Hydrocarbon-Contaminated Soils Stephanie Fiorenza, Carroll L. Oubre, C. H. Ward, 2020-12-17 Interest in phytoremediation as a solution for contaminants in groundwater and soil has exploded The project documented in *Phytoremediation of Hydrocarbon Contaminated Soils* presents innovative technology for environmental clean up using in situ treatment It describes the results of a field study focusing on hydrocarbon contamination especially polynuclear aromatic hydrocarbons in surface and near surface soils The field demonstration used soils contaminated with aged diesel fuels The random block design enabled the investigators to test the statistical difference in the effects of different vegetated and unvegetated treatments They tested the degradation of diesel and polynuclear aromatic hydrocarbon components in plots containing three different vegetation treatments two grasses and a legume and a non vegetated control Part one of the monograph gives a complete and thorough account of the results of the field study Part two covers the design and potential costs of a full scale implementation of the demonstration system as well as the performance and potential application of the new technology *Phytoremediation of Hydrocarbon Contaminated Soils* supplies quantitative results about the use of vegetation in soil remediation The information given on the niches and limitations of the technologies allows for a more informed selection of

remedial solutions for environmental cleanup *Construction Specifications Writing* Mark Kalin, Robert S. Weygant, Harold J. Rosen, John R. Regener, 2011-09-13 Updated edition of the comprehensive rulebook to the specifier's craft With this latest update *Construction Specifications Writing Sixth Edition* continues to claim distinction as the foremost text on construction specifications This mainstay in the field offers comprehensive practical and professional guidance to understanding the purposes and processes for preparation of construction specifications This new edition uses real world document examples that reflect current writing practices shaped by the well established principles and requirements of major professional associations including the American Institute of Architects AIA the Engineers Joint Contract Documents Committee EJCDC and the Construction Specifications Institute CSI Also included are guidelines for correct terminology product selection organization of specifications according to recognized CSI formats and practical techniques for document production Fully revised throughout this Sixth Edition includes Updates to MasterFormat 2004 as well as SectionFormat PageFormat 2007 and Unifomat End of chapter questions and specification writing exercises Samples of the newly updated construction documents from the AIA New chapter on sustainable design and specifications for LEED projects Updated information on the role of specifications in Building Information Modeling BIM **Cost evaluation strategies for technologies tested**

under the environmental technology verification program , Parametric Cost Modeling for Buildings Donald E. Parker, 2014-05-23 Successful cost management and value engineering in construction is based on accurate and early estimations of cost and this book is the quickest route to creating a cost plan from scratch The budgeting system described in this book will help the reader to document project scope at a level that provides excellent cost control at design stage establish the parameters of potential sites before selecting one determine the amount of financing needed before deciding to bid on a project make a detailed and robust building project budget determine the rental rate necessary to see if a building project will be marketable The technique used is a parametric cost system not the square foot cost system used by most who quote an up front building cost To help calculate the parameter quantities and price them as quantified this book comes with 5 electronic templates to calculate program scope i e space configuration HVAC loads plumbing and electrical It also includes the author's parametric cost database and cost template to prepare the construction estimate a soft cost template to price out all related program costs convert them to a monthly cash flow incorporate financing costs and then reveal the final budget an operation and maintenance annual cost template to calculate those variable and fixed costs necessary to run the building and then convert the result into the necessary rental rate to capitalize all costs The spreadsheets data advice and templates are all introduced through a detailed case study placing everything in an easy to understand practical context This will prove an invaluable guide not only for estimators and cost engineers but also developers clients and architects
