Architecture and Objects Graham Harman,2022-07-26 Thinking through object oriented ontology and the work of architects such as Rem Koolhaas and Zaha Hadid to explore new concepts of the relationship between form and function Object oriented ontology has become increasingly popular among architectural theorists and practitioners in recent years Architecture and Objects the first book on architecture by the founder of object oriented ontology OOO deepens the exchange between architecture and philosophy providing a new roadmap to OOO s influence on the language and practice of contemporary architecture and offering new conceptions of the relationship between form and function Graham Harman opens with a critique of Heidegger Derrida and Deleuze the three philosophers whose ideas have left the deepest imprint on the field highlighting the limits of their thinking for architecture Instead Harman contends architecture can employ OOO to reconsider traditional notions of form and function that emphasize their relational characteristics form with a building s visual style function with its stated purpose and constrain architecture s possibilities through literalism Harman challenges these understandings by proposing de relationalized versions of both zero form and zero function that together provide a convincing rejoinder to Immanuel Kant s dismissal of architecture as impure Through critical engagement with the writings of Peter Eisenman and fresh assessments of buildings by Rem Koolhaas Frank Gehry and Zaha Hadid Architecture and Objects forwards a bold vision of architecture Overcoming the difficult task of zeroing function Harman concludes would place architecture at the forefront of a necessary revitalization of exhausted aesthetic paradigms
