On the Ocean Sir Barry Cunliffe, 2017-12-15 For humans the sea is and always has been an alien environment Ever moving and ever changing in mood it is a place without time in contrast to the

land which is fixed and scarred by human activity giving it a visible history While the land is familiar even reassuring the sea is unknown and threatening By taking to the sea humans put themselves at its mercy It has often been perceived to be an alien power teasing and cajoling The sea may give but it takes Why then did humans become seafarers Part of the answer is that we are conditioned by our genetics to be acquisitive animals we like to acquire rare materials and we are eager for esoteric knowledge and society rewards us well for both Looking out to sea most will be curious as to what is out there a mysterious island perhaps but what lies beyond Our innate inquisitiveness drives us to explore Barry Cunliffe looks at the development of seafaring on the Mediterranean and the Atlantic two contrasting seas the Mediterranean without a significant tide enclosed and soon to become familiar the Atlantic with its frightening tidal ranges an ocean without end We begin with the Middle Palaeolithic hunter gatherers in the eastern Mediterranean building simple vessels to make their remarkable crossing to Crete and we end in the early years of the sixteenth century with sailors from Spain Portugal and England establishing the limits of the ocean from Labrador to Patagonia The message is that the contest between humans and the sea has been a driving force perhaps the driving force in human history

On the Ocean Barry W. Cunliffe, 2017 The story of the contest between humans and the sea played out in the Mediterranean and the Atlantic from early prehistory until AD 1500

Charlemagne s empire was in ruins most of Spain had been claimed by Moorish invaders and even the papacy in Rome was embroiled in petty provincial conflicts To many historians it was a prime example of the ignorance and uncertainty of the Dark Ages Yet according to historian Paul Collins the story of the tenth century is the story of our culture s birth of the emergence of our civilization into the light of day The Birth of the West tells the story of a transformation from chaos to order exploring the alien landscape of Europe in transition It is a fascinating narrative that thoroughly renovates older conceptions of feudalism and what medieval life was actually like The result is a wholly new vision of how civilization sprang from the unlikeliest of origins and proof that our tenth century ancestors are not as remote as we might think *Achieving sustainable greenhouse cultivation* Professor Leo F.
