Free Trade in the Bermuda Triangle-- and Other Tales of Counterglobalization Brett Neilson, 2004 An alternative approach to mapping the world offers a new way to contest capitalism and globalization Shangri-La the Bermuda Triangle Transylvania the Golden Triangle far flung in popular conception these anomalous places nonetheless occupy the same mysterious zone a mythography of unruly cartographic practices And because this mythography becomes associated with a particular area of the earth's surface it may well suggest an alternative means of mapping the world dissociated from the dominant geographical paradigms of nation state economic region and the global local marketing nexus Large scale nonnational geographical spaces that find their genesis in popular feeling mystery and belief these four sites provide Brett Neilson with the basis not only for rethinking the current global reorganization of space and time but also for questioning the dominant narrative by which globalization marks the victory of capitalism Free Trade in the Bermuda Triangle moves between analysis of popular fantasies and engagement with on the ground realities weaving together topics as diverse as airplane disasters off the U.S. Atlantic coast the global drug trade vampire culture in postsocialist Europe and the search for utopia in Chinese occupied Tibet The study of globalization is largely a solemn affair occupied with increasing economic polarities environmental degradation and global insecurity Free Trade in the Bermuda Triangle maintains a critical focus on these sobering issues but at the same time asks how popular pleasure and enjoyment can create viable alternatives to the current global order Neilson takes seriously the proposition that capitalism must be contested at its own level of generality finding provisional grounds for resistance in nonlocal transnational spaces that embody quotidian hopes desires

and anxieties By studying the real and imagined dimensions of these popular geographies his book seeks resources for social betterment in the fallen mythologies of the contemporary postutopian world

Geopolitical Exotica Dibyesh Anand, Geopolitical Exotica examines exoticized Western representations of Tibet and Tibetans and the debate over that land's status with regard to China Concentrating on specific cultural images of the twentieth century promulgated by novels popular films travelogues and memoirs Dibyesh Anand lays bare the strategies by which Exotica Tibet and Tibetanness have been constructed and he investigates the impact these constructions have had on those who are being represented Although images of Tibet have excited the popular imagination in the West for many years Geopolitical Exotica is the first book to explore representational practices within the study of international relations Anand challenges the parochial practices of current mainstream international relations theory and practice claiming that the discipline remains mostly Western in its orientation His analysis of Tibet's status with regard to China scrutinizes the vocabulary afforded by conventional international relations theory and considers issues that until now have been undertheorized in relation to Tibet including imperialism history diaspora representation and identity In this masterfully synthetic work Anand establishes that postcoloniality provides new insights into themes of representation and identity and demonstrates how IR as a discipline can meaningfully expand its focus beyond the West Dibyesh Anand is a
