Ludwig Persius The Architectural Work Today:

Ludwig Persius Ludwig Persius, Hillert Ibbeken, 2005 Ludwig Persius 1803 1845 architecture was molded by the work of Karl Friedrich Schinkel He was a master of the disposition of building volumes and of tying buildings into the landscape About 50 buildings have survived including early industrial structures **Architectural work today** Hillert Ibbeken, Karl Friedrich Schinkel, Elke Blauert, 2002 Records and assembles material on over 150 buildings by Karl Schinkel Germany's most important 19th century architect *Hut Pavilion Shrine: Architectural Archetypes in Mid-Century Modernism* Miles David Samson, 2016-03-09 The phase of American architectural history we call mid century modernism 1940 1980 saw the spread of Modern Movement tenets of functionalism social service and anonymity into mainstream practice It also saw the spread of their seeming opposites Temples arcades domes and other traditional types occur in both modernist and traditionalist forms from the 1950s to the 1970s Hut Pavilion Shrine examines this crossroads of modernism and the archetypal and critiques its buildings and theory The book centers on one particularly important and omnipresent type the pavilion a type which was the basis of major work by Louis I Kahn Paul Rudolph Philip Johnson Minoru Yamasaki and other eminent architects While focusing primarily on the architecture culture of the United States it also includes the work of British European Team X and Scandinavian designers and writers Making connections between formal analysis historical context and theory the book continues lines of inquiry which have been pursued by Neil Levine and Anthony Vidler on representation and by Sarah Goldhagen and Alice Friedman on modernism's forbidden elements of the honorific and the visually pleasurable It highlights the significance of pavilionizing mid century designers such as Victor Lundy John Johansen Eero Saarinen and Edward Durrell Stone and shows how frequently essentialist and traditionalist types appeared in the roadside vernacular of drive in restaurants gas stations furniture and car showrooms branch banks and motels The book ties together the threads in mid century architectural theory that addressed aspects of type essential structure and primal humanistic aspects of environment making and discusses how these concerns outlived the mid century moment and in the designs and writings of Aldo Rossi and others they paved the way for Post Modernism *Architectural Record*, 1928

Joyce in the Belly of the Big Truck; Workbook Joyce A. Cascio, 2005-05 **Imaginary Athens** Jin-Sung Chun, 2020-11-25 This book comprehensively examines architecture urban planning and civic perception in three modern cities as they transform into national capitals through an entangled transnational process that involves an imaginative geography based on embellished memories of classical Athens Schinkel's classicist architecture in Berlin especially the principle of tectonics at its core came to be adopted effectively at faraway cities in East Asia merging with the notion of national polity as Imperial Japan sought to reinvent Tokyo and mutating into an inevitable reflection of modern civilization upon reaching colonial Seoul all of which give reason to ruminate over the phantasmagoria of modernity Byzantium and British Heritage Amalia G. Kakissis, 2023-07-12 Byzantium was a very influential part of the development of the Arts and Crafts Movement 1880 1910 in

Britain and although the influence of the Gothic Revival 1830-80 is well known that of the Byzantine Revival 1840-1910 is not. This volume is about the people and the movements that created the Byzantine Revival and shows how they influenced British heritage from architecture to the decorative arts during the late nineteenth and early twentieth centuries. The central pillars of the volume are the architects and scholars who created the Byzantine Research Fund (BRF) Archive, a unique collection of architectural drawings and photographs of numerous monuments across the Byzantine world and the social and professional networks in which they circulated. The BRF members, an eclectic and little-known group who based themselves at the newly founded British School at Athens, established the research of Byzantium in Britain and Greece. They were trained in the traditions of the Arts and Crafts Movement, which sought authenticity in design and decoration in reaction to the styles that had developed through industrialisation. Their work, uniting a distinctively British design tradition with Byzantine arts and crafts, represents a highly significant and under-researched link between Britain and the Hellenic world. This volume is the first contribution to try to fill this knowledge gap. Byzantium and British Heritage will appeal to all those interested in the relation between Byzantine and British culture and Byzantine art. *A Universal Man* Karl Friedrich Schinkel, 1991-01-01

This book is about one of the greatest and most influential architects and designers of the 19th century. Schinkel designed many of the great buildings of his native Germany; his architecture still dominates Berlin. **DK Eyewitness Travel Guide: Germany** Joanna Egert-Romanowskij, Malgorzata Omilanowska, 2012-08-01. The Man in the Glass House Mark Lamster, 2018-11-06 A smoothly written and fair minded Wall Street Journal biography of architect Philip Johnson a finalist for the National Book Critics Circle Award When Philip Johnson died in 2005 at the age of 98 he was still one of the most recognizable and influential figures on the American cultural landscape The first recipient of the Pritzker Prize and MoMA's founding architectural curator Johnson made his mark as one of America's leading architects with his famous Glass House in New Canaan CT and his controversial AT T Building in NYC among many others in nearly every city in the country but his most natural role was as a consummate power broker and shaper of public opinion Johnson introduced European modernism the sleek glass and steel architecture that now dominates our cities to America and mentored generations of architects designers and artists to follow He defined the era of starchitecture with its flamboyant buildings and celebrity designers who esteemed aesthetics and style above all other concerns But Johnson was also a man of deep paradoxes he was a Nazi sympathizer a designer of synagogues an enfant terrible into his old age a populist and a snob His clients ranged from the Rockefellers to televangelists to Donald Trump Award winning architectural critic and biographer Mark Lamster's The Man in the Glass House lifts the veil on Johnson's controversial and endlessly contradictory life to tell the story of a charming yet deeply flawed man A rollercoaster tale of the perils of wealth privilege and ambition this book probes the dynamics of American culture that made him so powerful and tells the story of the built environment in modern America
