Comparison of Principal Points of Standards for Electrical Machinery (Rotating Machines and Transformers) Freidrich Nettel, 1923 The necessity and importance of the standardization of electrical apparatus was recognized in Germany as early as 1894 and the first rules Sicherheitsvorschriften f r elektrische Starkstromanlagen gegen Feuergefahr came into force in that country in 1895 In the U S of America the first discussion on Standardization of Generators Motors and Transformers took place in 1898 which resulted in the appointment of a Committee and the

subsequent acceptance of the rules proposed by it In England the British Engineering Standards Association was formed in 1901 In connection with the British Standards an explanatory note appears necessary The B E S A s rules have for many years been the only generally accepted Standards Since 1913 the British Electrical and Allied Manufacturers Association representing the most important powerful British manufacturing firms have issued Standardization Rules of their own which have attained considerable commercial importance A special edition of these rules has been issued for export work which on the whole are guided by ideas similar to those embodied in the B E S A rules As far as can be gleaned from the article in the 11th Electrical Review Vol 86 Nr 2 216 April 16 1920 it is intended to publish a new revision of the B E S A s rules which will probably contain some of the recommendations of the B E A M A so that this will probably mean the return to one single system of Standards for Britain
