SHAMAN

THE PAINTINGS OF
SUSAN SEDDON BOULET

During the 1980s, Susan Seddon Boulet (American, b. Brazil, 1943-1997) pursued her growing interest in the shamanic world, creating evocative works that fused the spirits of people and animals. The shaman, the oracle, the wise person, the healer—"the one who knows"—is in mythical communication with these spirits, controlling and manipulating nature through supernatural powers.

Inspired by her readings about shamanism and her personal shamanic journeys, Boulet used her spiritual visions to present, in exquisite detail, the creatures that inhabit the inner dimensions of the mind. Her artistic expression and understanding of shamanic practice may lead us to explore our own unconscious world. The twelve paintings within this calendar speak to the soul and the imagination. Each is accompanied by an excerpt from a Native American song, chant, poem, or narrative.

The Assemblage of Korean Shamanism Joonseong Lee, 2022-10-14 The most unique aspect of Korean shamanism is its mysterious duality that continually reiterates the processes of deterritorialization and reterritorialization This book approaches that puzzle of mysterious duality using an interdisciplinary lens Korean shamanism has been under continuous oppression and marginalization for a long time and that circumstance has never dissipated Shaman culture can be found in every corner of people s lives in contemporary Korea but few acknowledge their indigenous beliefs with pride This mysterious duality has deepened as the mediatization process of Korean shamanism has developed Korean shamanism was revived as the dynamic of shamanic inheritance in the process but these dynamics have also become the object of mockery For this reason any true understanding of Korean shamanism rests in how to unravel the unique puzzles of this mysterious duality In this book the duality is mapped out by playing with the puzzles surrounding the contextualization of Korean shamanism and mediatization

What Matters? Courtney Bender,Ann Taves,2012-05-08 Over the past decade religious secular and spiritual distinctions have broken down forcing scholars to rethink secularity and its relationship to society Since classifying a person activity or experience as religious or otherwise is an important act of valuation one that defines the characteristics of a group and its relation to others scholars are struggling to recast these concepts in our increasingly ambiguous pluralistic

world This collection considers religious and secular categories and what they mean to those who seek valuable ethical lives As they investigate how individuals and groups determine significance set goals and attribute meaning contributors illustrate the ways in which religious secular and spiritual designations serve as markers of value Reflecting on recent ethnographic and historical research chapters explore contemporary psychical research and liberal American homeschooling the work of nineteenth and early twentieth century American psychologists and French archaeologists the role of contemporary humanitarian and volunteer organizations based in Europe and India and the prevalence of highly mediated and spiritualized publics from international psy trance festivals to Ghanaian national political contexts Contributors particularly focus on the role of ambivalence attachment and disaffection in the formation of religious secular and spiritual identities resetting research on secular society and contemporary religious life while illuminating what matters in the lives of ordinary individuals

Maya Calendar Origins Prudence M. Rice, 2009-02-17 In Maya Political Science Time Astronomy and the Cosmos Prudence M Rice proposed a new model of Maya political organization in which geopolitical seats of power rotated according to a 256 year calendar cycle known as the May This fundamental connection between timekeeping and Maya political organization sparked Rice s interest in the origins of the two major calendars used by the ancient lowland Maya one 260 days long and the other having 365 days In Maya Calendar Origins she presents a provocative new thesis about the origins and development of the calendrical system Integrating data from anthropology archaeology art history astronomy ethnohistory myth and linguistics Rice argues that the Maya calendars developed about a millennium earlier than commonly thought around 1200 BC as an outgrowth of observations of the natural phenomena that scheduled the movements of late Archaic hunter gatherer collectors throughout what became Mesoamerica She asserts that an understanding of the cycles of

weather and celestial movements became the basis of power for early rulers who could thereby claim control over supernatural cosmic forces Rice shows how time became materialized transformed into status objects such as monuments that encoded calendrical or temporal concerns as well as politicized becoming the foundation for societal order political legitimization and wealth Rice's research also sheds new light on the origins of the Popol Vuh which Rice believes encodes the history of the development of the Mesoamerican calendars She also explores the connections between the Maya and early Olmec and Izapan cultures in the Isthmian region who shared with the Maya the cosmovision and ideology incorporated into the calendrical systems
