Shaping Modern Liberalism Edward A. Stettner, 1993 A well researched and pertinent discussion of one of American liberalism s most important exponents Choice A concise intelligent and highly readable study What is fresh and extremely valuable is the flesh that Stettner puts on the bones of the old generalization about Croly and liberalism This is a worthy addition to the literature on this important and influential American thinker American Historical Review *Jean-Paul Sartre* Hector Davidson, Jean Paul Sartre a towering figure in 20th century philosophy is perhaps best known for his development of existentialism a school of thought that emphasizes individual freedom choice and the creation of meaning in an otherwise

indifferent universe Sartre's philosophy arises from the existentialist tradition but distinguishes itself through its rigorous approach to human freedom and responsibility At the heart of Sartre's thought is the idea that human beings are condemned to be free burdened with the constant task of making choices without any external justification or predetermined essence Born in Paris in 1905 Sartre's intellectual journey was shaped by early encounters with phenomenology and existential philosophy especially through the works of Edmund Husserl and Martin Heidegger However it was his engagement with phenomenology along with his studies in literature and politics that laid the groundwork for his later ideas Sartre's major philosophical work *Being and Nothingness* 1943 is considered one of the central texts of existentialist thought where he explores the nature of existence consciousness and freedom in profound detail Sartre's existentialism diverges from traditional metaphysical perspectives by rejecting the notion of an intrinsic human nature or essence For Sartre existence precedes essence meaning that individuals are not born with any predefined purpose or identity instead they must create their essence through their actions and choices This concept places the responsibility for defining oneself squarely on the individual leading to Sartre's famous assertion that man is nothing else but what he makes of himself

[Roman Women's Dress](#) Jan Radicke, 2022-11-07 The book concerns female dress in Roman life and literature The main focus is on female Roman dress as it may have been worn

in daily life in Rome and in a social environment influenced by Roman culture in the time from the beginnings of the Republic until the end of the 2nd century AD There is however a certain surplus as to its contents because many Latin texts also talk about mythical Greek dress and the largely fictional early Roman dress Altogether large parts of the history of Roman dress are only known to us through what scholars thought about it in Classical and Late Antiquity For this reason this book is not only about real female Roman dress but also about the ancient pseudo discourse on early female Roman dress which has been taken too seriously by modern scholarship This pseudo discourse has been mixed together with real facts to produce an ahistorical fabric It therefore appeared necessary to break with this old tradition and to take a completely new path The detailed analysis of many texts on female Roman dress is the basis of this new handbook meant for philologists historians and archaeologists alike

Modern Frames and Premodern Themes in Indian Philosophy A. Raghuramaraju, 2017-03-27

This book presents a fascinating examination of modern Indian philosophical thought from the margins It considers the subject from two perspectives how it has been understood beyond India and how Indian thinkers have treated Western ideas in the context of Indian society The book discusses the concepts of the self the other and the border that underline various debates on modernity In this framework it proposes the notion of the other as an enabler in taking cue from the lives of Swami Vivekananda Mahatma Gandhi and Rabindranath Tagore It focusses on the nature and compulsions of the colonised self and its response to the body of unfamiliar and sometimes oppressive ideas The study traces these themes with allusion to the works of Edward Said Frantz Fanon and Krishna Chandra Bhattacharyya and the Bhagavad Gita The author exposes the limitations in existing theories of self the incompatibility between the slavery of self and svaraj in ideas how the premodern village intersects modern city and democracy the radical challenges that confront society with its accumulated social evils inequality hierarchy and the need for reform and non violence This engaging work will be of interest to scholars and researchers of Indian philosophy social and political philosophy Indian political theory postcolonialism and South Asian studies

Reconsidering Michael Polanyi's Philosophy Stefania Ruzsits Jha, 2017-03-13

The chemist and philosopher Michael Polanyi 1891 1976 was one of the first twentieth century scientists to propose a program to resolve the internal conflict of the modern Enlightenment scientific detachment and moral nihilism with humanist values Stefania Jha s intellectual biography places Polanyi in the context of his time and culture analyzes his key philosophical ideas and explicates the application and at times misappropriation of his work Polanyi s method was not laid out in his published works and his vocabulary tends to make his writings difficult to understand By exposing the structure of his theory of tacit knowing and by tracing the growth of his thinking Jha shows how the various elements of his thought are integrated Through examination of his philosophical roots in Kant and the complexity of his evolving thought she counteracts the popular notion that Polanyi s philosophy stands apart from the western philosophic tradition Jha s deep analysis makes Polanyi s shift of focus from science to philosophy more intelligible his philosophy more approachable and the causes he championed such as the freedom of

science and cultural freedom more understandable Applying his notion of tacit knowing in practical directions Jha seeks to bring the study of Polanyi s philosophy out of the specialists enclave and into such fields as ethics and clinical medicine

Conversations in Early Modern Europe Johannes Ljungberg,Natacha Klein Käfer,2024-03-01 This open access book provides a multifold exploration of how people in early modern Europe understood conducted and actively used private conversations From sharing personal matters to discussing delicate secrets all layers of early modern society had their motives for wanting to keep certain exchanges out of public eyes and ears and ways of trying to achieve this Detecting such instances in historical sources typically becomes a complex pursuit full of subtle references that require creative approaches especially when it comes to more informal practices Yet in a reading against the grain different sources can offer us hints of how conversations took place in private The book consists of a historiographical and methodological introduction to the study of private conversations followed by ten case studies from a variety of cities villages and countryside across early modern Europe The concluding epilogue suggests some pathways to further explore the terrain of how people have talked in private in past societies [From Darwinian Metaphysics Towards Understanding the Evolution of Evolutionary Mechanisms](#)

Momme von Sydow,2012 Although Charles Darwin predicted that his theory would give zest to metaphysics even he would be astonished at the variety of paths his theory has in fact taken This holds with regard to both gene Darwinism a purified Darwinian approach biologizing the social sciences and process Darwinism found in the disciplines of psychology philosophy of science and economics Although Darwinism is often linked to highly confirmed biological theories some of its interpretations seem to profit from tautological claims as well where scientific reputation cloaks ideological usage This book discusses central tenets of Darwinism historically as well as systematically for example the history of different Darwinian paradigms the units of selection debate and the philosophical problem of induction as basis of metaphysical Darwinism Crucially the book addresses the Darwinian claim that evolution is governed by an immutable and unrelentingly cruel law of natural selection Paradoxically Darwins theory is a static non evolutionary theory of evolution The current book sketches the historical background and provides suggestions that may help to replace this approach by the idea of an evolution of

evolutionary mechanisms see Escher's Drawing Hands on the cover This view even suggests a tendency to overcome the blindness of the knowledge acquisition of primordial Darwinian processes and allows for some freedom from external environments This book first develops a radically Darwinian approach then criticises this approach from within Even Darwinism has a tendency to transcend itself Although the book addresses several empirical issues it does not challenge particular findings Instead it builds on many insights of Darwinism and provides a proposal for interpreting known empirical evidence in a different light It should help pave the way for further developing an understanding of nature that transcends Darwinian metaphysics Publisher's description
