Rivals In Practice Medical Romance:

Rivals in Practice Alison Roberts, 2002 **Romance's Rival** Talia Schaffer, 2016-01-05 Romance's Rival argues that the central plot of the most important genre of the nineteenth century the marriage plot novel means something quite different from what we thought. In Victorian novels women may marry for erotic desire but they might instead insist on familiar marriage marrying trustworthy companions who can offer them socially rich lives and futures of meaningful work. Romance's Rival shows how familiar marriage expresses ideas of female subjectivity dating back through the seventeenth century while romantic marriage felt like a new risky idea. Undertaking a major rereading of the rise of the novel tradition from Richardson through the twentieth century Talia Schaffer rethinks what the novel meant if one tracks familiar marriage virtues. This alternative perspective offers new readings of major texts Austen the Brontës Eliot Trollope but it also foregrounds women's popular fiction Yonge Oliphant Craik Broughton. Offering a feminist perspective that reads the marriage plot from the woman's point of view Schaffer inquires why a female character might legitimately wish to marry for something other than passion. For the past half century scholars have valorized desire individuality and autonomy in the way we read novels. Romance's Rival asks us to look at the other side to validate the yearning for work family company or social power as legitimate reasons for women's marital choices in Victorian fiction. Comprehensive in its knowledge of several generations of scholarship on the novel Romance's Rival convinces us to re-examine assumptions about the nature and function of marriage and the role of the novel in helping us not simply imagine marriage but also process changing ideas about what it might look like and how it might serve people. Medical Record George Frederick Shrady,Thomas Lathrop Stedman,1872 **Victorian Nightshades** Elizabeth A. Campbell,2025-03-27 A darkly alluring plant family and the arrival of modernity Victorian Nightshades tells the story of how one plant family notorious for centuries in England because of its frequently psychoactive and poisonous properties rose to social and economic prevalence during the nineteenth century Beginning with bittersweet and belladonna the Old World species associated with evil witchcraft and dangerous women in an era when traditional botanical beliefs not only assigned morality to plants but also gendered them Campbell then moves to the ubiquitous potato and tobacco before concluding with four of the Solanaceae that achieved the widest national favor by the end of the century the ornamental petunia and the edible pepper eggplant and tomato The story of the nightshades exposes the conflicts between science and popular sentiment and between knowledge and received opinion that defined the nineteenth century Campbell compellingly details how advances in medical and botanical knowledge evolutionary theory and the vagaries of human desire transformed the Solanaceae from a plant family plagued by fear and hostility in the British imagination to one of cultural favor and celebration by the turn of the century encapsulating the Victorian era s course to modernity New England Medical Monthly ,1904
