thermal and freezing processing techniques have been effective in maintaining a safe high quality food supply However
increasing energy costs and the desire to purchase environmentally responsible products have been a stimulus for the
development of alternative technologies Furthermore some products can undergo quality loss at high temperatures or
freezing which can be avoided by many alternative processing methods This second edition of Alternatives to Conventional
Food Processing provides a review of the current major technologies that reduce energy cost and reduce environmental
impact while maintaining food safety and quality New technologies have been added and relevant legal issues have been
updated Each major technology available to the food industry is discussed by leading international experts who outline the
main principles and applications of each The degree to which they are already in commercial use and developments needed
to extend their use further are addressed This updated reference will be of interest to academic and industrial scientists and
engineers across disciplines in the global food industry and in research and to those needing information in greener or more
