Sharing Security The Political Economy Of Burdensharing:

Sharing Security M. Chalmers, 2016-04-30 *Sharing Security* is a unique and comprehensive study of a key yet often neglected feature of modern international society. It begins by assessing how political theory can contribute to an understanding of international burdensharing. It then analyses in turn why some Western states contribute more than others to common defences, the European Union budget and overseas development aid. It highlights the particular burdensharing problems involved in global regimes focusing on the UN's continuing financial crisis and the costs of combating global warming. It argues that today's burdensharing disparities continue to be shaped by the particular character of the international settlement at the end of the Second World War. **Routledge Handbook of NATO** John Andreas

Olsen, 2024-06-10 This handbook provides a comprehensive survey of the development and importance of the North Atlantic Treaty Organisation (NATO), its role in international relations and its influence on history. The volume examines the Alliance's evolution in breadth, depth and context by analysing and explaining why and how NATO has endured and remained relevant since its creation. To present an inclusive study of the Alliance's activities and milestone events and to offer a glimpse of future challenges, the book's 29 chapters fall into six thematic sections that act as frameworks and allow the exploration of specific topics that pertain to the evolution of NATO. Part I: History of NATO 1949-2024. Part II: Key Enduring Themes 1949-2024. Part III: Military Operations 1995-2024. Part IV: National Perspectives 1949-2024. Part V: Regional Perspectives 1949-2024. Part VI: Future Prospects 2024. This handbook will be of much interest to students and researchers of NATO, strategic studies, defence studies and International Relations, as well as for staff and fellows at security and defence-oriented think tanks and government officials, military personnel and other practitioners in the areas of foreign affairs and defence.

Military Expenditure Saadet Deger, Somnath Sen, 1990 The purpose of this book is to analyse world military expenditure at the end of the 1980s and to discuss its political and economic implications. After a decade of unprecedented expansion of international military spending, its level is falling, though modestly. Political developments in Europe and the success of arms control negotiations raise hopes for further reductions. In addition, technological and economic structural disarmament is adding to the pressure for reductions. However, performance has not matched up to promises and formidable obstacles to defence spending limitations still remain. *Military Expenditure* surveys recent events and describes the process of change that characterizes international military expenditure and its determinants at this time of transformation.

Common Security Interests in the Pacific and how the Cost and Benefits of Those Interests are Shared by the U.S. and Its Allies United States. Congress. House. Committee on Armed Services. Defense Burdensharing Panel, 1989 **NATO's**

Burden-Sharing Disputes Tommi Koivula, Heljä Ossa, 2022-02-26 This book states that burden sharing is one of the most persisting sources for tension and disagreement within NATO (North Atlantic Treaty Organisation). It also belongs to one of the most studied issues within NATO with distinguishable traditions and schools of thought. However, this pertinent question has

been rarely discussed extensively by academics The key idea of the book is to make burden sharing more understandable as a historical contemporary and future phenomenon The authors take a comprehensive look at what is actually meant with burden sharing and how it has evolved as a concept and a real life phenomenon through the 70 years of NATO's existence

Power, Economics, And Security Henry Bienen, 2019-10-16 This volume is dedicated to the memory of Klaus E Knorr This is fitting for a number of reasons The collaborative work here was done under the auspices of the Center of International Studies at Princeton University which Klaus Knorr directed from 1961 until 1968 The concerns of this book are to analyze the relationships among economic and military power and national security to explore the ways economic power and economic decline relate to international hegemony and to examine our understanding of concepts such as power security and burden sharing These concerns ranked high on Klaus Knorr's research agenda during his productive and fruitful life

The US, NATO and Military Burden-Sharing Stephen J. Cimbala, Peter Forster, 2005-10-21 This study establishes that the political economic and military technological changes that transform the international system also alter the way in which a state views its and others responsibilities and burdens for responding to international crises It assesses the distribution of the costs of raising and supporting arms of service the risks of deploying them overseas and using them in combat or peace operations and the extent to which members have a responsibility for maintaining international order in the context of three instances of multinational military intervention the Multinational Force deployment in Lebanon in 1982-83 the first Persian Gulf War in 1990-91 and the UN and NATO intervention in Bosnia Herzegovina

US Hegemony, American Troops Abroad and Burden-Sharing Nobuki Kawasaki, Takeshi Sakade, Hubert Zimmermann, 2024-12-03 Kawasaki Sakade Zimmermann and their contributors examine the historical development of burden sharing among the United States US and its allies after World War II looking at examples from Western Europe and East Asia Through a series of case studies the contributors to this volume identify the characteristics and historical transformations in the burden sharing relationships between the US and its allies In addition to diplomatic and security concerns they also look at the economic and financial dimensions of burden sharing and how all these elements are intertwined They also address the different dynamics of burden sharing between the US and Western Europe notably Germany and the United Kingdom UK on the one hand and between the US and East Asia particularly Japan and Korea on the other In particular they argue that while Western European countries provided most of the economic and political support for American policies until the 1960s the economic support from East Asian countries became much more important from the 1970s onwards This book is a valuable contribution to the literature on burden sharing and strategic alliance for scholars of international relations and the diplomatic history of the Cold War

Theorising NATO Mark Webber, Adrian Hyde-Price, 2015-11-19 Scholarship on NATO is often preoccupied with key episodes in the development of the organisation and so for the most part has remained inattentive to theory This book addresses that gap in the literature It provides a comprehensive analysis of NATO through a range of theoretical

perspectives that includes realism liberalism and constructivism and lesser known approaches centred on learning public goods securitisation and risk Focusing on NATO s post Cold War development it considers the conceptualisation purpose and future of the Alliance This book will be of interest to students and scholars of international organisation international relations security and European Politics **Coping with Caveats in Coalition Warfare** Gunnar Fermann,2018-09-01 This book develops a framework for analysis and a set of research strategies to better understand the conditions and mechanisms involved in the considerable use of caveats by states contributing militarily to coalition operations In the professional language of military servicemen security analysts and decision makers caveats refers to the reservations on the use of force states put on their military contingents as a precondition to participate in particular multinational enforcement operations Such understood caveats are an instrument of statecraft and foreign policy However caveats also are a potential threat to the integrity and military effectiveness of the coalition force in question and further down the road an erosion on the fabric of security alliances This volume is ideal for audiences interested in military and defence studies security studies and coalition warfare **Sharing the Burden?** Benjamin Zyla,2015-01-01 Benjamin Zyla rejects the claim that countries like Canada have shirked their responsibilities within NATO since the fall of the Berlin Wall **The Political Economy of Defence** Ron Matthews,2019-05-09 A contemporary and comprehensive analysis of national and supranational defence governance in an uncertain and increasingly dangerous world This book will appeal to policymakers analysts graduate students and academics interested in defence economics political economy public economics and public policy *The Burden-Sharing Dilemma* Brian D. Blankenship,2023-11-15 The Burden Sharing Dilemma examines the conditions under which the United States is willing and able to pressure its allies to assume more responsibility for their own defense The United States has a mixed track record of encouraging allied burden sharing while it has succeeded or failed in some cases it has declined to do so at all in others This variation Brian D Blankenship argues is because the United States tailors its burden sharing pressure in accordance with two competing priorities conserving its own resources and preserving influence in its alliances Although burden sharing enables great power patrons like the United States to lower alliance costs it also empowers allies to resist patron influence Blankenship identifies three factors that determine the severity of this burden sharing dilemma and how it is managed the latent military power of allies the shared external threat environment and the level of a patron s resource constraints Through case studies of US alliances formed during the Cold War he shows that a patron can mitigate the dilemma by combining assurances of protection with threats of abandonment and by exercising discretion in its burden sharing pressure Blankenship s findings dismantle assumptions that burden sharing is always desirable but difficult to obtain Patrons as the book reveals can in fact be reluctant to seek burden sharing and attempts to pass defense costs to allies can often be successful At a time when skepticism of alliance benefits remains high and global power shifts threaten longstanding pacts The Burden Sharing Dilemma recalls and reconceives the value of burden sharing and alliances *The Political*

Economy of National Security Ethan B. Kapstein, 1992 The Political Economy of National Security is the only text on the market that analyzes the economic dimensions of national security Given the specialization of writings in international relations authors tend to treat security studies and political economy as separate spheres with no apparent linkage By probing the interface between economics and security this text offers a deeper understanding of both U.S. Security Issues in Europe: Burden Sharing and Offset, MBFR and Nuclear Weapons: September 1973 James G. Lowenstein, Richard M. Moose, 1973 *NATO and the Future of European Security* Sean Kay, 1998 Tracing NATO's formative years its Cold War development and its post Cold War evolution Sean Kay draws on his policy experience in Brussels and Washington to provide unique insights into contemporary policy challenges including NATO's outreach to the East and its Partnership for Peace peacekeeping and the future of the Balkans enlargement and the role of Russia in Europe NATO's internal military adaptation and the future of the transatlantic relationship Kay argues that although NATO has evolved to some degree it remains an institution dependent upon the United States with uncertain long term prospects for playing a constructive role in Europe Indeed the author shows that if not implemented carefully NATO enlargement may actually decrease rather than increase stability in the region *The Political Economy of NATO* Todd Sandler, Keith Hartley, 1999-04-13 Using simple economic methods while accounting for political and institutional factors this book puts forward a political economy viewpoint of NATO's current status and its future prospects A host of NATO policy concerns are addressed including the optimal membership for the alliance its role in peacekeeping missions worldwide the appropriate methods for deterring terrorism and proper procurement practices for the next generation of weapons Additional topics concern defense burden sharing arms trade NATO's institutional structure and NATO's role vis a vis other international organizations Although the analysis is rigorous the book is intended for a wide audience drawn from political science and economics **Hearings on National Defense Authorization Act for Fiscal Year 1993--H.R. 5006 and Oversight of Previously Authorized Programs Before the Committee on Armed Services, House of Representatives, One Hundred Second Congress, Second Session** United States. Congress. House. Committee on Armed Services. Subcommittee on Military Installations and Facilities, 1992 **Hearings Before and Special Reports Made by Committee on Armed Services of the House of Representatives on Subjects Affecting the Naval and Military Establishments , Beyond 2%—NATO Partners, Institutions & Burden Management** Anessa L. Kimball, 2023-01-03 This book advances North Atlantic Treaty Organization henceforth NATO burden analysis through a decomposition of the political financial social and defense burdens members take on for the institution The overemphasis of committing a minimum of 2% of member state Gross Domestic Product GDP to defense spending as a proxy indicator of alliance commitment does not properly reflect how commitments reduce risks should Article V be invoked through attack i.e. 2% is a political new data permit testing the argument Kavanaugh 2014 This book contributes conceptual innovation and theoretical analysis to advance student researcher and policymaker

understanding of burden management strategic bargaining and defense cooperation The contribution is a generalizable risk management model of IO burden sharing using NATO as the case for scientific study due to its prominence
