Lucifers Hammer 1:

Lucifer's Hammer Larry Niven, Jerry Pournelle, 1985-05-12 The first satisfying end of the world novel in years an ultimate one massively entertaining Cleveland Plain Dealer The gigantic comet had slammed into Earth forging earthquakes a thousand times too powerful to measure on the Richter scale tidal waves thousands of feet high Cities were turned into oceans oceans turned into steam It was the beginning of a new Ice Age and the end of civilization But for the terrified men and women chance had saved it was also the dawn of a new struggle for survival a struggle more dangerous and challenging than any they had ever known Take your earthquakes waterlogged condominiums swarms of bugs colliding airplanes and flaming what nots wrap them up and they wouldn't match one page of Lucifer's Hammer for sweaty palmed suspense Chicago Daily News

Lucifer's Hammer Jerry Pournelle, 1981-04 Captain Rick Galloway and his men had been talked into volunteering for a dangerous mission only to be ruthlessly abandoned when faceless CIA higher ups pulled the plug on the operation They were cut off in hostile territory with local troops and their Cuban advisors rapidly closing in And then the alien spaceship landed Copyright Libri GmbH All rights reserved

Cosmic Impact Andrew May, 2019-02-07 As end of the world scenarios go an apocalyptic collision with an asteroid or comet is the new kid on the block gaining respectability only in the last decade of the 20th century with the realisation that the dinosaurs had been wiped out by just such an impact Now the science community is making up for lost time with worldwide efforts to track the thousands of potentially hazardous near Earth objects and plans for high tech hardware that could deflect an incoming object from a collision course a procedure depicted with little regard for scientific accuracy in several Hollywood movies Astrophysicist and science writer Andrew May disentangles fact from fiction in this fast moving and entertaining account covering the nature and history of comets and asteroids the reason why some orbits are

more hazardous than others the devastating local and global effects that an impact event would produce and more optimistically the way future space missions could avert a catastrophe

Database Modeling Step by Step Gavin Powell,2020-01-06 With the aim of simplifying relational database modeling Database Modeling Step by Step presents the standard approach to database normalization and then adds its own approach which is a more simplistic intuitive way to building relational database models Going from basics to contemporary topics the book opens with relational data modeling and ends with BigData database modeling following a road map of the evolution in relational modeling and including brief introductions to data warehousing and BigData modeling A break down of the elements of a model explains what makes up a relational data model This is followed by a comparison between standard normalization and a more simplistic intuitive approach to data modeling that a beginner can follow and understand A brief chapter explains how to use the database programming language SQL Structured Query Language which reads from and writes to a relational database SQL is fundamental to data modeling because it helps in understanding how the model is used In addition to the relational model the last three chapters cover important modern world topics including denormalization that leads into data warehouses and BigData database modeling The book explains how there is not much to logical data modeling in BigData databases because as they are often schema less which means that BigData databases do not have schemas embedded into the database itself they have no metadata and thus not much of a logical data model Online bonus chapters include a case study that covers relational data modeling and are available at the author s web site www.oracletroubleshooter.com/datamodeling.html

Curtis,2010-07-17 Postapocalyptic Fiction and the Social Contract We ll Not Go Home Again provides a framework for our fascination with the apocalyptic events The popular appeal of the end of the world genre is clear in movies novels and television shows Even our political debates over global warming nuclear threats and pandemic disease reflect a concern about the possibility of such events This popular fascination is really a fascination with survival how can we come out alive And what would we do next The end of the world is not about species death but about beginning again This book uses postapocalyptic fiction as a terrain for thinking about the state of nature the hypothetical fiction that is the driving force behind the social contract The first half of the book examines novels that tell the story of the move from the state of nature to civil society through a Hobbesian a Lockean or a Rousseauian lens including Lucifer s Hammer by Larry Niven and Jerry Pournelle Alas Babylon by Pat Frank Malevil by Robert Merle and Into the Forest by Jean Hegland The latter half of the book examines Octavia Butler s postapocalyptic Parable series in which a new kind of social contract emerges one built on the fact of human dependence and vulnerability

welcomed home by an Apple that was just as battered and bruised as he was and on the brink of the abyss How these two entities Steve the man and Apple the company healed each other is well worth learning Ninety days from bankruptcy Apple welcomed home its founder in 1996 In less than a decade Steve accomplished the impossible Apple was now a trillion dollar juggernaut Their domain included Music Books Smartphones Tablets Laptops and more Within these pages are the often overlooked misunderstood or misrepresented lessons that made it all possible and you won't find them anywhere else Grab your copy of Anatomy of an Apple The Lessons Steve Taught Us today **An Informal History of the Hugos** Jo

Walton, 2018-08-07 Engaged passionate and consistently entertaining An Informal History of the Hugos is a book about the renowned science fiction award for the many who enjoyed Jo Walton's previous collection of writing from Tor.com the Locus Award winning What Makes This Book So Great The Hugo Awards named after pioneer science fiction publisher Hugo Gernsback and voted on by members of the World Science Fiction Society have been presented since 1953 They are widely considered the most prestigious awards in science fiction Between 2010 and 2013 Jo Walton wrote a series of posts for Tor.com surveying the Hugo finalists and winners from the award's inception up to the year 2000 Her contention was that each year's full set of finalists generally tells a meaningful story about the state of science fiction at that time Walton's cheerfully opinionated and vastly well informed posts provoked valuable conversation among the field's historians Now these posts lightly revised have been gathered into this book along with a small selection of the comments posted by SF luminaries such as Rich Horton Gardner Dozois and David G Hartwell A remarkable guided tour through the field a kind of nonfiction companion to Among Others It's very good It's great New York Times bestselling author Cory Doctorow Boing Boing on What Makes This Book So Great **Ecology of Fear** Mike Davis, 2022-02-15 A witty and engrossing look at Los Angeles urban
