Shamans And Cultures Istors:

Shamanism Margaret Stutley,2003 Shamanism is one of the earliest and farthest reaching magical and religious traditions vestiges of which still underlie the major religious faiths of the modern world The function of the shaman is to show his or her people the unseen powers behind the mere appearances of nature as experienced through intuition in trance states or during ecstatic mystical visions Shamans possess healing powers communicate with the dead and the world beyond and influence the weather and movements of hunting animals The psychological exaltation of shamanism trance states is similar to the ecstasies of Yogis Christian mystics and dervishes Shamanism An Introduction traces the development of shamanism in its many fascinating global manifestations Looking at shamanic practices from Siberia to China and beyond it provides an accessible guide to one of the world s most ancient notorious and frequently misrepresented spiritual traditions Placing special emphasis on the climate geographic and cultural pressures under which shanic customs arose and continue to be observed Margaret Stutley summarizes and clearly explains the logic of a faith whose fantastical elements hold a special place in popular imagination

The Archaeology of Shamanism Neil Price,2003-12-16 In this timely collection Neil Price provides a general introduction to the archaeology of shamanism by bringing together recent archaeological thought on the subject Blending theoretical discussion with detailed case studies the issues addressed include shamanic material culture responses to dying and the dead shamanic soundscapes the use of ritual architecture and shamanism in the context of other belief systems such as totemism Following an intial orientation reviewing shamanism as an anthropological construct the volume focuses on the Northern hemisphere with case studies from Greenland to Nepal Siberia to Kazakhstan The papers span a chronological range from Upper Palaeolithic to the present and explore such cross cutting themes as gender and the body identity landscape architecture as well as shamanic interpretations of rock art and shamanism in the heritage and cultural identity of indigenous peoples The volume also addresses the interpretation of shamanic beliefs in terms of cognitive neuroscience and the modern public perception of prehistoric shamanism

Shamanism Mariko Namba Walter,Eva Jane Neumann Fridman,2004-12-15 A guide to worldwide shamanism and shamanistic practices emphasizing historical and current cultural adaptations This two volume reference is the first international survey of shamanistic beliefs from prehistory to the present day In nearly 200 detailed readable entries leading ethnographers psychologists archaeologists historians and scholars of religion and folk literature explain the general principles of shamanism as well as the details of widely varied practices What is it like to be a shaman Entries describe region by region the traits such as sicknesses and dreams that mark a person as a shaman as well as the training undertaken by initiates They detail the costumes music rituals artifacts and drugs that shamans use to achieve altered states of consciousness communicate with spirits travel in the spirit world and retrieve souls Unlike most Western books on shamanism which focus narrowly on the individual s experience of healing and trance Shamanism also examines the function of shamanism in society from social

political and historical perspectives and identifies the ancient continuous thread that connects shamanistic beliefs and rituals across cultures and millennia *The Archaeology of Shamanism* Neil S. Mythology and Uralic Shamanism Mihály Hoppál, 2000 A collection of essays focusing on comparative mythology which have appeared in various journals most out of print over the past 15 years The essays provide a picture of the history and development of comparative research into Finno Uralic mythology and of its state at the end of the 20th century Common to these writings is a consistent semiotic approach which can be used in the description of mythological and belief systems The book is distributed by ISBS The author is a senior research fellow at the Institute of Ethnology at the Hungarian Academy of Sciences and director of the European Folklore Institute Distributed by ISBS c Book News Inc *Encyclopedia of the Arctic* Mark Nuttall, 2005-09-23 With detailed essays on the Arctic's environment wildlife climate history exploration resources economics politics indigenous cultures and languages conservation initiatives and more this Encyclopedia is the only major work and comprehensive reference on this vast complex changing and increasingly important part of the globe Including 305 maps This Encyclopedia is not only an interdisciplinary work of reference for all those involved in teaching or researching Arctic issues but a fascinating and comprehensive resource for residents of the Arctic and all those concerned with global environmental issues sustainability science and human interactions with the environment Shamanism Merete Demant Jakobsen†, 1999-03-01 Shamanism has always been of great interest to anthropologists More recently it has been discovered by westerners especially New Age followers This book breaks new ground by examining pristine shamanism in Greenland among people contacted late by Western missionaries and settlers On the basis of material only available in Danish and presented herein English for the first time the author questions Mircea Eliade's well known definition of the shaman as the master of ecstasy and suggests that his role has to be seen as that of a master of spirits The ambivalent nature of the shaman and the spirit world in the tough Arctic environment is then contrasted with the more benign attitude to shamanism in the New Age movement After presenting descriptions of their organizations and accounts by participants the author critically analyses the role of neo shamanic courses and concludes that it is doubtful to consider what is offered as shamanism
