axial and compressive strengths without adding steel or fiberglass. Polymer concrete pipe was used infrequently in Germany because of the lack of sophisticated
