Sharing Geographic Information:

Advances in Cartography and Geographic Information Engineering Jiayao Wang, Fang Wu, 2021-07-30 This book reviews and summarizes the development and achievement in cartography and geographic information engineering in China over the past 60 years after the founding of the People's Republic of China. It comprehensively reflects cartography as a traditional discipline that has almost the same long history with the world's first culture and has experienced extraordinary and great changes. The book consists of nineteen thematic chapters. Each chapter is in accordance with the unified directory structure: introduction, development process, major study achievements, problem and prospect, representative works, as well as a lot of references. It is useful as a reference both for scientists and technicians who are engaged in teaching, researching, and engineering of cartography and geographic information engineering.

Mapping the Determinants of Spatial Data Sharing Uta Wehn de Montalvo, 2024-11-01 This title was first published in 2003. With the increasing use of GIS in industrialised and developing countries, the availability of spatial data has become an issue that affects many public and private sector organisations. They are faced with the high cost and substantial effort involved in the generation of spatial data, and so the sharing of this data is increasingly being seen as a way of overcoming expense and easing availability and access. But this can provide a way of using GIS effectively only if the key players involved in the use and supply of spatial data are willing to share. This book employs a theory from social psychology as an organising framework to systematize the determinants of organisations' spatial data sharing behaviour. It develops a model which explains the likely willingness of key individuals within organisations to engage in spatial data exchanges across organisational boundaries and then tests this on a survey based in South Africa.

Community Participation and Geographical Information Systems William J. Craig, Trevor M. Harris, Daniel Weiner, 2002-04-04 Have you ever considered how much effect information technology has on society throughout the world? Progress often places lower income and marginalized communities at a distinct disadvantage. *Community Participation and Geographic Information Systems* however offers a detailed look at numerous incidences around the world where communities have achieved success. **Environmental Information Management And Analysis** W K Michener, J W Brunt, S G Stafford, 1994-08-08 Most environmental studies are based upon data collected at fine spatial scales: plots, sediments, cores, etc. Furthermore, temporal scales of these studies have been relatively short: days, weeks, months, and few studies have exceeded three years duration, the typical funding cycle. Despite this history, environmental scientists are now being called

Geographic Information Research Massimo Craglia, H. Couclelis, 2020-10-28 The contributors to this edited collection demonstrate that geographic information research is truly global in character, cutting across a wide range of disciplines and addressing conceptual, methodological, technical, ethical, and political issues alike. Of the six themes, two are broadly concerned with data integration, geographic data infrastructures, GIS diffusion, and implementation; two are more technical and conceptual in nature, generalisation concepts and paradigms; and two reflect to a larger extent the application-driven

nature of GIS technology spatial analysis and multimedia Each section is introduced by chapters highlighting the key research issues Further chapters explore these issues in greater depth and benefit from the international collaboration Through the comparison of results included in this book the prospects for advancing the field and addressing the challenges of GIS research are greatly improved

Geographical Information '97 Stuart Hodgson, Massimo Rumor, Jan Jaap Harts, 1997 Geographical Information is essential for the layout planning and management of space and involves taxation cadastral data bases environmental policy water management maintenance and protection of pipeline systems terrain modelling and the making of maps The third European conference brought together some 300 speakers and authors from academia industry and government The resulting monumental work is representative for the state of the art of knowledge and information on Geographical Information

A Research Agenda for Geographic Information Science Robert B. McMaster, E. Lynn Usery, 2004-08-30 A close relationship exists between GIS and numerous applications including cartography photogrammetry geodesy surveying computer and information science and statistics among others Scientists coined the term geographic information science GIScience to describe the theory behind these fields A Research Agenda for Geographic Information

Sharing Ecosystem Services Osamu Saito, 2019-08-09 Using the sharing paradigm as a guiding concept this book demonstrates that sharing has much greater potential to make rural society resilient sustainable and inclusive through enriching all four sharing dimensions informal mediated communal and commercial sharing The chapters are divided into two parts one that focuses on case studies of the sharing ecosystem services in Japan the other on case studies from around the world including in the regions of Africa Asia Pacific South America and Europe Reflecting the recent growing attention to sharing concept and its application to economic and urban context this publication explores opportunities and challenges to build more resilient and sustainable society in harmony with nature by critical examination of sharing practices in rural landscapes and seascapes around the world This book introduces not only traditional communal and non market sharing practices in different rural areas but also new forms of sharing through integration of traditional practices and modern science and technologies

Sharing Geographic Information Harlan Joseph Onsrud, Gerard Rushton, 1995 Contributors describe and analyze their past experiences both successful and unsuccessful in sharing geographic data They identify opportunities options and potential pitfalls for organizations as well as for individuals and recommend strategies and models for improved information sharing

Geographic Information Systems Tor Bernhardsen, 2002-05-23 If we are to solve many of the problems facing us in the cities in the wild areas of the earth in the atmosphere and the oceans we shall need the help of skilled users of GIS technology If readers can master what is in this volume they will be well started on this enterprise From the Foreword by Jack Dangermond President of ESRI Praise for previous editions One of only a small number of texts devoted to the technology of GIS that are truly introductory in nature Very readable and of moderate length Those who are real novices to GIS will find this one attractive Computers and

Geosciences Well rendered and very clear line drawings well written with a well balanced blend of technical theoretical concepts and more applied facts of GIS Professional Geographer Geographic Information Systems provides a practical theory driven overview of GIS that is supported with clear coverage of basic techniques This treatment enables readers to understand the broad aspects of GIS without focusing on a specific software or discipline such as engineering or geography New features of this Third Edition include up to date information on standardization efforts aimed at facilitating the exchange of ideas and data technical content that is up to date with current hardware software database design and analytical techniques and comprehensive cost benefit guidelines for choosing and evaluating a GIS including coverage of organizational and technical issues Complete with extensive references and links to online resources Geographic Information Systems Third Edition is an exceptional resource for students of GIS planning land use natural resources civil and environmental engineering real estate and wildlife biology

Geographical Information and Planning John

Stillwell, Stan Geertman, Stan Openshaw, 2013-03-09 The 1990s have seen some remarkable changes in geographical information GI provision and computer technology that have impacted on many of the activities that constitute planning in all its different forms However relatively few texts in the field of geographical information systems GIS and planning have been published since Henk Scholten and John Stillwell edited Geographical Information Systems for Urban and Regional Planning in 1990 This volume seeks to redress the balance by showing how GI of various types is being used in urban physical environmental socio economic and business planning contexts at local regional and national scales with the assistance of GIS and modelling methods and how the uses of GI and GI technologies have evolved over the last decade During this period a number of meetings took place in Europe in different locations organised initially by European Geographical Information Systems EGIS 1990 94 and more recently by the Joint European Conference and Exhibition JEC on Geographical Information 1995 97 These meetings brought together members of the GI community from across the world to discuss GI research and GIS applications One of the Special Interest Groups associated with the JEC gatherings was that on Geographical Information and Planning and several of the contributions in this book have their origins in papers presented to the group s meetings

Geography in America at the Dawn of the 21st Century Gary L. Gaile, Cort J. Willmott, 2005 Geography in America at the Dawn of the 21st Century surveys American geographers current research in their specialty areas and tracks trends and innovations in the many subfields of geography As such it is both a state of the discipline assessment and a topical reference It includes an introduction by the editors and 47 chapters each on a specific specialty The authors of each chapter were chosen by their specialty group of the American Association of Geographers AAG Based on a process of review and revision the chapters in this volume have become truly representative of the recent scholarship of American geographers While it focuses on work since 1990 it additionally includes related prior work and work by non American geographers The initial Geography in America was published in 1989 and has become a benchmark reference of American geographical research
