Graph Drawing Guiseppe Liotta, 2004-01-13. The 11th International Symposium on Graph Drawing GD 2003 was held on September 21-24 2003 at the Università degli Studi di Perugia Perugia Italy. GD 2003 attracted 93 participants from academic and industrial institutions in 17 countries. In response to the call for papers the program committee received 88 re-lar submissions describing original research and/or system demonstrations. Each submission was reviewed by at least 4 program committee members and comments were returned to the authors. Following extensive e-mail discussions the program

committee accepted 34 long papers 12 pages each in the proceedings and 11 short papers 6 pages each in the proceedings Also 6 posters 2 pages each in the proceedings were displayed in the conference poster gallery In addition to the 88 submissions the program committee also received a submission of special type one that was not competing with the others for a time slot in the conference program and that collects selected open problems in graph drawing The aim of this paper which was refereed with particular care and UNCHANGED two rounds of revisions is to stimulate future research in the graph drawing community The paper presents 42 challenging open problems in different areas of graph drawing and contains more than 120 references Although the length of the paper makes it closer to a journal version than to a conference extended abstract we decided to include it in the conference proceedings so that it could easily reach in a short time the vast majority of the graph drawing community

Nikolov, 2006-01-21 The 13th International Symposium on Graph Drawing GD 2005 was held in Limerick Ireland September 12-14 2005 One hundred and fifteen participants from 19 countries attended GD 2005 In response to the call for papers the Program Committee received 101 submissions each detailing original research or a system demonstration Each submission was reviewed by at least three Program Committee members each referee's comments were returned to the authors Following extensive discussions the committee accepted 38 long papers 3 short papers and 3 long system demos each of which were presented during one of the conference's 12 sessions Eight posters were also accepted and were on display throughout the conference Two invited speakers Kurt Mehlhorn and George Robertson gave fascinating talks during the conference Prof Mehlhorn spoke on the use of minimum cycle bases for reconstructing surfaces while Dr Robertson gave a perspective past and present on the visualization of hierarchies As is now traditional a graph drawing contest was held during the conference The accompanying report written by Stephen Kobourov details this year's contest This year a day long workshop organized by Seok Hee Hong and Dorothea Wagner was held in conjunction with the conference A report on the Workshop on Network Analysis and Visualization written by Seok Hee Hong is included in the proceedings

*Graph Drawing and Network Visualization* Emilio Di Giacomo, Anna Lubiw, 2015-12-16 This book constitutes the proceedings of the 23rd International Symposium on Graph Drawing and Network Visualization GD 2015 held in Los Angeles Ca USA in September 2015 The 35 full papers presented together with 7 short papers and 8 posters in this volume were carefully reviewed and selected from 77 submissions Graph Drawing is concerned with the geometric representation of graphs and constitutes the algorithmic core of Network Visualization Graph Drawing and Network Visualization are motivated by applications where it is crucial to visually analyze and interact with relational datasets Examples of such application areas include social sciences Internet and Web computing information systems computational biology networking VLSI circuit design and software engineering This year the Steering Committee of GD decided to extend the name of the conference from the International Symposium on Graph Drawing to the International Symposium on Graph Drawing and Network Visualization in order to better emphasize the dual

focus of the conference on combinatorial and algorithmic aspects as well as the design of network visualization systems and interfaces

**Graph Drawing** Joe Marks, 2003-07-31 This year's meeting marked the Eighth International Symposium on Graph Drawing. The organizing and program committees worked hard to make this year's symposium possible and we were delighted that so many people came to Colonial Williamsburg, Virginia, for three days of the latest results in the field of graph drawing. As in previous years, the review process was quite competitive. We accepted 30 out of 53 regular length submissions and 5 out of 15 short submissions for a total acceptance ratio of 35 out of 68 or 51%. This year's program featured several new developments in the field. Four different approaches for handling very large graphs were presented in a session on force directed layout. Two sessions were devoted to the latest advances in orthogonal graph drawing. And alongside the usual mix of theory and practice papers, we had several contributions based on empirical studies of users and of systems. Our invited talks were given by two speakers who were new to most members of the GD community but who work in areas that are closely related to graph drawing. Professor Colin Ware of the University of New Hampshire told us how knowledge of human visual perception is useful for the design of effective data visualizations. And Professor David Jensen of the University of Massachusetts at Amherst talked about the process of knowledge discovery from graphs, a process that involves more than just graph drawing and visualization.

Graph Drawing David Eppstein, Emden R. Gansner, 2010-03-10 This volume constitutes the refereed proceedings of the 17th International Symposium on Graph Drawing GD 2009 held in Chicago, USA during September 2009. The 31 revised full papers and 4 short papers presented were carefully reviewed and selected out of 79 submissions. Furthermore, 10 posters were accepted in a separate submission process.
