**Russian Style** Julie A. Cassiday,2023-12-19 In the two decades after the turn of the millennium Vladimir Putin s control over Russian politics and society grew at a steady pace As the West liberalized its stance on sexuality and gender Putin s Russia moved in the opposite direction remolding the performance of Russian citizenship according to a neoconservative agenda characterized by increasingly exaggerated gender roles By connecting gendered and sexualized citizenship to developments in Russian popular culture Julie A Cassiday argues that heteronormativity and homophobia became a kind of politicized style under Putin s leadership However while the multiple modes of gender performativity generated in Russian popular culture between 2000 and 2010 supported Putin s neoconservative agenda they also helped citizens resist and protest the state s mandate of heteronormativity Examining everything from memes to the Eurovision Song Contest and self help literature Cassiday untangles the discourse of gender to argue that drag or travesti became the performative trope par excellence in Putin s Russia Provocatively Cassiday further argues that the exaggerated expressions of gender demanded by Putin s regime are best understood as a form of cisgender drag This smart and lively study provides critical nuanced analysis of the relationship between popular culture and politics in Russia during Putin s first two decades in power

**Troubling Masculinities** Glen Donnar,2020-07-23 Troubling Masculinities Terror Gender and Monstrous

Others in American Film Post 9 11 is the first multigenre study of representations of masculinity following the emergence of violent terror as a plot element in American cinema after September 11 2001 Across a broad range of subgenres including disaster melodrama monster movies postapocalyptic science fiction discovered footage and home invasion horror action thrillers and frontier westerns author Glen Donnar examines the impact of terror Others from Arab terrorists to giant monsters especially in relation to cinematic representations in earlier periods of national turmoil Donnar demonstrates that the reassertion of masculinity and American national identity in post 9 11 cinema repeatedly unravels across genres Taking up critical arguments about Hollywood s attempts to resolve male crisis through Orientalizing figures of terror he shows how this failure reflects an inability to effectively extinguish the threat or frightening difference of terror The heroes in these movies are unable to heal themselves or restore order often becoming as destructive as the threats they are supposed to be fighting Donnar concludes that interrelated anxieties about masculinity and nationhood continue to affect contemporary American cinema and politics By showing how persistent these cultural fears are the volume offers an important counternarrative to this supposedly unprecedeted moment in American history

Future of the 1950s Dennis R. Cutchins,Dennis R. Perry,2023-07-17 Science fiction cinema once relegated to the undervalued B movie slot has become one of the dominant film genres of the 21st century with Hollywood alone producing more than 400 science fiction films annually Many of these owe a great deal of their success to the films of one defining decade the 1950s Essays in this book explore how classic 50s science fiction films have been recycled repurposed and reused in the decades since their release Tropes from Don Siegel s Invasion of the Body Snatchers 1956 for instance have found surprising new life in Netflix s wildly popular Stranger Things Interstellar 2014 and Arrival 2016 have clear though indirect roots in the iconic 1950s science fictions films Rocketship X M 1950 and The Day the Earth Stood Still 1951 and The Shape of Water 2017 openly recalls and reworks the major premises of The Creature From the Black Lagoon 1954 Essays also cover 1950 s sci fi influences on video game franchises like Fallout Bioshock and Wolfenstein

**Fire and Snow** Marc DiPaolo,2018-08-01 A

broad examination of climate fantasy and science fiction from The Lord of the Rings and the Narnia series to The Handmaid s Tale and Game of Thrones Fellow Inklings J R R Tolkien and C S Lewis may have belonged to different branches of Christianity but they both made use of a faith based environmentalist ethic to counter the mid twentieth century s triple threats of fascism utilitarianism and industrial capitalism In Fire and Snow Marc DiPaolo explores how the apocalyptic fantasy tropes and Christian environmental ethics of the Middle earth and Narnia sagas have been adapted by a variety of recent writers and filmmakers of climate fiction a growing literary and cinematic genre that grapples with the real world concerns of climate change endless wars and fascism as well as the role religion plays in easing or escalating these apocalyptic level crises Among the many other well known climate fiction narratives examined in these pages are Game of Thrones The Hunger Games The Handmaid s Tale Mad Max and Doctor Who Although the authors of these works stake out

ideological territory that differs from Tolkien's and Lewis's DiPaolo argues that they nevertheless mirror their predecessors ecological concerns. The Christians, Jews, atheists, and agnostics who penned these works agree that we all need to put aside our cultural differences and transcend our personal socioeconomic circumstances to work together to save the environment. Taken together these works of climate fiction model various ways in which a deep ecological solidarity might be achieved across a broad ideological and cultural spectrum. This book is remarkably diverse in its literary, cinematic, journalistic, and graphics media sources and the writing is equally authoritative in all these domains. DiPaolo's prose moves deftly from a work of fiction to its film avatar to the political and societal realities they address and back again into other cultural manifestations and then into and out of the deep theory of climate fiction literary scholarship, ecofeminism, religious tradition, and authorial biographies. It contributes considerably to all of these fields and is indispensable for climate and environmental literature classes. It's also a must have for general readers of the genre Jonathan Evans coauthor of *Ents, Elves, and Eriador: The Environmental Vision of J. R. R. Tolkien*. I like it. No, I love it. This book is both broad and deep and yet it remains both very readable and constantly interesting. It's the sort of book that can only be written by someone who is a good reader of both books and culture. As I was reading it I thought this is like being at a party and meeting someone brilliant and fun and finding that I'm enjoying that person's company so much that I don't notice the time flying by. It's not often that a scholarly book does that to me.

**Viewfinding** Cathy Jean Mullen, Janice Rahn, 2010. This is a collection of essays on the arts, new media, popular culture, and technologies as they influence practices of curriculum development and teaching. The authors artists, educators, scholars, and researchers with both scholarly and practical expertise share their teaching practices and curriculum knowledge and reflect upon challenging issues in contemporary art, popular culture, new media, and technology. Each chapter proposes pedagogical structures and curriculum resources that can be adapted to diverse school contexts and technical resources. The perspectives gathered in this book reflect ideas drawn from several disciplines including contemporary art histories of the arts, culture, and technology; cultural studies and media studies; as well as various approaches to the study of technologies. Authors also incorporate a range of educational theories and instructional practices mainly from the visual and performing arts. At times explicit and at others implicit these wide ranging conceptual influences inform the varied curriculum and teaching practices described here. Together these essays and their companion DVD which illustrates many of these diverse perspectives provide a comprehensive and thoughtful look at arts based approaches to new media.

**Approximation** Stella Bruzzi, 2020-04-30. In our era of fake news, Stella Bruzzi examines the dynamism that results from reusing and reconfiguring raw documentary data documents, archive news, etc. in creative

ways Through a series of individual case studies this book offers an innovative framework for understanding how in our century film and media texts frequently represent reality and negotiate the instabilities of truth by approximating factual events rather than merely representing them through juxtaposing disparate often colliding perspectives of history and factual events Covering areas such as true crime politics and media the book analyses the fluidity and instability of truth arguing that approximation is more prevalent now in our digital age and that its conception is a result of viewers accidental or unconscious connections and interventions Original and thought provoking Approximation provides students and researchers of media film and cultural studies a deeper insight into our understanding and acceptance of what truth really means today
