Shared Beliefs Different Lives:

Helping Children Live With Death and Loss Dinah Seibert, 2003 *Digital Life Together* David I. Smith, Kara Sevensma, Marjorie Terpstra, Steven McMullen, 2020-05-05 Digital technologies loom large in the experience of today's students. However, parents, teachers, and school leaders have only started to take stock of the ramifications for teaching learning and faith. Based on a three-year in-depth study of Christian schools, *Digital Life Together* walks educators, school leaders, and parents through some of the big ideas that are hidden in our technology habits, going beyond general arguments for or against digital devices to address the nuanced realities of Christian education in a twenty-first century context.

Its goal is to define, explore the key concepts, methodologies, research activities, as well as the controversies, future directions of the field. **Living Law** Roger Cotterrell, 2017-07-05 *Living Law* presents a comprehensive overview of relationships between legal and social theory and of current approaches to the sociological study of legal ideas. It explores the nature of legal theory and sociolegal studies today as teaching and research fields and the work of many of the major sociolegal theorists. In addition, it sets out the author's distinctive approach to sociological analysis of law, applying this in a range of studies in specific legal fields such as the law of contract, property, and trusts, constitutional analysis, and comparative law. *New Mexico Standards for Public Land Health and Guidelines for Livestock Grazing Management*, 2000

New Mexico State Office, 2000 Documents the effects of adopting standards for public land health and guidelines for livestock grazing management on Bureau of Land Management (BLM) administered land in New Mexico. The standards and guidelines would be incorporated into eight BLM resources management plans (RMP) that cover approximately 13.5 million acres. In addition, for each alternative, there are existing land use decisions that are in conformance with the standards. These decisions would be changed to bring them into conformance. Page xiii

personal passion There is no index c Book News Inc Imposed Rationality and Besieged Imagination Gustavo Pereira, 2019-10-24 Social pathologies are social processes that hinder how individuals exercise their autonomy and freedom In this book Gustavo Pereira offers an account of such phenomena by defining them as a cognitive failure that affects the practical imagination thus negatively interfering with our practical life This failure of the imagination is the consequence of the imposition of a type of practical rationality on a practical context alien to it caused by a non conscious transformation of the individuals set of beliefs and values The research undertaken provides an innovative explanation in terms of microfoundations based on the mechanism of availability heuristic by which the diminished exercise of the imagination turns the intuitively available or prevailing rationality into the one that regulates behaviour in inappropriate contexts Additionally this incorrect regulation results in a progressive distortion of the shared sense of the affected practical contexts which becomes institutionalized Consumerism bureaucratism moralism juridification some forms of corruption and the particular Latin American case of malinchism can be interpreted as social pathologies insofar as they imply such distortion This way of conceptualizing social pathologies integrates the traditional sociological macro explanation manifested through the negative consequences of the processes of social rationalization with a micro explanation articulated around the findings of cognitive psychology such as availability heuristic Understanding social pathologies as a cognitive failure allows us to identify the introduction of normative friction as the main way to counteract their effects One of the potential effects of normative friction as a specific form of cognitive dissonance is the intense exercise of the imagination thus operating as a condition of possibility for the exercise of autonomy and reflection Democratic ethical life understood as a shared democratic culture as well as social institutions and narratives are the privileged social spaces and means to trigger reflective processes that can counteract social pathologies through a reflective reappropriation of the meaning of the shared practical context An extraordinary contribution by a Critical Theorist to the return of the concept of imagination today It takes up the challenge once taken by Kant to think about imagination as the pivotal activity not only of knowledge and experience but above all for action The author claims that imagination makes criticism possible pathologies and it allows us to envision alternative views into the path for social transformation Without imagination nothing is possible Mar a P a Lara Universidad Autonoma Metropolitana Iztapalapa Mexico **Essays on the Doctrinal Study of Law** Aulis Aarnio, 2011-07-10 Essays on the Doctrinal Study of Law is a summary of the author's 40 years of research in the fields of civil law and the philosophy of law The main focus is on the two main tasks in the doctrinal study of law the interpretation and systematisation of legal norms In this regard Professor Aarnio deals with the theory of argumentation as well as with its foundations i e with the ontology epistemology and methodology of legal thinking and develops the ideas that were first presented in *The Rational as Reasonable* Kluwer 1987 in all of these dimensions The work includes an updated discussion on the writings of Robert Alexy Jrgen Habermas Ronald Dworkin and Alf Ross A focal point of view concerns the distinction between positivism and non

positivism in which the core of the criticism focuses on Scandinavian realism **Rebels for the Soil** Matthew Reed, 2010-09-23 This book investigates the emergence of organic food and farming as a social movement Using the tools of political sociology it analyzes and explains how both people and ideas have shaped a movement that from its inception aimed to change global agriculture Starting from the British Empire in the 1930 s where the first trans national roots of organic farming took hold through to the internet mediated social protests against genetically modified crops at the end of the twentieth century the author traces the rise to prominence of the movement As well as providing a historical account the book explains the movement s on going role in fostering and organising alternatives to the dominant intensive and industrial forms of agriculture such as promoting local food produce and animal welfare By considering it as a trans national movement from its inception aiming at cultural and social change the book highlights what is unique about the organic movement and why it has risen only relatively recently to public attention The author reports original research findings focusing largely on the English speaking world The work is grounded in academic enquiry and theory but also provides a narrative through which the movement can be understood by the more general interested reader **A Different Touch** Judith A. Merkle, 1998 A Different Touch speaks of the challenges of religious life today where the essentials of Christian living and union with God are still sought via a different touch The book looks at the relationship of Christian lifestyle and the place of religious life in the matrix of Christian living and then comments individually on the traditional vows of religious life A section on new times for poverty obedience and celibacy relates each vow to current cultural and socio political issues **Representation and Reality in Humans, Other Living Organisms and Intelligent Machines** Gordana Dodig-Crnkovic, Raffaella Giovagnoli, 2017-08-29 This book enriches our views on representation and deepens our understanding of its different aspects It arises out of several years of dialog between the editors and the authors an interdisciplinary team of highly experienced researchers and it reflects the best contemporary view of representation and reality in humans other living beings and intelligent machines Structured into parts on the cognitive computational natural sciences philosophical logical and machine perspectives a theme of the field and the book is building and presenting networks and the editors hope that the contributed chapters will spur understanding and collaboration between researchers in domains such as computer science philosophy logic systems theory engineering psychology sociology anthropology neuroscience linguistics and synthetic biology
