and millennial timescales Moreover the Southern Ocean modulates atmospheric and oceanic circulation in the tropics remotely influencing low latitude atmospheric CO<sub>2</sub> exchange Thus the Southern Ocean is a key component of the global climate system whose operation must be better understood at a range of timescales in order to accurately assess its effects on atmospheric pCO<sub>2</sub> in the future This Research Topic will consist of a set of cutting edge investigations of the processes and mechanisms of Southern Ocean influence on atmospheric pCO<sub>2</sub> and global climate change
