Rhetorical Accessibility is the first text to bring the fields of technical communication and disability studies into conversation. The two fields also share a pragmatic foundation in their concern with accommodation and accessibility that is the material practice of making social and technical environments and texts as readily available, easy to use and/or understandable as possible to as many people as possible, including those with disabilities. Through its concern with the pragmatic, theoretically grounded work of helping users interface effectively and seamlessly with technologies, the field of technical communication is perfectly poised to put the theoretical work of disability studies into practice. In other words, technical communication could ideally be seen as a bridge between disability theories and web accessibility practices. While technical communicators are ideally positioned to solve communication problems and to determine the best delivery method, those same issues are compounded when they are viewed through the dual lens of accessibility and disability. With the increasing use of wireless, expanding global marketplaces, increasing prevalence of technology in our daily lives, and ongoing changes of writing through and with technology, technical communicators need to be acutely aware of issues involved with accessibility and disability. This collection will advance the field of technical communication by expanding the conceptual apparatus for understanding the intersections among disability studies, technical communication, and accessibility, and by offering new perspectives, theories, and features that can only emerge when different fields are brought into conversation with one another. It is the first text to bring the fields of technical communication and disability studies into conversation with one another.

*Rhetoric, Science, and Magic in Seventeenth-century England* Ryan J. Stark,2009

Rhetoric operated at the crux of seventeenth-century thought, from arguments between scientists and magicians to anxieties over witchcraft and disputes about theology. Writers on all sides of these crucial topics stressed rhetorical discernment because to the astute observer the shape of one's eloquence was perhaps the most reliable indicator of the heart's piety or alternatively of demonry. To understand the period's tenor, we must understand the period's rhetorical thinking, which is the focus of this book. Ryan J. Stark presents a spiritually sensitive interdisciplinary and original discussion of early modern English rhetoric. He shows specifically how experimental philosophers attempted to disenchant language. While rationalists and skeptics delighted in this disenchantment, mystics, wizards, and other practitioners of mysterious arts vehemently opposed the rhetorical precepts of modern science. These writers used tropes not as plain instruments but rather as numinous devices capable of transforming reality. On the contrary, the new philosophers perceived all esoteric language as a threat to learning's advancement, causing them to disavow both nefarious forms of occult spell-casting and unfortunately edifying forms of wonderment and incantation. This fundamental conflict between scientists and mystics over the nature of rhetoric is the most significant linguistic happening in seventeenth-century England, and as Stark argues, it ought profoundly to inform how we discuss the rise of

modern English writing ABOUT THE AUTHOR Ryan J Stark is assistant professor of English at Pennsylvania State University
