Linguistic Theory and Empirical Evidence Bob de Jonge, Yishai Tobin, 2011-06-09 This volume further elaborates the empirical tradition of Columbia School CS Linguistics by offering diverse empirical analyses for a wide variety of languages These studies open a much needed debate advocating the necessity of the independent validation of linguistic hypotheses This research exemplifies how such a validation should be conducted by determining which forms underlie the analyses and extracting those observations that are considered to be objective The volume consists of two parts a section on synchronic and diachronic grammatical problems and a section on Phonology as Human Behavior PHB the Columbia School version of phonology applied to evolutionary developmental and clinical issues and the phonotactics of the selected lexicon of a literary text It provides a wealth of useful empirical data and in depth and sophisticated qualitative and quantitative analyses of a broad range of languages from diverse families French Spanish Afrikaans Dutch English Polish Russian Japanese and Hebrew

Joseph Davis,Radmila Jovanovi? Gorup,Nancy Stern,2006-01-01 This collection carries the functionalist Columbia School of linguistics forward with contributions on linguistic theory semiotics phonology grammar lexicon and anthropology Columbia School linguistics views language as a symbolic tool whose structure is shaped both by its communicative function and by the characteristics of its users and considers contextual pragmatic physical and psychological factors in its analyses This volume builds upon three previous Columbia School anthologies and further explores issues raised in them including fundamental theoretical and analytical questions And it raises new issues that take Columbia School beyond its origins The contributions illustrate both consistency since the school s inception over thirty years ago and innovation spurred by groundbreaking analysis The volume will be of interest to all functional linguists and historians of linguistics Languages analyzed include Byelorussian English Japanese Serbo Croatian Spanish and Swahili *Cognitive and Communicative Approaches to Linguistic Analysis* Ellen Contini-Morava,Robert S. Kirsner,Betsy Rodríguez-Bachiller,2004-12-23 This volume is the product of a Columbia School Linguistics Conference held at Rutgers University in October 1999 where the plenary speaker was Ronald W Langacker a founder of Cognitive Linguistics The goal of the book is to promote two kinds of dialogue First dialogue between Cognitive Grammar and the particular sign based approach to language known as the Columbia School While they share certain basic assumptions the maximalist CG and the minimalist CS differ both theoretically and methodologically Given that philosophers from Mill to Kuhn to Feyerabend have stressed the importance to any discipline of dialogue between opposing views the dialogue begun here cannot fail to bear fruit The second kind of dialogue is that among several sign based approaches themselves and also between them and two competitors grammaticalization theory and generic functionalism Topics range from phonology to discourse Analytical problems are taken from a wide range of languages including English German Guarani Hebrew Hualapai Japanese Korean Macedonian Mandarin Polish Russian Serbian Spanish Urdu and Yaqui Research on Old French: The State of the Art Deborah L Arteaga,2012-11-02 The present volume presents scholarly study into Old French as it is practiced today in all of its forms within a variety of theoretical frameworks from Optimality Theory to Minimalism to Discourse Analysis Many of the chapters are corpus based reflecting a new trend in the field as more electronic corpora become available The chapters contribute to our understanding of both the synchronic state and diachronic evolution not only of Old French but of language in general Its breadth is extensive in that contributors pursue research on a wide variety of topics in Old French focusing on the various subsystems of language All examples are carefully glossed and the relevant characteristics of Old French are clearly explained which makes it uniquely accessible to non specialists and linguists at all levels of training Columbia School Linguistics in the 21st Century Nancy Stern,Ricardo Otheguy,Wallis Reid,Jaseleen Sackler,2019-10-15 This collection is the fifth volume of

selected papers to emerge from Columbia School CS linguistics conferences A radically functionalist approach CS shares with Cognitive linguistics the view that grammar is composed of form meaning correspondences CS views language as a symbolic tool whose structure is shaped both by its communicative function and by the characteristics of its users The volume includes papers on methodological issues and innovative analyses on English Spanish and Mandarin that illustrate the value of the strict application of clearly spelled out theoretical principles to the execution of linguistic analysis Four of the volume s eleven papers are written in Spanish and all papers have abstracts in both English and Spanish An introduction highlights the theoretical and analytical premises of CS and their differences from and similarities with cognitive functional approaches The collection will be of interest to researchers and laymen who aim to understand the role of language in human communication

Questioning Theoretical Primitives in Linguistic Inquiry Naomi L. Shin, Daniel Erker, 2018-11-15 Across the world professional linguistic inquiry is in full bloom largely as result of pioneering thinkers who helped rapidly modernize the study of human language in the last century As the field continues to move forward further solidifying its position as a conduit of insight into the human condition it is essential to take stock of the theoretical primitives that have given linguistics its intellectual foundation This volume does precisely that inspecting the load bearing components of the edifice upon which contemporary linguistics has been constructed The volume s authors whose expertise spans the Generativist Functionalist and Variationist research traditions remind us of the need to revisit the conceptual bedrock of the field clarifying and assessing our primary theoretical moves including those relating to such elemental components as the linguistic sign a language structural relations grammatical category acquisition bilingual competence and sociolinguistic variable

Exploring Functional-Cognitive Space Christopher S. Butler, Francisco González-García, 2014-08-28 This book intended primarily for researchers and advanced students expands greatly on previous work by the authors exploring the topography of the multidimensional functional cognitive space within which functional cognitive and/or constructionist approaches to language can be located The analysis covers a broad range of 16 such approaches with some additional references to Chomskyan minimalism and is based on 58 questionnaire items each rated by 29 experts on particular models for their importance in the model concerned These ratings are analysed statistically to reveal overall patterns of dissimilarity across models The questionnaire ratings and experts' comments are then used together with the authors' close reading of the literature in detailed discussion leading to a final dichotomous rating for each feature in each model the results again being analysed statistically The final chapter presents the overall conclusions and suggests how existing collaborations between approaches could be strengthened and new ones created in future research *Exploring Functional Cognitive Space* has been awarded the 2016 prize of the Spanish Association for Applied Linguistics Asociaci3n Espa3ola de Ling3stica Aplicada AESLA for work by experienced researchers

Expressing the Same by the Different Igor Dreer, 2007 This volume offers an alternative sign-oriented analysis of the distribution of the French Indicative and Subjunctive It rejects both government and functions attributed to both moods and shows that the distribution of the Indicative and the Subjunctive is motivated by their invariant meanings The volume illustrates the close interaction between the Indicative and the Subjunctive as linguistic signs and signs of other grammatical systems contextually associated with the invariant meanings of both moods Special consideration is given to the use of the Indicative and the Subjunctive in texts of

different styles and genres This volume also deals with the diachronic disfavoring of the Subjunctive and especially of the Imperfect Subjunctive that occurred from Old French to Contemporary French It is argued that this disfavoring was motivated by the narrowing of the invariant meaning of the Contemporary French Subjunctive All hypotheses are supported by contextualized examples and frequency counts *The Substance and Value of Italian Si* Joseph Davis,2017-09-08 This book offers an original treatment of the Italian clitic si Sharply separating encoded grammar from inference in discourse it proposes a unitary meaning for si including impersonals passives and reflexives Si signals third person participancy but makes no distinctions of number gender or case role The analysis advances the Columbia School framework by relying on just these straightforward oppositions attributing variety of interpretation largely to language use rather than to grammar The analysis places si within a network of oppositions involving all the other clitics Data come primarily from twentieth century and more recent published and on line literature The book will be of interest to functional linguists students of reflexivity and scholars of the Italian language **English Historical Linguistics and Philology in Japan** Jacek Fisiak,Akio Oizumi,2011-07-22 TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science TRENDS IN LINGUISTICS considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints High quality standards are ensured through anonymous reviewing Prague Linguistic Circle Papers Eva Haji?ová,Petr Sgall,Jiri Hana,2002-01-01 The fourth volume of the revived series of Travaux du Cercle linguistique de Prague brings three contributions by J Vachek O Le ka and V Skalicka connected with the classical period of the Prague School as well as papers delivered at the conference Function Form and Meaning Bridges and Interfaces held in Prague in 1998 Some of the contributions concern issues of grammar of different languages including a syntactic annotation of a large Czech text corpus a comparison of Hebrew conditionals with English a characterization of the typology of the Indo European verb A further part focuses on topic focus articulation information sentence structure functional sentence perspective with a concept of perspective introduced as close to but distinct from topic and with three different viewpoints on the semantics of information structure Two broader essays on the nature of language are then presented while the last section analyzes the structure of free verse The volume represents a contribution to the continuing fruitful interaction between the work of the Prague School and the more and less closely related approaches of linguists in
