Meaning Of The 20th Century The Great Transition:

The Meaning of The Twentieth Century Kenneth E. Boulding, 1965 **The Meaning of the Twentieth Century** Kenneth Boulding, 2021-12-30 Originally published in 1965 and written by a noted economist and leader in the field of conflict resolution this book traces the forces which have brought the 20th century post civilisation into being the ever increasing power of science and the scientific attitude the global communication network the high efficiency of industrial societies New conditions pointed to a life of ease but also enormous problems The book discusses how though our technical resources have become immense social and psychological conflicts remain The author's training in psychology and economics combines with a deep sense of history to create a book which is as relevant now as when it was first published *the Meaning of the 20th Century* Kenneth E. Boulding, 1965 Cultures of the Future Magoroh Maruyama, Arthur M. Harkins, 2011-06-15 No detailed description available for Cultures of the Future **AEC Research and Development Report** Atomic Energy Commission, 1969 **"In the End, God"** John AT Robinson, 2011-05-26 Death judgement heaven and hell these are the Four Last Things traditionally linked together under the heading of Eschatology In this book John Robinson examines them all with trenchancy and lucidity providing a new and vital understanding of how these themes relate to contemporary Christian life In the End God identifies a gap that exists in the treatment of eschatology within the Christian faith As Robinson points out eschatology had traditionally dealt with the last things in a way that is remote and removed from everyday life and Christianity and the goal of his book is to make eschatology fully relevant to the modern world Although it is commonly held that eschatology within modern Christianity is centred on the fact and moment of death Robinson shows that the true nature of eschatology is something quite different It is not about the last things after everything else but rather is about the relation of all things to the last things or as it were about the lastness of all things Revealing the foundation of biblical eschatology to be the experience of God by the community of faith Robinson calls readers to embrace the eschatological vision of the Bible but to do so in a way that is alert to its mythic character In the course of these explorations he also lays bare his own theology of universal salvation However contrary to what one may expect this universalism is one that seeks to take both human freedom and the reality of hell with the utmost seriousness This special edition of John A T Robinson's classic text also includes an extended introductory essay by Professor Trevor Hart of the University of St Andrews and an exchange between Robinson and Thomas F Torrance first published in 1949 in the Scottish Journal of Theology

The Death of Industrial Civilization Joel Jay Kassiola,1990-01-01 The Death of Industrial Civilization explains how the contemporary ecological crisis within industrial society is caused by the values inherent in unlimited economic growth and competitive materialism Kassiola shows that the limits to growth critique of industrial civilization is the most effective stance against what seems to be a dominant and invincible social order He prescribes the social changes that must be implemented in order to transform industrial society into a sustainable and more satisfying one

Genes for Sale Joseph Henry Vogel,1994-08-25 With each species lost to the mass extinction crisis the natural economy of the nation and of the world is greatly diminished An endangered animal may hold the cure for cancer a threatened plant could someday become a major food crop and even bacteria often provide novel molecular structures in polymer science As the rainforest is destroyed and habitats are degraded conservationists are now urgently searching for dramatic new ways to save these economic resources In this provocative and important book Joseph Henry Vogel details one potential solution that has met with increasing interest and popularity the privatization of genetic information Vogel cogently makes the case that the world should abandon the doctrine of the common heritage of mankind and create private property rights over genes Landowners

once vested with the genetic resources on their land will have a newfound financial incentive to protect what they now already control

Genes for Sale provides an overview of the many complexities inherent in implementing a viable conservation policy Vogel elaborates both technical issues like the construction of a gargantuan database of landtitles and biological inventories and political issues like legal reform Clearly written engaging and timely **Genes for Sale** provides students scientists and policy makers alike with the ideal introduction to an exciting and controversial new approach to saving our precious living heritage

Geopolitical Change, Grand Strategy and European Security L. Simon, 2013-11-27 Examining the interplay between geopolitics the strategic priorities of Europe's most powerful nations Britain Germany and France and the evolution of NATO and CSDP this book unveils the mechanics of the tension between conflict and cooperation that lies at the heart of European security politics

The Dynamics of Cities Dimitrios Dendrinos, 2002-09-26 Drawing on recorded evidence this book argues that simple general and powerful macrodynamic processes guide the growth and decline of present day urban agglomerations as well as cities of the past

The Constitution of the Post-Economic State Vladislav L. Inozemtsev, 2019-07-30 First published in 1998 this author illustrates clearly how on the threshold of the new millennium the world is entering a post economic era On the basis of a comprehensive analysis of modern socio economic trends the author brings forward a new paradigm for understanding contemporary economic processes that change the substance of our civilization

Hope in the Thought of Jacques Ellul Lawrence J. Terlizze, 2005-10-30 Hope expresses more than an area of concentration in Ellul's thought it is the central idea that binds his disparate elements together Ellul believed that at this moment of history the world since 1945 hope must preoccupy our thinking and lives To understand hope we must first

comprehend its absence This entails discerning what causes the absence of hope namely the world s embrace of technique and the abandonment of God Ellul also rejected these as a positive affirmation He wanted to make a firm distinction between reality and truth He affirmed modern abandonment as a realistic fact as an accurate analysis of the present condition not as an affirmation of the truth Hope is truth in Jesus Christ but truth must be asserted against these harsh facts He used facts to incite hope in believers to shake their complacency and to realize their actual condition in the world The idea of hope in the thought of Jacques Ellul can only be properly understood in light of dialectic struggle between negatives which amount to factual representations of the modern world and positives through which hope exerts itself in the face of these facts From this tension will issue personal resolve Technique has brought the world to great collective heights and achievements but this has come at the expense of personal ends and meaning Ellul attempted to bridge this gap by asserting individual meaning against the aggregated progress of technique without destroying the gains made by collective advance This represents the central dilemma in Ellul s thought how does one maintain meaning and personal aims in a world founded on corporate necessity from the Introduction Contemporary American Novelists of the Absurd Charles H.
