RESEARCH — If you're a male, you're reading a lot more than the female. That's the finding from a new study by researchers at the University of Illinois at Chicago. The study, published in the *Journal of Interpersonal Violence*, found that men are more likely to read than women. The researchers also found that men are more likely to read than women, and that men are more likely to read than women.

the University of Illinois, says the study found a "very low" probability of 10 to 20 percent that the nuclear war will be initiated. The author says that the study is limited to the U.S. and cannot take into account the possibility of a nuclear war between the Soviet Union and the United States. The study also found that the probability of a nuclear war between the Soviet Union and the United States is "very low" and that the probability of a nuclear war between the Soviet Union and the United States is "very low."

Finally, after the introduction of the 1992 amendments, the use of a "preliminary" hearing to determine whether a person is competent to stand trial has become a common practice. The purpose of this hearing is to determine whether the defendant is competent to stand trial. If the defendant is found to be incompetent, the court will typically order a psychiatric evaluation and treatment. If the defendant is found to be competent, the trial will proceed.

DENUNCIATO IL CAPOUFFICIO DELL'ENEL

WILSON is a fairly young man of 26, married, but living with his parents, and has been in the business of a general contractor for 10 years. He has a good knowledge of the building business, and is a very capable man. He is a very capable man. He is a very capable man.

Summary: This is a preliminary report on the results of a study of the effects of a 12-week, low-dose, high-frequency, resistance training program on the muscle strength and endurance of 10 healthy, young men. The program consisted of three sessions per week, each lasting 30 minutes. The results showed that the program significantly increased muscle strength and endurance in the upper and lower extremities. The study was limited by the small sample size and the lack of a control group. Further research is needed to confirm these findings and to determine the optimal training protocol for improving muscle strength and endurance.
