Health Behaviour Jill Rutter, 2002-01-16 Can theory driven interventions using social cognition models change health behaviour How should theoretical models be adapted for intervention What are the implications for policy and practice For many years social cognition models have been at the forefront of research into predicting and explaining health behaviours Until recently there have been few attempts to go beyond prediction and understanding to intervention but now the position has changed and a number of excellent interventions have been set up The purpose of this book is to bring them together in one volume After an introductory chapter on the models and interventions to be included there are nine chapters that each address a particular behaviour or set of behaviours written by the authors of the interventions themselves Chapters 2 to 4 examine risk related behaviours safer sex smoking exposure to radon gas Chapters 5 to 7 turn to health enhancing behaviours and screening reducing fat intake uptake of vitamin C breast self examination participation in cervical and colorectal cancer screening and Chapters 8 to 10 explore road safety speeding by drivers pedestrian behaviour and cycle helmet use The chapters follow a common structure a presentation of the epidemiological facts about the behaviour and why an intervention was needed an outline of the way in which the theoretical model being used was adapted for the intervention

a presentation of the experimental results and a discussion of their theoretical and practical implications The book ends with a chapter of commentary on the challenges of devising theory based interventions Following on from the highly successful Predicting Health Behaviour edited by Mark Conner and Paul Norman this book will be recognised as a ground breaking text in the psychology of health for students researchers and practitioners alike
